Examination Control Division
2080 Bhadra

Exam.		Regular	
Level	BE	Full Marks	80
Programme	BEI	Pass Marks	32
Year / Part	II / I	Time	3 hrs.

Subject: - Probability and Statistics *(SH 505)*

✓ Candidates are required to give their answers in their own words as far as practicable.
✓ Attempt **All** questions.
✓ The figures in the margin indicate **Full Marks**.
✓ **Necessary figures are attached herewith.**
✓ Assume suitable data if necessary.

1. What are the merits and demerits of mode? From the following frequency distribution, find mean, median and standard deviation. [2+4]

Income in Rs.	500-600	600-700	700-800	800-900	900-1000
No of employees	150	300	500	200	50

2. State Bayes's theorem. A manufacture of air conditioning units purchases 70% of its thermostats from company A, 20% from company B, and the rest from company C. Past experience shows that 0.5% of company A's thermostats, 1% of company B's thermostats and 1.5% of company C's thermostats are likely to be defective. An air conditioning unit randomly selected from this manufacturer's production line was found to have a defective thermostat. [2+4]

   (i) Find the probability that company A supplied the defective thermostat.

   (ii) Find the probability that company B supplied the defective thermostat.

3. Write conditions for a probability mass function of a discrete random variable. A random variable X has following probability mass function. [5]

X	3	2	1	0	-1	-2	-3
P(x)	0.1	0.2	3k	k	2k	0	0.1

   Find (i) value of k, (ii) Expected value and variance of X.

4. An item is produced in a large number. The machine is known to produce 5% defective. A quality control inspector is examining the items by taking them at random. What is the probability that at least 4 items are to be examined in order to get 2 defective? Also find mean and variance. [5]

5. The length of time (in minutes) that a certain lady speaks on the telephone is found to be random phenomenon, with a probability function specified by the probability density function f(x) as [5]

$$f(x) = \begin{cases} Ae^{-x/5} & \text{for } x \geq 0 \\ 0 & \text{elsewhere} \end{cases}$$

   Find value of A. What is the probability that the number of minutes that she will take over the phone is

   (i) More than 10 minutes.

   (ii) Less than 5 minutes .

   (iii) Between 5 and 10 minutes.
6. Define Gamma distribution with important properties. [2+3]

7. State Central Limit Theorem. The lifetime of a certain brand of an electric bulb may be considered a random variable with mean 1200 hours and standard deviation 250 hours. Find the probability that average lifetime of 60 bulbs. [5]

   (i) Exceed 1400 hours.

   (ii) Is between 1100 hours and 1300 hours.

   (iii)Is less than 1100 hours.

8. A population consists of four numbers 4, 8, 12, 16. [5]

   a) Write down all possible sample of size two without replacement.

   b) Verify that the sample mean is unbiased estimator of population mean.

   c) Calculate the standard error of sample mean.

9. Explain clearly the major steps to be adopted by researchers in testing of hypothesis of mean for small sample. When σ is unknown as sample size is less than 30. [5]

10. Eleven school boys were given a test in statistics. They were given a month's tuition and a second test was held at the end of it. Do the marks give evidence that the students have benefited by the extra coaching? Test at 10% level of significance. [5]

Boy	1	2	3	4	5	6	7	8	9	10	11
Marks in 1st test	23	20	19	21	18	20	18	17	23	16	19
Marks in 2nd test	24	19	22	18	20	22	20	20	23	20	18

11. The results of a survey regarding "You Tube" viewers preference for different types of music in city of Nepal are given in the following table. Is there any association between viewers classified by age group and preference of type of music influence by age at 5 % level of significance? [5]

Types of Music	Age Group		
	19-25	26-35	above 36
Folk Music	80	60	9
Modern Music	210	325	44
Indifferent	16	45	32

12. In a random sample of 75 axle shafts, 12 have a surface finish that is rougher than the specifications will allow. Suppose that a modification is made in the surface finishing process and subsequently a second random sample of 85 axle shafts is obtained. The number of defective shafts in this second sample is 10. Obtain an approximate 95% confidence interval on the difference in the proportions of defectives produced under the two processes. [5]

13. A chemical company, wishing to study the effect of extraction time on the efficiency of a extraction operation, obtained the data shown in the following table. [5]

Extraction time (minutes) x	27	45	41	19	35	39	19	49	15	31
Extraction efficiency (%) y	57	64	80	46	62	72	52	77	57	68

   a) Fit a straight line to the given data by the method of least squares and use it to predict the extraction efficiency one can expect when the extraction time is 38 minutes.

   b) Find 95% confidence interval for slope of line β.

14. Define multiple correlation with any two properties. Past experience show that the productivity per hectare is affected by the respective uses of chemicals, fertilizers and seeds. If the simple correlations coefficients between fertilizer (x_1), seeds (x_2) and productivity (x_3) are $r_{12} = 0.81$, $r_{13} = 0.18$ and $r_{23} = -0.50$ respectively, calculate the coefficient of multiple correlation, coefficient of multiple determination and interpret the result.

[5]

15. Over a period of 60 days the percentage relative humidity in a vegetable storage building was measured. Mean daily values were recorded as shown below.

[8]

60	63	64	71	67	73	79	80	83	81
86	90	96	98	98	99	89	80	77	78
71	79	74	84	85	82	90	78	79	79
78	80	82	83	86	81	80	76	66	74
81	86	84	72	79	72	84	79	76	79
74	66	84	78	91	81	64	76	78	82

(i) Find the sample mean.

(ii) Find sample standard deviation.

(iii) Estimated 95% confidence interval for true mean daily relative humidity from these data.

Exam.		Back	
Level	BE	Full Marks	80
Programme	BEI	Pass Marks	32
Year / Part	II / I	Time	3 hrs.

Subject: - Probability and Statistics (SH 505)

✓ Candidates are required to give their answers in their own words as far as practicable.
✓ Attempt __All__ questions.
✓ The figures in the margin indicate __Full Marks.__
✓ __Necessary tables are attached herewith.__
✓ Assume suitable data if necessary.

1. From the following information regarding the weight of iron rings used in two construction sites X and Y, test the consistency of the weight of iron rings. If you have to judge the quality of ring. Which is more reliable and why? [6]

X	89	92	76	88	78	83	96	87	71
Y	66	97	76	64	77	89	73	75	85

2. State Baye's theorem. Three road construction firms X, Y and Z bid for a certain contract. From past experience, it is estimated that the probability that X will be awarded the contract is 0.40, while for Y and Z the probability are 0.35 and 0.25. If X does receive the contract, the probability that the work will be satisfactorily completed on time is 0.75. For Y and Z these probabilities are 0.80 and 0.70. (i) What is the probability that the work will be completed satisfactorily? (ii) It turns out that the work was done satisfactorily. What is the probability that Y was awarded the contract? [2+4]

3. What are the differences and similarities between Binomial and hypergeometric distribution. [5]

4. A quality control engineer inspects a random sample of 3 batteries from each lot of 24 car batteries ready to be shipped. If such a lot contains 6 batteries with slight defects, what are the probability that inspection sample will contain (i) None of the batteries will be defective? (ii) Only one the batteries will be defective? (iii) At least 2 of the batteries will be defective? (iv) Also find mean and variance. [5]

5. "Time headway" in traffic flow is the elapsed time between the time that one car finishes passing a fixed point and the instant that the next car begins to pass that point. Let the time headway for two randomly chosen consecutive cars on a freeway during a period of heavy flow. The following pdf of X is suggested: [5]

$$f(x) = \begin{cases} 0.15e^{-0.15(x-0.5)}, & x \geq 0.5 \\ 0, & \text{otherwise} \end{cases}$$

What is the probability that time headway is
    (i) At most 5 sec?
    (ii) At least 6 sec?
    (iii) Between 5 and 6 sec

6. The mean inside diameter of a sample of 200 washers produced by a machine is 0.502 cm and the standard deviation is 0.005 cm. The purpose of these washers is intended to allows a maximum tolerance in the diameter of 0.496 to 0.508 cm, otherwise, the washers are considered defective. Determine the percentage of defective washers produced by the machine. Assuming the diameter is normally distributed. [5]

7. State the Central Limit theorem for mean. Write the importance of central limit theorem. [5]

8. Distinguish between population and sample. Batteries last an average of 60 days with standard deviation of 10 days. Sixty batteries are bought. [5]
    a) What is the probability that mean life of all 60 batteries will exceeds 61 days?
    b) What is the probability that mean life of all 60 will differs from 60 days by more than 3 days?

9. Describe the systematic procedure of testing a hypothesis concerning difference of means for infinite population. [5]

10. Write the procedure for testing of population proportion for large sample. [5]

11. A random sample of 200 students was selected and their grading ability in mathematics and interest in engineering administration were as given below? [5]

Interest in Engineering Administration	Ability in Mathematics		
	Low	Average	High
Low	60	15	15
Average	15	45	10
High	5	10	25

Is any relationship between student interest in engineering administration and ability in mathematics? Test the relationship at 5% level of significance.

12. A company has three manufacturing plants and company officials want to determine whether there is a difference in the average age of workers at the three locations. The following data are the ages of five randomly selected workers at each plant. Perform a one-way ANOVA to determine whether there is a significant difference in the mean ages of the workers at the three plants. Use $\alpha = 0.05$. [5]

Plant 1	Plant 2	Plant 3
29	32	25
27	33	24
30	31	24
27	34	25
28	30	26

13. A sample of 10 values of three variables X_1, X_2 and X_3 were obtained as [5]

$\Sigma X_1 = 10$	$\Sigma X_2 = 20$	$\Sigma X_3 = 30$	$\Sigma X_1^2 = 20$	$\Sigma X_2^2 = 68$	$\Sigma X_3^2 = 170$
N=6 ,	$\Sigma X_1 X_2 = 10$	$\Sigma X_1 X_3 = 15$	$\Sigma X_2 X_3 = 64$	-	-

Find:
a) Partial correlation between X_1 and X_3 eliminating the effect of X_2.
b) Multiple correlation between X_1, X_2 and X_3 assuming X_1 as dependent.

14. Distinguish between correlation coefficient and regression coefficient and write its importance in the field of engineering. [5]

15. The approximate total course fees (in Rs.000) of civil program of 30 engineering campus/colleges of different universities in nepal are as follows: [8]

318	318	318	318	600	650	700	730	800	850	950	975	1025	1050	1075
1125	1150	1175	1200	1225	1250	1275	1325	1350	1375	1400	1425	1450	1475	1500

a) Find sample mean, range and standard deviation for these approximate total course fees.
b) Construct 95% confidence interval on true mean course fee.
c) Interpret your results.

Exam.		Back	
Level	BE	Full Marks	80
Programme	BEI	Pass Marks	32
Year / Part	II / I	Time	3 hrs.

