

**Journal of Advanced College of Engineering and Management**  
**Guidelines for Technical Manuscript 2025**

**Aim & Scope:**

The journal of Advanced College of Engineering and Management (JACEM) is a refereed journal to serve the interests of professionals, academicians and research organizations working in the field of applied sciences and engineering. Publication of journals regarding the achievements and problems in the field of science and engineering work in the context of Nepal is yet to go a long way for an established tradition.

The scope of the journal includes all the disciplines of applied science and engineering. The paper in the journal will be in English.

**Guidelines To Authors:**

1. **Full Paper Submission Deadline: July 1<sup>st</sup>, 2025**
2. Also articles must be sent in electronic form at the email address [jacem@acem.edu.np](mailto:jacem@acem.edu.np)

Corresponding Address:

Editor-in-Chief, JACEM Publication,  
Advanced College of Engineering and Management, Kalanki, Kathmandu, Nepal Telephone  
Email: [jacem@acem.edu.np](mailto:jacem@acem.edu.np)

3. Article(s) should be original in nature and have not been published elsewhere.
4. The length of manuscripts should not, in general, exceed 10 pages.
5. If the copyrighted material is used, the author should obtain the necessary copyright release and submit it along with the manuscript.
6. Manuscript should be printed in A4 size paper with 1” margin on top, bottom, and right and 1.5” on left.
7. The manuscript must be in Time New Roman text font of font size 12. Adjust the line spacing to accommodate 45 lines in the pages. Number all pages starting with the title page.
8. The first page must contain the title of the paper, author’s full name(s), affiliation(s), position(s), mailing address, phone number and email address.
9. The paper should include the following major sections in addition to the main body of the text.
  - a. **Introduction:** Describe the motivation and purpose of the research.
  - b. **Literature Review:** Describe the previous research works done related to your research.

- c. **Methodology:** Provide sufficient information to allow readers to repeat the work.
  - d. **Result and discussion:** Discuss and analyze the outcomes of the research work.
  - e. **Conclusions:** State conclusions precisely without elaboration.
  - f. **Suggestions and recommendations:** make recommendations for research work and give suggestions for further study.
  - g. **Acknowledgements:** Recognize any advisory and financial help, and major assisting works in the paper.
10. Article must include an abstract (150 words maximum) and a reference list. References are cited by number in the text in sequence of first appearance and listed numerically at the end of the text. References format and punctuation must conform to the following style.
- Book: author/editor, title, edition, volume number, place of publication and publisher, year of publication.
- Journal: author of article, title of article, journal/serial title, volume number, issue number, and page number on which the article appears, year of publication.
- Electronic information: author/editor, article title, journal title, the type of medium (e.g CD-ROM, On-line, etc), page or length, "Available statement (e.g. www. Address, supplier and name of electronic database, E-mail address, etc), and access code, year of publication.
11. A limited number of explanatory endnotes are permissible. Endnotes should be listed at the end of the paper.
12. International system of units (SI) should be used. If other units are used, equivalents should be given in parenthesis
14. Insert tables, figures/photos, charts/graphs in the text and number them consecutively in Arabic numerals. e.g, Table 1, Table 2..., Fig 1 Fig 2..., Chart 1, Chart 2...
15. All manuscripts are subjected to peer review to determine originality, validity and significance of the submitted material. Criteria for publication include scientific merit and significance to the field.
16. All manuscripts, which are rejected, will be returned to authors.
17. All authors should send an email, telephone number to speed communication.
18. Author will be provided with 1 free print. Purchase orders for additional prints can be made on order forms which will be sent to the authors.
19. JACEM reserves the copyright for the published papers. Author will have the right to use content of the published paper in part or in full for their own work.