Subject: - Probability and Statistics *(SH 505)*

✓ Candidates are required to give their answers in their own words as far as practicable. 290
✓ Attempt __All__ questions.
✓ The figures in the margin indicate __Full Marks__.
✓ __Necessary figures are attached herewith.__
✓ Assume suitable data if necessary.

1. The distribution of daily average wind speed in km/hr on an island over a period of 152 days is displayed on this box-whisker diagram.
a) Write down the median wind speed.

b) Write down the minimum wind speed.

c) Find the interquartile range.

d) Write normality (symmetricity) about the distribution comparing its median with quartiles.

e) Write down the number of days the wind speed was between 20km/h and 51 km/h.

f) Write down the number of days the wind speed was between 9 km/h and 68 km/h. [6]

2. Define mutually exclusive and independent events. An insurance company insured 2000 Civil engineers, 4000 Electrical engineers and 6000 Mechanical engineers. The probability of an accident involving Civil engineer, Electrical engineer and Mechanical engineer during their jobs is 0.01, 0.03 and 0.15 respectively. One of the insured engineers meets with an accident. What is the probability that he is civil Engineer? [6]

3. Under which condition we use hyper geometric distribution. Define this distribution and write basic properties. [5]

4. Define negative binomial probability distribution. From past experience it is known that a popular footballer Messi has probability to score a goal in each matches is 80. He continue to play the matches until he score 5 goals. What is the probability that he gets them at most 7 matches? [5]

5. Show that the following is a cumulative distribution function. Also find its mean and variance. [5]

$$F(x) = \begin{cases} 0 & \text{for} < -a \\ \dfrac{1}{2a}(x+1) & \text{for} -a \le x \le a \\ 0 & \text{for } x > a \end{cases}$$

6. Time taken by an automatic packaging machine to complete a certain task follows Normal Distribution. From the past record 17% of time machine complete task in less than 35 minutes. Similarly 89% of the time machine takes more than 28 minutes. Find the mean and the standard deviation of diameter of rods. [5]

7. A population consists of five numbers 4,5,6,7 and 8. If a random sample of size 3 is drawn without replacement.

   a) Find the population proportion of even number.

   b) List the all possible sample and find their sample proportion of even number.

   c) Show the sample proportion is unbiased estimator of population proportion.

   d) Find the standard error of sample proportion of even number. [5]

8. Define Central Limit theorem. It is found that the entrance score of large number of students follows Normal distribution with mean of 72 and standard deviation of 12. If a researcher choose 35 random sample, find the probability that the average of this sample. [5]

   (i) More than 77

   (ii) Between 69 to 75

   (iii) Less than 70

9. Write the systematic steps of testing a hypothesis concerning difference of two means when population standard deviations of two population are known. [5]

10. Two sets of ten students are selected at random from a college. One set was given memory test without training and other set was given the same test after two weeks of training. The scores obtained are given below: [5]

Students	1	2	3	4	5	6	7	8	9	10
Set A	10	8	7	9	8	10	9	6	7	8
Set B	12	8	8	10	8	11	9	8	9	9

   Use 5% level of significance whether the training is significantly differ from Set A and Set B.

11. 300 employees of a company were selected at random and asked whether they were in favor of a scheme to introduce flexible working hours. The following table shows the opinion and the departments of the employees.

	Opinion		
Department	In favor	Uncertain	Against
Production	89	42	9
Sales	53	36	11
Administration	38	12	10

   Test whether there is evidence of a significant association between opinion and department at 5% significance level. [5]

12. Write the systematic procedure of testing a hypothesis concerning single proportion for large population. [5]

13. Ten still wires of diameter 0.5 mm and length 2.5 m were extended in a laboratory by applying vertical forces of varying magnitudes. Results are as follows:

Force in kg	15	19	25	35	42	48	53	56	62	65
Increase in length (mm)	1.7	2.1	2.5	3.4	3.9	4.9	5.4	5.7	6.6	7.2

a) Estimate the parameters of a simple line regression model with forces as explanatory variable.

b) Find 95% confidence limit for the slope of the line.

14. Write the properties of regression coefficient and describe under what condition there exist only one regression line. [5]

15. The final marks in mathematics of 48 students in a class of IOE are given in the following table; [5]

68	84	75	82	68	90	62	88	76	93
73	79	88	73	60	93	71	59	85	75
61	65	75	87	74	62	95	78	63	72
66	78	82	75	94	77	69	74	68	60
80	69	92	85	71	95	90	88		

Use scientific calculator and show key operations to find;

Mean, Median, quartiles, mode, sample standard deviation, population standard deviation and coefficient of variations. [8]

***

Subject: - Probability and Statistics *(SH 505)*

- ✓ Candidates are required to give their answers in their own words as far as practicable.
- ✓ Attempt *All* questions.
- ✓ The figures in the margin indicate *Full Marks.*
- ✓ *Necessary tables are attached herewith.*
- ✓ Assume suitable data if necessary.

1. Meat products are regularly monitored for freshness. A trained inspector in Kathmandu Metropolitan selects a sample of the product and assigns an offensive smell score between 1 and 7 where 1 is very fresh. The resulting offensive smell scores for each of 16 samples are

   3.2, 3.9, 1.7, 5.0, 1.9, 2.6, 2.4, 5.3, 1.0, 2.7, 3.8, 5.2, 1.0, 6.3, 3.3, 4.3

   Construct a box-plot, interpret the result and comment on the shape of the distribution. [6]

2. Define Baye's Theorem for conditional Probability. A box containing 5000 IC chips, of which 1000 are manufactured by company A and the rest by company B. Ten percentage of chips made by company A and five percentage of chips by company B are defective. If we select a chip at a random
   a) What is the probability that the chip chosen is defective?
   b) If a randomly chosen chip is found to be defective, what is the probability that is comes from company A. [6]

3. Define random variable. Differentiate between discrete random variables and continues random variables with suitable example. [5]

4. Compare Binomial and Negative Binomial distribution including similarity and difference with suitable examples. [5]

5. If X is a continuous random variable with probability density function $f(x) = x/8$ or $3 < x < 5$.
   a) Find the probability for $P(1 < x < 2.5)$
   b) Determine the mean and standard deviation for x. [5]

6. If height of the doors in traditional house in a cultural city follow normal distribution, 73% of the doors has height above 58 inches and 18% of the doors has height over 63 inches. Find the mean and the standard deviation of the height of the doors. [5]

7. Discuss the following terms in statistics population, sample, parameter and statistic with suitable example. [5]

8. From the population of size 5 as: 22, 23, 24, 25 and 26.
   a) List out all the samples of size three without replacement.
   b) Find the sample mean of each samples.
   c) Prove that, sample mean is unbiased mean of population mean.
   d) Also find the standard error of sample mean. [5]

9. Explain clearly the major steps to be adopted by researchers in testing of hypothesis of single mean for small sample. [5]

10. A social worker believes that fewer than 25% of the married couples in a certain area of Nepal ever used any form of birth control. A random sample of 120 couples was contacted 25 of them said they had used same method of birth control. Test and comment the social worker's belief at $\alpha = 5\%$. [5]

11. A company manufacturing company has three types of computers. The cost (in thousand rupees) for each type of computer is given in the following table. Using ANOVA, test whether the average cost per computer is considerably different across three types of computer at 5% level of significance?

[5]

Type C_1	Type C_1	Type C_1
83	56	79
83	76	95
76	72	87

12. To determine whether there is really relationship between an employee's performance in the training program and his ultimate success in the job, it takes a sample of 400 cases from its very extensive files and obtains the result shown in the following table: [χ^2-value is 9.488]

Success in job	Performance in training program		
	Below average	Average	Above average
Poor	23	60	29
Average	28	79	60
Very good	9	49	63

Use the 0.05 level of significance to test whether performance in training program and success in the job are independent.

[5]

13. Define partial correlation with examples. A sample of 10 values of three variables X_1, X_2 and X_3 were obtained as

$\sum X_1 = 10$	$\sum X_2 = 10$	$\sum X_3 = 10$
$\sum X_1^2 = 20$	$\sum X_2^2 = 68$	$\sum X_3^2 = 170$
$\sum X_1 X_2 = 10$	$\sum X_2 X_3 = 64$	$\sum X_1 X_3 = 15$

Find Partial correlation coefficient between X_2 and X_3 eliminating the effect of X_1.

[5]

14. The grams of solids removed from a material (y) is thought to be related to the drying time (x). Ten observations obtained from an experimental study follow:

[5]

y	4.3	1.5	1.8	4.9	4.2	4.8	5.8	6.2	7.0	7.9
x	2.5	3.0	3.5	4.0	4.5	5.0	5.5	6.0	6.5	7.0

a) Construct the scatter plot.
b) Calculate correlation coefficient.
c) Draw your construction on relation of solid removal and drying time.

15. Temporary or permanent hearing loss from occupational noise exposure is one of the most common of all industrial diseases. Generally, 85-90 dB over an eight-hour workday is the allowable level of noise, although it is better to reduce noise even further, whenever possible. A sample of 50 individuals working at a perticular industry was selected and the noise level (dB) experienced by each individual was determined, yielding the following data:

55.3, 55.3, 55.3, 55.9, 55.9, 55.9, 55.9, 56.1, 56.1, 56.1, 56.1, 56.1, 56.1, 56.8, 56.8, 57.0, 57.0, 57.0, 57.8, 57.8, 57.8, 57.9, 57.9, 57.9, 58.8, 58.8, 58.8, 59.8, 59.8, 59.8, 62.2, 62.2, 63.8, 63.8, 63.8, 63.9, 63.9, 63.9, 64.7, 64.7, 64.7, 65.1, 65.1, 65.1, 65.3, 65.3, 65.3, 65.3, 67.4, 67.4

a) Find mean, standard deviation of the noise level at the industry and interpret the results.
b) Construct 95% confidence interval on true mean noise level at the industry.
c) Interpret your findings.

Exam.		Back	
Level	BE	Full Marks	80
Programme	BEI	Pass Marks	32
Year / Part	II / I	Time	3 hrs.

Subject: - Probability and Statistics (*SH 505*)

✓ Candidates are required to give their answers in their own words as far as practicable.
✓ Attempt *All* questions.
✓ The figures in the margin indicate *Full Marks*.
✓ *Necessary figures are attached herewith.*
✓ Assume suitable data if necessary.

1. Following table provide the information regarding the number of customers registered in two cyber cafe for 10 randomly selected days. [6]

   a) Find the average number for customers registered in two cafes.

   b) Which cyber cafe's registration is more consistent and why

Cafe A	210	221	234	312	199	345	309	289	333	279
Cafe B	321	154	234	275	356	304	311	267	281	199

2. Define conditional probability. A factory production line is manufacturing bolts using three machines, A B and C. Of the total output, machine A is responsible for 25%, machine B for 35% and machine C for the rest. It is known from previous experience with the machines that 5% of the output from machine A is defective, 4% from machine B and 2% from machine C. A bolt is chosen at random from the production line and found to be defective. What is the probability that it came from (i) machine A (ii) machine B (iii) machine C? [6]

3. Under which condition binomial distribution tends to Poisson distribution? If 2% of electric bulbs manufactured by a certain company are defective. Find the probability that in a sample of 200 bulbs (i) less than 2 bulbs (ii) more than 3 bulbs are defective. [5]

4. Why negative binomial distribution is known as converse of binomial distribution? In which conditions negative binomial distribution is suitable to use? Write the dissimilarities between binomial and negative binomial distributions. [5]

5. A random variable X has the probability density function f(x) as

$$f(x) = \begin{cases} kx\ e^{-\frac{x^2}{7}}, & x \geq 0 \\ 0, & \text{otherwise,} \end{cases}$$

   a) Find the value of k if f(x) prove that given function is probability density function.

   b) Find the mean and variance of random variable X [5]

6. Define Gamma probability distribution. Under what conditions it is used? Write its characteristics. [5]

7. Define central limit theorem. Write its applications. An unknown distribution has a mean of 90 and a standard deviation of 15. Samples of size n = 64 are drawn randomly from the population. Find the probability that the sample mean is between 85 and 92. [5]

8. Define sampling distribution. Prove that sampling distribution of sample mean is unbiased estimator of the population mean. Also obtain the expression for standard error of sample mean when the population is infinitely large.   [5]

9. The following are the Brinell hardness value obtained for 10 samples of magnesium alloy-I and 12 sample of Magnesium alloy- II Use the 1% level of significance to test the hypothesis that mean hardness in the population are same or not?   [5]

Alloy I	66.3	63.5	64.9	61.8	64.3	64.7	65.1	64.5	68.4	63.2	-	-
Alloy II	71.3	60.4	62.6	63.9	68.8	70.1	64.8	68.9	65.8	66.2	67.2	69.4

10. Define Hypothesis and write down the steps involve in the test of significance of Paired test.   [5]

11. 300 employees of a company were selected at random and asked whether they were in favor of a scheme to introduce flexible working hours. The following table shown the opinion and the departments of the employees.   [5]

Department	OPINION		
	In favor	Uncertain	Against
Production	89	42	9
Sales	53	36	11
Administration	38	12	10

Test whether there is evidence of a significant association between opinion and department at 5% significance level.

12. The sponsor of a television 'special' expected that at least 40 percent of the viewing audience would watch the show in a particular metropolitan area. For a random sample of 100 households with television sets turned on 30 are viewing the 'special'. Can the sponsor's assumption that at least 40 percent of the households would watch the program be rejected at the (i) 10 percent and (ii) 5 percent level of significance?   [5]

13. A sample of 10 values of three variables X_1, X_2 and X_3 were obtained as;

$\sum X_1 = 10$	$\sum X_2 = 20$	$\sum X_3 = 30$
$\sum X_1^2 = 20$	$\sum X_2^2 = 68$	$\sum X_3^2 = 170$
$\sum X_1 X_2 = 10$	$\sum X_1 X_3 = 15$	$\sum X_2 X_3 = 64$

Find
a) Partial correction between X_1 and X_2 eliminating the effect of X_3.
b) Multiple correlation coefficients between X_1, X_2 and X_3 assuming X_1 as dependent.

14. Distinguish between correlation coefficient and regression coefficient and write its importance in the field of engineering.   [5]

15. From the following 33 pairs of bivariate observation (X,Y).   [8]

X	63	80	63	47	85	50	63	53	70	76	54
	64	67	52	75	85	60	88	71	54	47	56
	85	47	70	53	74	79	85	82	68	52	75
Y	86	65	54	89	83	49	80	59	54	51	59
	85	54	65	50	67	71	56	79	71	49	65
	67	83	45	80	81	60	49	48	75	79	76

a) Find the sample mean, sample standard deviation and sample variance of each groups
b) Test the uniformity of each data.
c) Estimate the value of Y when the value of X is given as 92.

2078 Kartik

Exam.		Back	
Level	BE	Full Marks	80
Programme	BEI	Pass Marks	32
Year / Part	II / I	Time	3 hrs.

Subject: - Probability and Statistics *(SH 505)*

✓ Candidates are required to give their answers in their own words as far as practicable.
✓ Attempt *All* questions.
✓ The figures in the margin indicate *Full Marks*.
✓ *Necessary tables are attached herewith.*
✓ Assume suitable data if necessary.

1. Nepal Telecom introduced the latest telecommunication technology, 4G/LTE (Long Term Evolution) to its GSM mobile subscribers for the first time in Nepal (in 2078 BS) and then found the following information about the subscribers in the month of Baishakh, 2078, at a particular place of Kathmandu Valley.

Age	20 - 30	30 - 40	40 - 50	50 - 60	60 - 70	70 - 80
No. of subscribers	40	50	35	25	12	10

   List the five-number summary and prepare a box-and-whisker plot from this information. Also, comment on the nature of frequency distribution. [6]

2. State Bayes' Theorem for conditional probability. An assembly plant receives its voltage regulators from these three different suppliers, 60% from supplier B_1, 30% from supplier B_2 and 10% from supplier B_3. It is also known that 95% of the voltage regulators from B_1, 80% of these from B_2 and 65% of these from B_3 perform according to specifications.
   a) What is the probability that any one voltage received by the plant will perform according to specifications?
   b) What is the probability that a voltage regulator that perform according to specifications came from supplier B_1. [6]

3. Write the differences and similarities between Binomial and Negative Binomial Distribution. [2+3]

4. A quality control engineer inspects a random sample of 4 batteries from each lot of 24 car batteries that is ready to shipment. If such a lot contain six batteries with slight defects. What are the probabilities that the inspector's sample will contain
   a) None of the batteries with defect?
   b) At least two of the batteries with defects?
   c) At most three of the batteries with defects? [5]

5. The distribution function for a random variable X is
   $F(x) = 1 - e^{-2x}$ for $x \geq 0$

   $= 0$ for $x < 0$

   a) Find $P(X > 2)$
   b) Find mean and variance of the variable X. [5]

6. Define Standard Normal Distribution. Write the area properties of normal distribution. [5]

7. Define standard error of sample mean. A population consists of the four numbers 12, 19, 13, 16.
   a) Write down all possible sample size of two without replacement.
   b) Find standard error of the sample mean. [5]

8. State Central Limit Theorem. The lifetime of a certain brand of an electric bulb may be considered a random variable with mean 1200 hours and standard deviation 250 hours. Find the probability that average lifetime of 60 bulbs.
   a) exceed 1400 hours
   b) is between 1100 hours and 1300 hours
   c) is less than 1100 hours [5]

9. Write properties of correlation coefficients. The zero order correlation coefficient for general intelligence test (X_1), online class test (X_2) and age (X_3) of students of a university in Nepal during COVID period are given as $r_{12} = 0.93$, $r_{13} = 0.50$ and $r_{23}=0.34$. Assuming the first variable X1 as dependent, compute the coefficient of multiple determination and interpret the result. [5]

10. The following table gives age and percentage of blindness in respective age interval.

Age (yrs)	0-10	10-20	20-30	30-40	40-50	50-60	60-70	70-80
% of blindness	70	63	21	26	45	31	46	80

a) Find the least squares line for predicting % of blindness from age.
b) Using the least-squares line, predict the actual % blindness if the age is 70 yrs. [5]

11. The sample average unrestrained compressive strength for 45 specimens of particular type of bricks was computed to be 3107 psi and sample standard deviation was 188 psi. The distribution of unrestrained compressive strength may be somewhat sewed. Does the data strongly indicate that the true average unrestrained compressive strength is less than design value of 3200? Test using 5% level of significance. [5]

12. Four trained operators work production of a new product. The productivity of the operators are recorded as below:

Operators	Production		
1	10	12	14
2	12	11	13
3	14	15	12
4	16	10	17

Using ANOVA, test whether the difference in average productivity due to the difference in operators are significant. Use $\alpha = 5\%$. [5]

13. Patients in a hospital are classified as surgical or medical. A record is kept of the number of times patients require nursing service during the night and whether or not these patients are on Medicare. The data are presented here:

Medicare	Patient Category	
	Surgical	Medical
Yes	620	380
No	550	450

Test the hypothesis (using $\alpha = 0.01$) that calls by surgical-medical patients are independent of whether the patients are receiving Medicare. [5]

14. What are the errors of test of hypothesis? Write the procedure of testing hypothesis of two population proportion. [5]

15. The entrance score of three engineering institutes are as follows: [8]

Institutes	Entrance scores								
A	740	800	830	840	860	890	830	930	1070
B	655	775	825	978	989	1025	950	980	1100
C	850	825	749	870	565	978	925	950	1000

a) Calculate mean and standard deviation for institute A, B and C.
b) Which institute is good?
c) Which institute is consistent?

Exam.		Regular	
Level	BE	Full Marks	80
Programme	BEI	Pass Marks	32
Year / Part	II / I	Time	3 hrs.

Subject: - Probability and Statistics *(SH 505)*

✓ Candidates are required to give their answers in their own words as far as practicable.
✓ Attempt __All__ questions.
✓ The figures in the margin indicate __Full Marks__.
✓ __Necessary taes are attached herewith.__
✓ Assume suitable data if necessary.

1. Describe the various measures of central tendency. The following table represents the marks of 100 students. [6]

Marks	0-20	20-40	40-60	60-80	80-100
No. of Students	14	18	27	26	15

Find the mean, median and standard deviation of all 100 students.

2. State the law of addition of probability. If there are three candidates for the position of principal X, Y, Z whose chances of getting the appointments are in ratio 4/9, 2/9, 3/9. The probability that X if selected would introduce co-education in the college is 0.3. The probability of Y and Z doing the same are respectively 0.5 and 0.8. What is the probability that there was co-education in the college? [2+4]

3. Define Binomial distribution. Under what condition Binomial distribution can be approximate by Pisson distribution? [5]

4. A hospital administrator, who has been studying daily emergency admissions over a period of several years, has concluded that they are distributed according to the Poisson Law. Hospital records reveal that emergency admissions have averaged three per day during this period. If the administrator is correct in assuming a Poisson distribution, find the probability that [5]

   a) Exactly two emergency admissions will occur in a given day.
   b) No emergency admissions will occur in a given day.
   c) Either three or four emergency cases will be admitted on a particular day.

5. Describe the conditions for the probability density function. The length of time (in minutes) that a certain lady speaks on the telephone is found to be random phenomenon, with a probability function specified by the probability density function f(x) as

$$f(x) = \begin{cases} Ae^{-x/5} & \text{for } x \geq 0 \\ 0 & \text{elsewhere} \end{cases}$$

Find the value of A. what is the probability that the number of minutes that she will take over the phone is [5]

   a) more than 10 minutes;   b) less than 5 minutes and
   c) between 5 and 10 minutes.