## Paper Title

<sup>1\*</sup>Author Name 1, <sup>2</sup>Author Name 2, <sup>1</sup>Author Name 3, <sup>3</sup>Author Name 4

<sup>1,2,3</sup>Dept. name of organization (of Affiliation) name of organization

\*Email address:

---

### *Abstract*

IEEE format requires you to include an abstract at the start of your paper, followed by a list of keywords. In the “Styles” section in Microsoft Word, you can find the appropriate styles for all the different sections and headings in the paper, which are already applied here. For example, the “abstract” style is applied to this text, the “keywords” style to the next section. Note that the titles “Abstract” and “Keyword” should remain as they are written here: italicized and followed by an em dash.

**Keywords**—*template, Scribbr, IEEE, format*

### **I. THIS IS A LEVEL 1 HEADING**

This is the start of the body text of your paper. You can use headings like the one above to divide your paper into subtopics. Use level 1 headings first, then level 2 headings if you need further divisions inside those, and so on. Don’t use a level of heading unless there will be at least two headings of that level. You don’t have to use any headings at all if it doesn’t make sense to divide your paper in that way. Appropriate numbering is automatically applied to headings. You don’t have to number them yourself, just make sure the right heading style is applied to each one. Level 1 and 2 headings (as well as the paper title) should be written with title case capitalization, while level 3 and 4 headings are written in sentence case. Use the enter key to start a new paragraph. The appropriate spacing and indent are automatically applied.

Use the enter key to start a new paragraph. The appropriate spacing and indent are automatically applied.

#### A. This Is a Level 2 Heading

##### 1. And this is a level 3 heading:

Equations should be typed in either Times New Roman or Symbol font, or, if the equation is multileveled, inserted into your text as a graphic instead. On the far right of the line containing the equation, number it in parentheses, and use this number to refer to it in the text (1).

$$a + b = \gamma (1)$$

2. This is another level 3 heading:

The body text is divided into two columns on each page, written in 10 pt. Times New Roman, and justified (meaning that the text is spaced in a way that makes the right edge line up neatly). All the appropriate formatting is automatically applied in this template. If anything goes wrong, you can reapply it using the “styles” section in Word.

Table Head	Table Column Head		
	Table Column Subhead	Subhead	Subhead
text	text		

- a. And this is a level 4 heading: It’s recommended to write your text in a separate document and then add it to this template once it’s complete. When copying text into the template from another document, make sure that the appropriate style is still applied to each section, reapplying styles if necessary.
- b. This is another level 4 heading: It’s also possible to add bullet points when appropriate, using the “bullet list” style:
  - Treat the word “data” as plural, not singular.
  - For example, “the data indicate that ...”

B. This Is Another Level 2 Heading

Place any figures or tables you use at the top or bottom of a column. Don’t place them in the middle of a column. If particularly wide, a table or figure can span across both columns. Insert a table or figure after the point where it is first cited in the text.

When inserting a figure, such as a photograph or infographic, use 8 pt. Times New Roman for any labeling text within the image and for the figure caption. You can see an example of a figure caption in Fig. 1, above. Refer to figures like that, using the abbreviation “Fig.” and the figure’s number.

A table heading (using the “table head” style) appears above a table. This will automatically number the table for you. Any footnotes appear below the table, using

the “table footnote” style. Footnotes are indicated by superscript lowercase letters within the table. An example of a table can be seen in Table I, below.

## II. THIS IS ANOTHER LEVEL 1 HEADING

All the headings in the main body of your paper are numbered (automatically).

Another type of heading is the “component heading”, which is used for other components that aren’t part of the main text. These are usually your acknowledgments and your references, which you can see examples of below. These headings are not numbered. The correct styling for them can be applied using the “Heading 5” style, which is the same as the “Heading 1” style but without numbering.

### 1. THIS IS THE HEADING FOR A TABLE

- a. This is a table footnote.

You can cite your references in text by including the corresponding number, in square brackets [1]. If you need to cite a specific part of the source, you can include a page number [2, p. 13] or range [3, pp. 41–56].

## ACKNOWLEDGMENTS

“Acknowledgment(s)” is spelled without an “e” after the “g” in American English. As you can see, the formatting ensures that the text ends in two equal-sized columns rather than only displaying one column on the last page. This template was adapted from those provided by the IEEE on their own website.