6. The breakdown voltage X of a randomly chosen diode of aparticular type is known to be normally distributed with mean 40 volts and variance 2.25 volts. What is the probability that the breakdown voltage will be

   a) between 39 and 42 volts
   b) less than 44 volts
   c) more than 43 volts [5]

OR

The daily consumption of electric power in a certain city follow a gamma distribution with $\alpha = 2$ and $\beta = 3$. If the power plant of this city has daily capacity of 12 million kilowatt hours, what is the probability that this power supply will be inadequate on any given day?

7. Define parameter, statistic and sampling with suitable examples. Define standard error of mean. [5]

8. Define Central Limit Theorem. If the mean and standard deviation of serum iron values for healthy men are 120 and 15 micrograms per 100 ml, respectively, what is the probability that are random sample 50 normal men will yield a mean between 115 and 125 micrograms per 100 ml? [5]

9. The following data gives the experience of machine operators in years and their performance as given by the number of good parts turned out per 100 pieces.

Experience (X)	16	12	18	4	3	10	5	12
Performance (Y)	87	88	89	68	78	80	75	83

a) Fit the regression equation of performance rating on experience and estimate the probable performance of an operator had 8 years experience.

b) Determine coefficient of determination and interpret it. [5]

10. What are two regression coefficients and what do they represent? Write the properties of regression coefficients. [5]

11. Explain clearly the major steps to be adopted by researchers in testing hypothesis. [5]

12. Four brands of flashlights batteries are to be compared by testing each brand in five flashlights. Twenty flashlights are randomly selected and divided randomly into four groups of five flashlights each. Then each group of flashlights uses a different brand of battery. The lifetimes of the batteries, to the nearest hour, are as follows.

Brand A	42	30	39	28	29
Brand B	28	36	31	32	27
Brand C	24	36	28	28	33
Brand D	20	32	38	28	25

At the 5% significance level, does there appear to be a difference in mean lifetime among the four brands of batteries? [5]

13. From the following data can you conclude that there is association between the purchase of brand and geographical region? [5]

	Region		
	Central	Eastern	Western
Purchase brand	40	55	45
Do not purchase brand	60	45	55

Use 5% level of significance.

14. Transceivers provide wireless communication among electronic components of consumer products. Responding to a need for a fast, low-cost test of Bluetooth-capable transceivers, engineer developed a product test at the wafer level. In one set of trails with 60 devices selected from different wafer lots, 48 devices passed. Test the null hypothesis $p = 0.70$ against the alternative hypothesis $p > 0.70$ at 5% level of significance. [5]

15. The following table shows the number of hours 45 hospital patients slept following the administration of a certain anesthetic.

[8]

7	10	12	4	8	7	3	8	5
12	11	3	8	1	1	13	10	4
4	5	5	8	7	7	3	2	3
8	13	1	7	17	3	4	5	5
3	1	17	10	4	7	7	11	8

a) Find sample mean, sample variance and sample standard deviation.
b) Compute a value that measures the amount of variability relative to the value of mean.

Exam.		Regular	
Level	BE	Full Marks	80
Programme	BEI	Pass Marks	32
Year / Part	II / I	Time	3 hrs.

Subject: - Probability and Statistics *(SH 505)*

✓ Candidates are required to give their answers in their own words as far as practicable.
✓ Attempt **All** questions.
✓ The figures in the margin indicate **Full Marks**.
✓ **Necessary tables are attached herewith.**
✓ Assume suitable data if necessary.

1. Following is the age distribution of 1000 persons working in a factory. [6]

Age Group	15-20	20-25	25-30	30-35	35-40	40-45	45-50	50-55	55-60
No. of person	60	122	135	242	148	107	85	63	38

   Due to heavy loss, the management decides to bring down the strength to 50 percent of the present number according to following scheme:

   (i) to retrench the first 8% from the lower group
   (ii) to absorb the next 32% in other branches.
   (iii)to make 10% from highest age group retire premature.

   What will be the age limits of the persons retained in the mill and of those transferred to other branches?

2. a) Define the terms: (i) Mutually exclusive events (ii) Independent events. [2]

   b) Customers are used to evaluate preliminary product designs. In the past, 95% of highly successful products received good reviews, 60% of moderately successful products received good reviews, and 10% of poor products received good reviews. In addition, 40% of products have been highly successful, 35% have been moderately successful, and 25% have been poor products.

   (i) What is the probability that a product attains a good review?
   (ii) If a new design attains a good review, what is the probability that it will be a highly successful product? [4]

3. Define Hypergeometric Distribution. How does it differ from Binomial Distribution? Write the approximation condition for approaching Hypergeometric to Binomial Distribution. [5]

4. Three people toss a coin and odd man pays for the coffee. If the coins all turns up the same, they toss gain. Find the probability that fewer than 4 tosses are needed. [5]

5. Let the continuous random variable X denote the diameter of a hole drilled in a sheet metal component. The target diameter is 12.5 millimeters. Most random disturbances to the process result in larger diameters. Historical data show that the distribution of X can be modeled by a probability density function $f(x) = 20e^{-20(x-12.5)}$, $x \geq 12.5$. If a part with a diameter larger than 12.60 millimeters is scrapped,

   a) What proportion of parts is scrapped?
   b) What proportion of parts is between 12.5 and 12.6 millimeters? [5]

6. Under what conditions, the Poisson distribution can be approximated using Normal distribution. Of a large group of men, 5% are under 60 inches in height and 40% are between 60 and 65 inches. Assuming a normal distribution, find the mean height and standard deviation. [5]

7. Define the terms: [5]

   a) Parameter, statistic
   b) Sample
   c) Sampling distribution of mean
   d) Standard error of mean?

8. An auditor for a large credit card company, knows that on average, the monthly balance of any given customer is 112 and the standard deviation is 56. If the audits 50 randomly selected accounts, what is the probability that the sample average monthly balance is (a) below 100 (b) between 100 and 130? [5]

9. Define the correlation coefficients and state its important properties. [5]

10. An investigation of the relationship between traffic flow x (1000's of cars per 24 hours) and lead content y of bark on trees near the highway (μg/g dry wt.) yielded the following data: [5]

Xi	8.3	8.3	12.1	12.1	17.0	17.0	17.0	24.3	24.3	24.3	33.6
Yi	227	312	362	521	640	539	728	945	738	759	1263

   a) Find the estimated regression line to estimate lead content from traffic flow.
   b) Compute a 95% confidence interval for the slope of the true regression line.

11. It is claimed that an automobile is driven on the average is 12000 miles per year. To test this claim a random sample of 100 automobile owners are asked to keep a record of the miles they travel. Would you agree that average miles driven is greater than claimed value if the random showed an average of 14,500 miles and a standard deviation of 8,000 miles? Use a 0.01 level of significance. [5]

Or,

I is claimed that a new diet will reduce a person's weight by 10 pounds on the average in a period of 2 weeks. The weights of seven women who followed this diet were recorded before and after a 2 week period.

Woman	1	2	3	4	5	6	7
Weight Before	129	133	136	152	141	138	125
Weight After	130	121	128	137	129	132	120

Test the manufacturer's claim at 5% level of significance.

12. A study compared the number of hours of relief provided by five different brands of antacid administered to 25 different people, each with stomach acid considered strong. The results are given below. [5]

Brand				
A	B	C	D	E
4.6	5.2	5.9	2.7	4.3
4.5	4.9	4.9	2.9	3.8
4.1	4.7	4.6	3.9	5.2
3.8	4.6	4.3	4.3	4.4

Calculate the F ratio. At the 0.05 level of significance, do the brands produce significantly different amounts of relief to people with strong stomach acid?

13. A random sample of 200 married men, all retired, were classified according to education and number of children. [5]

Education	Number of children		
	0-1	2-3	over 3
Elementary	14	37	32
Secondary	19	42	17
College	12	17	10

Test the hypothesis at 0.05 level of significance, that the size of the family is independent of the level of education attained by the father.

14. A random sample of 100 men and 100 women at a college is asked if they have an automobile on campus. If 31 of the mean and 24 of the women have cars, can we conclude that more men than women have cars on the campus? Use a 0.01 level significance. [5]

15. The following are the annual maximum flows in m^3/s in a river for 52-year period: [8]

1980	3120	2120	1700	2550
1700	1570	2830	2120	2410
1420	1980	2690	3260	1840
1980	4960	2120	2550	4250
2690	2270	5660	5950	3400
8500	3260	3960	2270	2410
2550	1980	2120	2410	3170
2410	1840	3120	3290	4550
1980	4670	1700	2410	3310
3120	2070	1470	2410	1130
3230	3090			

a) Find descriptive statistics: maximum, minimum, sample mean, range, sample standard deviation, standard error of mean.

b) Find approximate a 95% confidence interval for true average of rate of maximum flow.

***

Exam.	Regular		
Level	BE	Full Marks	80
Programme	BEL, BEX, BCT, BAG	Pass Marks	32
Year / Part	III / I	Time	3 hrs.

Subject: - Probability and Statistics (SH602)

✓ Candidates are required to give their answers in their own words as far as practicable.
✓ Attempt All questions.
✓ The figures in the margin indicate Full Marks.
✓ Necessary tables are attached herewith.
✓ Assume suitable data if necessary.

1. A professor of statistics, in his class with 20 students, had conducted a survey about time spent by students on social media, during college hours, and found average time of 20 minutes and standard deviation of 5 minutes. In subsequent verification, it was found that observation 30 was entered as 13. Then find corrected mean and standard deviation of time spent by the students on social media during college hours. [6]

2. Define mutually exclusive and independent events. An insurance company insured 2000 Civil engineers, 4000 Electrical engineers and 6000 Mechanical engineers. The probability of an accident involving Civil engineer, Electrical engineer and Mechanical engineer during their jobs is 0.01, 0.03 and 0.15 respectively. One of the insured engineers meets with an accident. What is the probability that he is civil Engineer? [6]

3. What are the characteristics of Binomial Distribution and how does it differ from Hypergeometric Distribution? [5]

4. If the probability that an individual suffers a bad reaction from a certain injection is 0.001, determine the probability that out of 2000 individuals

   a) Exactly 3, individuals will suffer bad reaction
   b) More than 2, individuals will suffer bad reaction [5]

5. If inner diameter of a rod follow Normal Distribution. If 7% of the rod has inner diameter less than 35 mm and 89% of rod has inner diameter fewer than 63 mm. Find the mean and the standard deviation of diameter of rods. [5]

6. Find the mean and variance of the probability density function given by

$$f(x) = \begin{cases} 12x^2(1-x); & 0 \le x \le 1 \\ 0 \; ; & \text{otherwise} \end{cases}$$

[5]

7. Define Standard error and explain its importance in inferential statistics and write down the formula of standard error of sample mean and sample proportion. [5]

8. A population consists of live numbers 4, 8, 12, 16 and 20. If a random sample of size 2 is drawn without replacement. [5]

   a) Find the population mean and population standard deviation.
   b) List the all possible sample and find their sample mean.
   c) Show the mean of sample mean is equal to the population mean.
   d) Find the standard error of sample mean.

9. Write the process of test of significance of difference of two means for large samples. [5]

10. The sales figure of an item in six shops before and after and advertisement is given as:

Before	53	28	31	48	50	52
After	58	29	30	55	56	45

Test whether the advertisement was effective at 5% level of significance?
(t-value for 5 degree of freedom = 2.571) [5]

11. Dyson Company in Berlin plans to produce a new hair product known as Dyson Supersonic. The suppliers for the company are company A and Company B found that 1% and 2% defective of 200 and 300 items respectively. Arrange appropriate hypothesis testing to investigate whether Company B is better by using a 0.05 level of significance. [5]

12. In a recent survey 1650 Engineers were classified according to their intelligence (GPA in Bachelor) and economic conditions after graduation. Test whether there is any association between intelligence and economic condition. [χ^2 value for 9 degree of freedom=16.919] [5]

Economic Condition after graduation	Intelligence in BE			
	Excellent	Good	Mediocre	Dull
Good	48	199	181	82
Average	80	73	65	89
Below average	86	51	51	84
Not good	81	185	190	105

13. What are the two regression coefficients and what do they present? Write the properties of regression coefficients. [5]

14. Listed below are circumference (in feet) and height (in feet) of trees in Marshall. Minnesota (base on data from "Tree Measurement" by Stenley Rice, American Biology Teacher Vol 61. No 9) [5]

X(circ)	1.8	1.9	1.8	2.4	5.1	3.1	5.5	5.1	8.3
Y (ht)	21.0	33.5	24.6	40.7	73.2	24.4	40.4	45.3	53.5

a) Is there a correlation exist?
b) Explain this correlation.

15. The scores of randomly selected 32 students of two groups on Probability and Statistics are;

Group ' A'				Group 'B'			
50	37	13	37	56	74	50	43
45	9	11	34	39	24	55	35
24	6	13	24	72	32	45	59
32	32	24	40	47	36	34	32
33	45	37	38	40	53	55	18
33	32	46	32	32	42	49	32
46	21	32	4	41	33	14	60
45	16	43	32	60	34	38	48

a) Which group is best?
b) Which group is more consistent?
c) Find standard error of difference of their means. [3+3+2]

Exam.		Back	
Level	BE	Full Marks	80
Programme	BEL, BEX, BCT, BAG	Pass Marks	32
Year / Part	III / I	Time	3 hrs.

Subject: - Probability and Statistics (SH 602)

✓ Candidates are required to give their answers in their own words as far as practicable.
✓ Attempt All questions.
✓ The figures in the margin indicate Full Marks.
✓ Necessary tables are attached herewith.
✓ Assume suitable data if necessary.

1. Describe the strong and weak points of various measures of Central tendency. From the following frequency distribution find the range of income of middle 70% of the employees and the median income. Also find mean deviation from mean. [6]

Income in Rs.	500-600	600-700	700-800	800-900	900-1000
No. of employees	150	300	500	200	50

2. Distinguish between absolute and relative measures of dispersion. The running capacity of two horses is given below, state which is more consistent and why? [5]

Horse A	250	255	280	290	295	300
Horse B	280	282	290	295	298	295

3. If we the following probability density function. [5]

$$f(x) = \begin{cases} k(5+2x), & 2 \le x \le 4 \\ 0, & \text{otherwise} \end{cases}$$

Find the value of K and mean and variance of random variable X.

4. A random variable X has following probability function. [6]

X	-2	-1	0	1	2	3
P(X)	K	0.1	0.2	2k	3k	0.1

i) Find the value of K.
ii) Find Mean and Variance.

5. During one stage in the manufacture of integrated circuit chips, a coating must be applied. If 70% of chips receive a thick enough coating, find the probability that among 15 chips (i) at least 12 will have thick enough coatings; (ii) at most 3 will have thick enough coatings; (iii) exactly 10 will have thick enough coatings. [5]

6. In a normal distribution 31% of the items are under 45 and 8% are over 64. Find the mean and standard deviation of distribution. (Given, $Z_{0.42}=1.4$, $Z_{0.19}=0.5$) [5]

7. Describe the advantages of sample surveys over complete enumeration? [6]

Nepal Electricity Authority wishes to estimate the average electric bills for the month of October for single family homes in Kathmandu. Based on similar studies in other cities the standard deviation is assumed to be Rs. 150. The NEA wants to estimate the average bill for October such that error will not deviate by Rs. 15 with 90% confidence. What sample size is needed?

8. What are the assumptions for the t-test? Describe the procedure of test of significance between two means for small sample. [5]

9. A research company has designed three different systems to clean up oil spills. The following table contains the results, measured by how much surface area in square meters is cleared in one hour. The data were found by testing each method in several trials. Are the three systems equally effective? Use the 0.05 level of significance. [5]

System A	55	60	63	56	59	55
System B	57	53	64	49	62	-
System C	66	52	61	57	-	-

10. Test of the fidelity and selectivity of 190 digital radio receivers produced the results shown in the following table.

		Fidelity		
		Low	Average	High
Selectivity	Low	6	12	32
	Average	33	61	18
	High	13	15	0

Use $\alpha=0.05$ and $x^2 = 5.991$ to test whether there is relationship between fidelity and selectivity. [6]

11. Define Hypothesis, and write down the steps involve in the test of significance of difference of proportion. [5]

12. In 1990, 5.8% job applicants who were tested for drugs failed the test. At the 0.05 significant level, the test claim that the failure rate is now lower if a simple random sample of 1520 current job applicants results in 58 failure. Does the result suggest that fewer job applicants now use drugs? [5]

13. Fit the regression line of yield of crop ('000 tones) on amount of rainfall (mm) and amount of fertilizers used (kg). Also estimate the yield of crop for the year in which rainfall is 13 mm and fertilizer used is 9 kg. [5]

Yield	4	6	7	9	13	15
Rainfall	3	4	6	8	12	15
Fertilizer	4	10	14	20	24	30

14. The following data gives the experience of machine operators in years and their performance as given by the number of good parts turned out per 100 pieces.

Experience (X)	16	12	18	4	3	10	5	12
Performance (Y)	87	88	89	68	78	80	75	83

a) Fit the regression equation of performance rating on experience and estimate the probable performance of an operator had 8 years experience.

b) Determine coefficient of determination and interpret it. [5]

15. List Five Number summary and prepare the box plot for numbers of guest registered each of 60 randomly selected days. [6]

108	94	188	116	165	181	106	133	176	110
169	134	129	109	85	124	119	165	153	135
105	180	105	91	117	148	83	96	101	123
128	143	136	99	169	133	89	90	174	144
151	168	103	116	106	107	179	113	172	120
179	183	99	94	87	120	154	159	103	139

Exam.	Regular / Back		
Level	BE	Full Marks	80
Programme	BEL, BEX, BCT, BAG	Pass Marks	32
Year / Part	III / I	Time	3 hrs.

Subject: - Probability and Statistics (SH 602)

✓ Candidates are required to give their answers in their own words as far as practicable.
✓ Attempt All questions.
✓ The figures in the margin indicate Full Marks.
✓ Necessary tables are attached herewith.
✓ Assume suitable data if necessary.

1. Write down the significance of statistics in engineering. An experiment shows the height of 51 plants given below. If average heights of all the 51 plants are 40 cm find the missing frequencies corresponding to the height 30 and 50cm. [6]

Height (cm)	10	20	30	40	50	60
No. of plant	2	3	-	21	-	5

2. What do you mean by mutually exclusive, exhaustive and complementary events? Explain with examples. In a particular city, airport A handles 50% of all airlines traffic, airport B handles 30% and airport C handles 20%. The detection rates for weapons at the three airports are 0.9, 0.5 and 0.4 respectively. A passenger is randomly selected at one of the airports. Then (i) what is the probability that he/she carrying a weapon? (ii) If he/she is found to be carrying a weapon, what is the probability that airport A is being used? [5]

3. Define probability density function? A continuous probability distribution of a variable x is defined as $f(x)=KX(1-X)$ for all $0 \le X \le 1$. Compute (i) $P(X \ge 0.4)$ (ii) $P(\frac{1}{4} \le X \le \frac{3}{4})$ [5]

Or,

A fair dice was rolled until one gets a Six; find the expected number of toss required?

4. Define Negative Binomial distribution and explain characteristics. How does it differ from binomial distribution? [6]

5. A typist made 2.6 mistakes per page on average, find the probability that in the page typed by him, i) there is no mistake ii) at least two mistakes iii) at most 3 mistakes. [5]

6. Define Gamma distribution, chief characteristics and write its applications. [5]

Or,

The breakdown voltage X of randomly chosen diode of a particular type is known to be normally distributed with mean 40 and s.d. 1.5 volts. What is the probability that the breakdown voltage will be (a) between 39 and 42 volts; (b) at most 43 volts; (c) at least 39 volts.

7. Define estimation? Write characteristics of a good estimator? A sample of 400 students taking Entrance for BE revealed an average score of 56. Construct a 95% as well as 99% confidence interval for population mean score if standard deviation of score of all students in known to be10. [6]

8. A whole sale dealer wanted to buy a large quantity of light bulbs from two brands label A and B. He bought 100 bulbs from each bulbs brand and found by testing that brand A had mean life time 1120 hours and standard deviation 75 hours and brand B had mean life

time 1062 hours and standard deviation 82 hours. Find the 95% and 99% confidence limits for the difference in the average life of bulbs from the two brands. [5]

9. The following are the breaking strength of three different brands of cables.

Brand	Breaking Strength					
A	40	30	50	60	30	-
B	60	40	55	65	-	-
C	60	50	70	65	75	40

Construct ANOVA table and test for the equality of the average breaking strength of cables at α=5%. [5]

10. In a recent survey 1,072 Engineers were classified according to their intelligence (GPA in Bachelor) and economic conditions after graduation. Test whether there is any association between intelligence and economic condition. [6]

Economic Condition after graduation	Intelligence in BE			
	Excellent	Good	Mediocre	Dull
Good	48	199	181	82
Not good	81	185	190	106

x^2 value for 2 d.f.=5.991

11. What is testing of hypothesis? Explain the procedure followed in testing of Significance difference between two population proportion large sample? [5]

12. A simple random sample of Household with TV set in use. Show that 1024 of them were tuned to 60 minute while 3836 were tuned to some other show. Use 0.05 significant level to test the claim of CBS executive that "60 minute get more than a 20 shave", which mean that more than 20% of set in use are tuned to 60 minute. [5]

13. A sample of 10 values of three variables X1, X2 and X3 were obtained as

ΣX_1=10	ΣX_2=20	ΣX_3=30
ΣX_1^2=20	ΣX_2^2= 68	ΣX_3^2=170
$\Sigma X_1 X_2$=10	$\Sigma X_1 X_3$= 15	$\Sigma X_2 X_3$=64

Find (i) Partial correlation between X_1 and X_2 eliminating the effect of X_3 (ii) Multiple correlation between X_1, X_2 and X_3 assuming X_1 as dependent variable. [5]

14. Differentiate between correlation and regression? From following data find the Karl Pearsons coefficient correlation and interpret the result? [5]

Marks in Statistics	39	65	62	90	82	75	25	98	36	78
Marks in Mathematics	47	53	58	86	62	68	60	91	51	84

15. Following data reveals the sample of 22 pairs of observation (X,Y) drawn from large population.

X	46	61	56	68	58	45	50	59	45	66	57
Y	49	46	43	32	26	27	29	47	37	30	43
X	59	66	62	57	57	45	50	61	55	47	51
Y	32	27	37	24	43	49	48	29	37	32	26

i) Find the sample mean for each variable X and Y.
ii) Which series is more consistent and why?
iii) Find the standard error of the difference of mean.
iv) Find the coefficient of Karl Pearson correlation. [6]

***

Exam.		Back	
Level	BE	Full Marks	80
Programme	BEL, BEX, BCT, B.Agri.	Pass Marks	32
Year / Part	III / I	Time	3 hrs.

Subject: - Probability and Statistics *(SH602)*

✓ Candidates are required to give their answers in their own words as far as practicable.
✓ Attempt __All__ questions.
✓ The figures in the margin indicate __Full Marks__.
✓ __Necessary tables are attached herewith.__
✓ Assume suitable data if necessary.

1. Define measures of central tendency and measures of variance. Following data gives the distribution of marks of 50 students in statistics.

Marks more than	10	20	30	40	50	60	70
No. of students	50	45	35	20	10	4	1

   Compute median marks. Also compute minimum marks obtained by a pass candidate if 60% student pass in the test. [6]

2. A problem in statistics is given to three students A, B and C whose chances of solving are ½, ¾ and ¼ respectively. If all of them try independently, what is the probability that
   a) at least one of them will solve it
   b) none of them can solve it [6]
   c) exactly two of them can solve it

3. Define binomial distribution and explain the condition for Binomial distribution. [2+2]

4. If the probability that an individual suffers a bad reaction from a certain injection is 0.001, among 2000 individual
   a) obtain probability distribution function for suffering bad reaction
   b) determine the probability that
   (i) exactly 3 individuals will suffer bad reaction [6]
   (ii) more than 2, individuals will suffer bad reaction

5. The breakdown voltage x of randomly chosen diode of a particular type is known to be normally distributed with mean 40 and standard deviation 1.5 volts. What is the probability that the breakdown voltage. Will be
   a) Between 39 and 42 Volts
   b) At most 43 Volts [6]
   c) At least 39 Volts

OR

The distribution function for a random variable x is

$$f(x) = 1 - e^{-2x} \text{ for } x \geq 0$$

$$= 0 \text{ for } x < 0$$

a) Find $p(x > 2)$
b) Find mean and variance of the variable x.

6. Define discrete and continuous random variable. Also describe the procedure to compute mean and variance for both variables. [4]

7. Define standard normal distribution. Write down its properties and importance of this distribution. [4]

8. A population consists of four number 2, 8, 14, 20,

   a) Write down all possible sample size of two without replacement.
   b) Verify that the population mean is equal to the mean of the sample mean. [6]

9. What are difference between point estimation and Interval estimation? Also discuss differences between estimation and Hypothesis testing. [3+3]

10. Define critical value. A manufacturer claimed that at least 95% of the water pumps supplied to the ABC Company confirmed to specification. However, the product manager at ABC Company wasn't satisfied with the claim of the manufacturer hence to test the claim, the manager examined a sample of 250 water pumps supplied last month and found that 228 water pumps 45 per the specification. Can you conclude that the production manager is right to doubt on the claim of the manufactures ($\alpha = 0.01$) [6]

11. Three varieties of coal were analyzed by four chemists and the ash-content in the varieties were found as follows:

Varieties	Chemists			
	1	2	3	4
A	8	5	5	7
B	7	6	4	4
C	3	6	5	4

Test whether the varieties differ significantly in their ash-content? Test at 5% level of significance.
[$F_{(2, 9)} = 19.4$, $F_{(3,9)} = 8.81$]. [6]

12. Write the procedure of testing of Hypothesis for single proportion. [4]

13. The following data gives the number of twists required to break a certain kind of forged alloy bar and percentage of alloying element A present in the metal

Number of twists	41	49	69	65	40	50	58	57	31	36
Percentage of elements A	10	12	14	15	13	12	13	14	13	12

   a) Fit the regression equation of number of twists on percentage of element A. Determine the predicted number of twists required break an alloy when percentage of element is 20

   b) Find 99% confidence interval for the regression coefficient. [4]

14. The simple correlation coefficient between fertilizer (x_1) seeds (x_2) and productivity (x_3) are $r_{12} = 0.59$, $r_{13} = 0.46$ are $r_{23} = 0.77$ calculate the partial correlation coefficient $r_{12.3}$ and multiple correlation $R_{1.23}$ [4]

15. The samples of length of life of bulbs from two companies are given below.

Length of life (hours)	Company	
	A	B
500-600	10	3
600-700	21	8
700-800	6	15
800-900	8	12
900-1000	21	4
1000-1100	10	5
1100-1200	2	15
1200-1300	12	13
1300-1400	19	7
1400-1500	9	7
1500-1600	3	4
1600-1700	7	6
1700-1800	5	3
1800-1900	4	2
1900-2000	1	3

a) Calculate mean length of life of bulbs fro company A and company B
b) Calculate sample standard deviation and sample variance for given data
c) Which company is bulbs are more uniform?

***

Exam.		Regular	
Level	BE	Full Marks	80
Programme	BEL, BEX, BCT, B.Agri.	Pass Marks	32
Year / Part	III / I	Time	3 hrs.

Subject: - Probability and Statistics (SH602)

✓ Candidates are required to give their answers in their own words as far as practicable.
✓ Attempt *All* questions.
✓ The figures in the margin indicate *Full Marks*.
✓ *Necessary tables are attached herewith.*
✓ Assume suitable data if necessary.

1. What are measures of central tendencies? Write favorable points of each of them. Calculate approximate measures of central tendency from following data; [1+2+3]

Wages in Rs/ week	Less than 35	35-37	38-40	41-43	Over 43
No. of wage earned	14	82	99	18	7

2. From a group of 4 Engineers, 3 Doctors and 2 Statistician a sub-group of 3 has to be made, what is the probability that sub-group consists of

   a) One from each profession
   b) Atleast one engineer [4]

3. Define discrete probability distribution with suitable example. Compare Negative Binomial and Binomial probability distributions. [3+3]

4. A quality control engineers inspects a random sample of 3 batteries from each lot of 24 car batteries that is ready to shipment. If such a lot contain six batteries with slight defects, what is the probabilities that the inspector's sample will contain

   a) None of the batteries with defect
   b) Only one of the batteries with defect
   c) At least two of the batteries with defect [6]

5. Write major characteristics of normal distribution. Discuss relation between Normal distribution and Standard Normal distribution. [2+3]

OR

What are Gamma and Chi-squared distributions? Specify relationship between them.

6. The life of an electric light bulbs follows Normal distribution with mean 800 hours and a standard deviation of 50 hours. Find the probability that a bulb burns

   a) Between 750 and 825 hours
   b) More than 900 hours [5]

OR

Define exponential distribution. Suppose that the service life of a semiconductor is exponentially distributed with an average of 60 hours. Find the probability that a semi-conductor will a) still working after 90 hours
                    b) fail within 120 hours

7. A population consists of five numbers 2, 4, 6 and 8

   a) Enumerate all possible sample of size two without replacement
   b) Show that the mean of the sampling distribution of sample mean is equal to population mean [4]

8. State central limit theorem. A random sample of size 100 is taken from an infinite population with mean 75 and variance 256. Assert the chances of sample mean between 67 and 83. [6]

9. What is type Ist error? Describe the procedure of the for difference of two Mean for large sample. [6]

10. Define chi-square distribution. A book containing 500 pages, was thoroughly checked. The distribution of number of error page was given below as

Number of errors:	0	1	2	3	4	5
Number of pages:	275	138	75	7	4	1

Using chi-square test of goodness of fit, verify whether the arrivals follow a poison distribution at 5% level of significance. [6]

11. Define hypothesis. Describe the procedure of testing of hypothesis of significant difference between two population means for large samples.

OR

Describe the types of error in Hypothesis Testing. Write the procedure testing of Hypothesis of single proportion. [6]

12. Write the Decision criteria in test of Hypothesis with diagram. [4]

13. In trying to evaluate the effectiveness of antibiotics in killing bacteria, a research institute compiled the following information

Antibiotics (mg)	12	15	14	16	17	10
Bacteria	5	7	5.6	7.2	8.6	6.2

Find strength and direction of relationship between them. [4]

14. Differentiate between Correlation and regression analysis. [4]

15. Following data revels the scores of sixty candidates of IOE entrance examination

51.43	40	78.57	46.43	51.43	50.71
42.14	50.71	42.86	55	71.43	64.29
52.86	42.14	57.14	45.71	43.57	40
44.29	55.71	40	48.57	48.57	49.29
51.43	47.14	54.29	45	53.57	50
49.29	60	48.57	50.71	50	49.29
47.14	53.57	58.57	43.57	47.14	53.57
47.86	47.14	40	43.57	52.86	47.86
49.29	49.29	42.86	47.14	48.57	50
47.14	50.71	52.86	47.86	47.14	70

a) Estimate average score of candidates
b) Find unbiased estimator of true standard deviation and standard error of average score
c) Also test for consistency of score

[8]

Exam.		Regular	
Level	BE	Full Marks	80
Programme	BEL, BEX, BCT, B. Agri	Pass Marks	32
Year / Part	III / I	Time	3 hrs.

Subject: - Probability and Statistics (SH602)

✓ Candidates are required to give their answers in their own words as far as practicable.
✓ Attempt **All** questions.
✓ The figures in the margin indicate **Full Marks**.
✓ **Necessary tables are attached herewith.**
✓ Assume suitable data if necessary.

1. Describe the various measures of central tendency and its application. The following table represents the marks of 100 students. [6]

Marks	0-20	20-40	40-60	60-80	80-100
No. of students	14	18	27	26	15

Find the mean, median and standard deviation of all 100 students.

2. Explain Baye's theorem. A chain of video stores sells three different brands of DVD players; Of its DVD players sales, 50% are brand 1 (the least expensive), 30% are brand 2, and 20% are brand 3. Each manufacturer offers a 1-year warranty on parts and labor. It is known that 25% of brand 1's DVD players require warranty repair work, where as the corresponding percentages for brands 2 and 3 are 20% and 10%, respectively. [2+4]

   a) What is the probability that a randomly selected purchaser has bought a brand 1 DVD players that will need repair while under warranty?
   b) What is the probability that a randomly selected purchaser has a DVD player that will need repair while under warranty?

3. Define negative binomial distribution with its important characteristics. [5]

4. If a publisher of nontechnical books takes great pains to ensure that its books are free of typographical errors, so that the probability of any given page containing at least one such error is 0.005 and errors are independent from page to page, what is the probability that one of its 400-page novels will contain. [5]

   a) Exactly one page with errors?
   b) At most three pages with errors?

5. In a certain examination test 2000 students appeared in Statistics. The average marks obtained were 50% and the standard deviation was 5%. How many students do you expect to obtain more than 60% marks? What are the minimum marks of the top 100 students? Assume that the marks are normally distributed. [5]

OR

The daily consumption of water in a certain place follow a gamma distribution with parameters $\alpha = 2$ and $\beta = 3$. If the daily capacity of this city is 9 million gallon of water, what is the probability that on any given day the water supply is inadequate? [5]

6. The distribution function of a random variable x is [5]

$F(x) = 1 - e^{-2x}$ for $x \geq 0$
$\qquad = 0$ for $x < 0$

   a) Find $P(x > 2)$
   b) Find mean and variance of the variable x.

7. What do you mean by central limit-theorem and discuss its applications. [4]

8. An electrical firm manufactures light bulbs that have a length of life that is approximately normally distributed with mean equal to 800 hours and standard deviation of 40 hours. Find the probability that a random sample of 16 bulbs will have an average life of (a) less than 850 hours (b) between 750 to 900. [6]

9. Define partial and multiple correlation with suitable examples. Write down the properties of partial and multiple correlation. [5]

10. Raw material used in the production of a synthetic fiber is stored in a place which has no humidity control. Measurements of the relative humidity in the storage place and moisture content of sample of the raw material (both in percentage) on 12 days yielded the following results: [5]

Humidity, X	42	35	50	43	48	62	31	36	44	39	55	48
Moisture content, Y	12	8	14	9	11	16	7	9	12	10	13	11

Verify that it is reasonable to fit a straight line. Fit the straight by the method of least squares.

11. Describe the procedure of the test of significance for difference of two properties for large sample. [5]

12. Six sample of each of four types of cereal grain grown in a certain region were analyzed to determine thiamin content, resulting in the following data (mg/g): [5]

Wheat	5.2	4.5	6.0	6.1	6.7	5.8
Barley	6.5	8.0	6.1	7.5	5.9	5.6
Maize	5.8	4.7	6.4	4.9	6.0	5.2
Oats	8.3	6.1	7.8	7.0	5.5	7.2

Does this data suggest that at least one of the grains differ with respect to true average thiamin content? Use 0.05 level of significance.

OR

A liquid dietary product implies in its advertising that use of the product for one month results in an average weight loss of at least 3 pounds. Eight subjects use the product for one month, and the resulting weight loss data are reported below. Do the data support the claim of the producer of the dietary product with the probability of a type I error set to 0.05?

Subjects	1	2	3	4	5	6	7	8
Weight (lb)	165	201	195	198	155	143	150	187
Weight (lb)	161	195	192	193	150	141	146	183

13. From the following data can you conclude that there is association between the purchase of brand and geographical region? [5]

	Region		
	Central	Eastern	Western
Purchase brand	40	55	45
Do not purchase brand	60	45	55

Use 5% level of significance.

14. Two different areas of a city are being considered as sites for day-care centers. Of 200 households surveys in one section, the proportion in which the mother worked full-time was 0.52. In another section, 40% of 150 households surveyed had mothers at full time jobs. At 0.05 level of significance, is there a significant difference in the proportion of working mothers in the two areas of the city? [5]

P.T.O

15. The entrance score of three engineering institutes are as follows:

Institutes	Entrance scores								
A	740	800	830	840	860	890	830	930	1070
B	655	775	825	978	989	1025	950	980	1100
C	850	825	749	870	565	978	925	950	1000

a) Calculate mean and standard deviation for institute A, B and C

b) Which institute is good?

c) Which institute is consistent?

***

Exam.		Back	
Level	BE	Full Marks	80
Programme	BEL, BEX, BCT, B. Agri.	Pass Marks	32
Year / Part	III / I	Time	3 hrs.

Subject: - Probability and Statistics *(SH602)*

✓ Candidates are required to give their answers in their own words as far as practicable.
✓ *Attempt __All__ questions.*
✓ *The figures in the margin indicate __Full Marks__.*
✓ *__Necessary tables are attached herewith.__*
✓ *Assume suitable data if necessary.*

1. What is Box plot and what does it measure? Explain the meaning of its different parts with diagram.

   A civil engineering monitors water quality by measuring the amount of suspended solids in a sample of river water. Over 11 weekdays, he observed 14, 12, 21, 28, 30, 63, 29, 65, 55, 19, 20 suspended solids (parts per million).

   Find the third quartile and interpret its meaning.   [3+3]

2. Write sown the difference between the sample space and sample points, dependent and independent events. Urn A contains 2 white 1 black and 3 red balls. Urn B contain 3 white 2 black and 4 red balls. Urn C contain 4 white 3 black and 2 red balls. One Urn is choosen at random and 2 balls are drawn. They happen to be red and black. What is the probability that both come from Urn B.   [6]

3. What are the characteristics of Binomial Distribution and how does it differ from Negative Binominal Distribution?   [4]

4. A quality control engineer inspects a random sample of 4 batteries from each lot of 24 car batteries that is ready to shipment. If such a lot contain six batteries with slight defects. What are the probabilities that the inspector's sample will contain.   [5]

   i) None of the batteries with defect?
   ii) At least two of the batteries with defects?
   iii) At most three of the batteries with defects?

5. The breakdown voltage X of a randomly chosen diode of a particular type is known to be normally distributed with mean 40 volts and variance 2.25 volts. What is the probability that the breakdown voltage will be   [5]

   i) Between 39 and 42 volts
   ii) Less than 44 volts
   iii) More than 43 volts

OR

The daily consumption of electric power in a certain city follow a gamma distribution with $\alpha = 2$ and $\beta = 3$. If the power plant of this city has daily capacity of 12 million kilowatt hours, what is the probability that this power supply will be inadequate on any given day?

6. A college professor never finishes his lecture before the bell rings to end the period and always finishes his lectures within one minute after the bell rings. Let X = the time which elapses between the bell and the end of the lecture. Suppose that the p.d.f of X is [5]

$$f(x) = kx^2, 0 \leq x \leq 1$$
$$= 0, \text{otherise}$$

i) Find the value of k
ii) What is the probability that the lecture ends with ½ minute of the bell ringing?
iii) What is the probability that the lecture continues beyond the bell for between 15 and 30 seconds?

7. Define Central Limit Theorem. The amount of impurity in a batch of a certain chemical product is a random variable with mean value 4.0 gm and standard deviation 1.5 gm. If 50 batches are independently prepared, what is the probability that the sample average amount of impurity is between 3.5 and 3.8 gm? [5]

8. Define population. Sample parameter and statistic with suitable examples. A population consists of 3,7,11,15. Consider all possible samples of size two which can be drawn without replacement from this population. Find population mean and Standard error of mean. [6]

9. What are the two regression coefficients and what do they represent when these two will be same? Write any three properties of regression coefficient. [5]

10. A sample of 8 values of three variables X_1, X_2 and X_3 were obtained as [5]

$\Sigma X_1 = 360$	$\Sigma X_2 = 64$	$\Sigma X_3 = 48$
$\Sigma X_1^2 = 17172$	$\Sigma X_2^2 = 546$	$\Sigma X_3^2 = 320$
$\Sigma X_1 X_2 = 2845$	$\Sigma X_1 X_3 = 2269$	$\Sigma X_2 X_3 = 396$

Find:
i) Partial correlation between X_1 and X_3 eliminating the effect of X_2
ii) Multiple correlation between X_1, X_2 and X_3 assuming X_3 as dependent

11. Discuss difference between estimation and hypothesis test of significance of population [5]

66.3	63.5	64.9	61.9	64.3	64.7	65.1	64.5	68.4	63.2

Find 99% confidence interval for true hardness of magnesium alloy.

12. An examination was given to 50 students at college A and 60 students at college B. At a mean grade was 75 with standard deviation of 9. At B mean grade was 79 with a standard deviation of 7. Is these significant difference between the performance of students at A and those at B, given that $\alpha = 0.05$? [6]

OR

Three randomly selected groups of chickens are fed on three different diets. Each group consists of five chickens. Their weight gains during a specified period of time are as follows:

Diet I	4	4	7	7	8
Diet II	3	4	5	6	7
Diet III	6	7	7	7	8

Test the hypothesis that mean gains of weight due to the three diets are equal.

P.T.O.

13. A random sample of smokers was obtained and each individual was classified both with respect to gender and with respect to the age at which he/she first started smoking. [5]

Age	Gender	
	Male	Female
<16	25	10
16-17	24	32
18-20	28	17
>20	19	34

Carry out a test of hypotheses to decide whether there might be an association between gender and the age at which an individual first smokes?

14. Explain the concept of (i) point estimation and (ii) Internal estimation of population properties. In a random sample of 400 industrial accidents, it was found that 231 were due to at least partially to unsafe working condition. 95% confidence intervals for the corresponding true proportion. [5]

15. Following multiple box plots shows the quality index at 4 manufacturing plants. Comment on the relationships between quality at different plants and the variability present those 4 plants. [7]

Exam.		Regular		
			Full Marks	80
Level	BE		Pass Marks	32
Programme	BEL, BEX, BCT, B. Agri.			
Year / Part	III / I		Time	3 hrs.

Subject: - Probability and Statistics (SH602)

✓ Candidates are required to give their answers in their own words as far as practicable.
✓ Attempt All questions.
✓ The figures in the margin indicate Full Marks.
✓ Necessary tables are attached herewith.
✓ Assume suitable data if necessary.

1. What are the differences between measures of central tendency and measures of dispersion? The mean and standard deviation of 20 items is found to be 10 and 2 respectively. At the time of checking it was found that one item 8 was incorrect. Calculate the mean and standard deviation if: (i) the wrong item is omitted (ii) it is replaced by 12. [6]

2. Define conditional probability. An assembly plant receives its voltage regulators from these three different suppliers, 60% from supplier A, 30% from supplier B, and 10% form supplier C. It is also known that 95% of voltage regulators from A, 80% of these from B, and 65% these from C perform according to specifications. What is the probability that [6]

   i) Anyone voltage regulator received by the plant will perform according to specifications
   ii) A voltage regulator that perform according to specification came from B

3. Write the differences and similarities between Binomial and Negative Binomial Distribution. [2+3]

4. In certain factory turning out optical lenses, there is a small change, 1/500 for any lens to be defective. The lenses are supplied in packets of 10 each. What is the probability that a packet will contain [5]

   i) No defective lens
   ii) At least one defective lenses
   iii) At most two defective lenses

OR

Define mathematical expectation of a discrete random variable. A probability distribution is given.

X = x	0	1	2	3	4	5
p(X=x)	0.26	0.25	0.11	0.02	0.25	0.11

Find (a) $P(X \geq 4)$; (b) $p(0 < X < 4)$; (c) mean and variance of X

5. Define standard normal distribution. Give the condition for normal approximation of Poisson distribution. [5]

6. The mean inside diameter of a sample of 200 washers produced by a machine is 0.502 cm and the standard deviation as 0.005 cm. The purpose for these washers are interned allows a maximum tolerance in the diameter of 0.496 to 0.508 cm, otherwise the washers are considered defective. Determine the percentage of defective washers produced by the machine. Assume the diameter is normally distributed. [5]

7. What do you mean by sampling distribution of a sample mean and its Standard Error? Explains with example. What would be the variance of sampling distribution of mean, if sample is taken from finite population? [5]

8. Define the Central Limit Theorem. A sample of 100 mobile battery cells tested to find the length of life produced the following results as mean 13 months and standard deviation of 3 months. Assuming the data to be normally distributed by using Central Limit Theorem what percentage of battery cells expected to have Average life? [5]

    i) More than 15 months (ii) Less than 9 months

9. Define partial and multiple correlations with examples. Write down the properties of partial and multiple correlation. [5]

10. An article in wear (Vol.152, 1992, pp. 171-181) presents data on the fretting wear of mild steel and oil viscosity. Representative data follow, with x = oil viscosity and y = wear volume (10^{-4} cubic millimeters). [5]

y	240	181	193	155	172	110	113	75.	94
x	1.6	9.4	15.5	20.0	22.0	35.5	43.0	40.5	33.0

    i) Fit the sample linear regression model using least
    ii) Predict fretting wear when viscosity x = 30

11. Describe the procedure of the test of significance for difference of two population mean for large sample. [5]

12. Ten objects were chosen at random from the large population and their weights were found to be in grams 63, 63, 64, 65, 66, 69, 65, 66.1, 64.5. In the light of above data, discuss the suggestion that the mean weight in the population is 65 gm. Use $\alpha = 0.05$. [5]

13. Define chi-square distribution. From the following data can you conclude that there is association between the purchase of brand and geographical region? (Use 5% level of significance). [5]

	Region		
	Central	Eastern	Western
Purchase brand	40	55	45
Do not purchase brand	60	45	55

14. In a postal survey of 500 households, 330 said that they thought they were being overcharged for the public services within their area. [5]

    i) Calculate an approximate 99% confidence interval for the population proportion, p, of households who thought they were being overcharged for public services within their area.

    ii) Estimate the size of sample required to estimate the value of p to be within 99% confidence limits of ±0.025.

15. Following data gives the sample records of number of passenger take ticket at the counter of Bus during one hour period. [8]

22	58	32	36	62	57	25	45	23	37
64	56	46	60	29	49	63	36	26	58
60	26	58	58	29	43	53	36	45	22
52	43	45	31	45	39	35	38	30	60
58	42	54	62	52	42	65	58	51	60
53	45	31	53	22	53	51	52	47	59

    Find the

    i.   Sample mean of Number of passenger
    ii. Sample Standard deviation and Coefficient of variation.
    iii. Standard error of the sample mean.
    iv. Find the 95% and 99% confidence limit of sample mean

		Time	3 hrs.
Year / Part	III / I		

Subject: - Probability and Statistics (SH602)

✓ Candidates are required to give their answers in their own words as far as practicable.
✓ Attempt _All_ questions.
✓ The figures in the margin indicate _Full Marks_.
✓ Necessary tables are attached herewith.
✓ Assume suitable data if necessary.

1. In two companies A and B engaged in similar type of industry, the average weekly wage and standard deviation are given below: [6]

	Company A	Company B
Average weekly wage (Rs)	460	490
Standard deviation	50	40
No. of wage earners	100	80

   i) Which company pays larger amount as weekly wags?
   ii) Which company show greater variability in the distribution weekly wages?
   iii) What is the mean and standard deviation of all the workers in two companies taken together?

2. State the law multiplication of probability. An Electronics company has an engineering position open. The Probability that an applicant is capable is 0.7. Each applicant is given written test and oral examination. A capable applicant passes with Probability 0.9 while an incapable applicant passes with Probability of 0.4. Find (a) the probability that an applicant passes the test (b) the probability that the applicant is capable given he/she passes the test.   [6]

3. Define negative Binominal Distribution. If a boy is throwing stone at a target what is the probability that his 10th throw is his 5th hit, if the probability of hitting the target at any trial is 0.6. Also find the mean and variance of random variable.   [5]

4. Define hypergeometric probability distribution with an example. Describe the conditions for the binomial approximation to hypergeometric distribution?   [5]

5. Let X denote the amount of time for which a book on two hour reserve at a college library is checked out by a randomly selected student and suppose that X has density function,   [5]

   $$f(x) = 1/2x, \quad 0 \le x \le 2$$
   $$= 0 \qquad \text{otherwise}$$

   Calculate $P(X \le 1)$ and $P(0.5 \le X \le 1.5)$

6. Define continuous random variable with suitable example. Describe the properties of probability density function and distribution function.   [5]

7. State Central limit theorem with an example. Explain why it is important in engineering field?   [5]

8. A population consists of the four number 2,8,14,20   [5]
   i) Write down all possible sample size of two without replacement
   ii) Verify that the population mean is equal to the mean of the sample mean
   iii) Calculate the standard error of the sampling distribution of the sample mean

9. Define Karl Person coefficient of Correlation and coefficient of determination. What it is input in analysis.   [5]

10. A house survey on monthly expenditure on food yield following data: [5]

Monthly expenditure (100 Rs.)	10	15	20	25	30	35	40
Monthly income (1000 Rs.)	2	4	5	7	6	6	5
Size of the family	4	5	7	10	8	11	4

Obtain the multiple correlation coefficient.

11. There was a research on voltage supply by Ba Hries supplied by two companies. Both company claims that same. But researcher suspects that there is significance difference between mean voltages between two companies. To test this, she selected independent samples from both company and in lab test the result were as follows: [5]

		Mean	Sample Standard deviation
Company A	13	3.59V	0.3V
Company B	10	3.15V	0.4V

Test the researcher suspect was correct at 5% level of significance.

12. Shyam and Co. produces three varieties of certain product: deluxe, find and ordinary. A recent market survey is conducted for preference of products. The preference was found as follow: [5]

Product	Production			
Deluxe	15	14	19	18
Fine	17	12	20	16
Ordinary	16	18	16	17

Is there a significant difference in the preference of products test it using ANOVA test. Use $\alpha = 5\%$

OR

The following are the average weekly losses of worker hours due to accidents in 10 industrial plan before and after a certain safety program was put into operation:

Before	45	73	46	124	33	57	83	34	26	17
After	36	60	44	119	35	51	77	29	24	11

Use the 0.05 level of significance to test whether the safety program is effective.

13. Define critical value. A manufacturer claimed that at least 95% of the water pumps supplied to the ABC Company confirmed to specification. However, the product manager at ABC Company wasn't satisfied with the claim of the manufacturer. Hence, to test the claim, the manager examined a sample of 250 water pumps supplied last month and found that 228 water pumps as per the specification. Can you conclude that the production manager is right to doubt on the claim of the manufactures? (α=0.01) [5]

14. Describe the Hypothesis testing procedure of Chi-square test of independence for 2×2 table. [5]

15. The following table shows the number of hours 45 hospital patients slept following the administration of a certain anesthetic. [8]

7	10	12	4	8	7	3	8	5
12	11	3	8	1	1	13	10	4
4	5	5	8	7	7	3	2	3
8	13	1	7	17	3	4	5	5
3	1	17	10	4	7	7	11	8

a) Find sample mean, sample variance and sample standard deviation
b) Compare a value that measures the amount of variability relative to the value of mean

***

Exam.		Regular		
Level	BE		Full Marks	80
Programme	BEL, BEX, BCT, B.Agri		Pass Marks	32
Year / Part	III / I		Time	3 hrs.

Subject: - Probability and Statistic (SH602)

✓ Candidates are required to give their answers in their own words as far as practicable.
✓ Attempt **All** questions.
✓ The figures in the margin indicate **Full Marks**.
✓ *Necessary tables are attached herewith.*
✓ Assume suitable data if necessary.

1. Two different sections of a statistics class take the same quiz and the scores are recorded below: [6]

   a) Find the range and standard deviation for each section
   b) What do the range values lead you to conclude about the variation in the two sections?
   c) Why is the range misleading in this case?
   d) What do the standard deviation values lead you to conclude about the variation in two sections?

Section 1	1	20	20	20	20	20	20	20	20	20	20
Section 2	2	3	4	5	6	14	15	16	17	18	19

2. Define dependent and independent events with suitable examples. The independent probabilities that the three sections of a costing department will encounter a computer error are 0.2, 0.3 and 0.1 per week respectively. What is the probability that there would be: [6]

   i) At least one computer error per week
   ii) One and only one computer error per week

3. Write the differences and similarities between Binominal and Negative Binominal Distribution.   [2+3]

4. A quality control engineer inspects a random sample of 4 batteries from each lot of 24 car batteries that is ready to shipment. If such a lot contain six batteries with slight defects. What are the probabilities that the inspector's sample will contain: [5]

   i) None of the batteries with defect?
   ii) At least two of the batteries with defects?
   iii) At most three of the batteries with defect?

5. A random variable X has the following probability density function as: [5]

   $$f(x) = \begin{cases} kx^3(4-x)^2, & 0 < x < 1 \\ 0, & \text{otherwise} \end{cases}$$

   Find the value of k, using this value of k find mean and variance of distribution.

6. The breakdown voltage X of a randomly chosen diode of a particular type is known to be normally distributed with mean 40 volts and variance 2.25 volts. What is the probability that the breakdown voltage will be: [5]

   i) Between 39 and 42 volts
   ii) Less than 44 volts
   iii) More than 43 volts

   ### OR

   The daily consumption of electric power in a certain city follow a gamma distribution with $\alpha = 2$ and $\beta = 3$. If the power plant of this city has daily capacity of 12 million kilowatt hours, what is the probability that this power supply will be inadequate on any given day?

7. State central limit theorem. An electrical firm manufactures light bulbs that have a length of life that is approximately normally distributed with mean equal to 800 hours and standard deviation of 4 hours. Find the probability that a random sample of 16 bulbs will have an average life of less than 12775 hours.

[5]

8. What do you mean by sampling distribution of a sample mean and its standard Error? What would be the variance of sampling distribution of mean if sample is taken from finite population?

[3+1]

9. Define partial and multiple correlation with suitable examples. Write down the properties of partial and multiple correlation.

[5]

10. The following data gives the number of twists required to break a certain kind of forged alloy bar and percentage of alloying element A present in the metal.

[5]

Number of twists	41	49	69	65	40	50	58	57	31	36
Percentage of element A	10	12	14	15	13	12	13	14	13	12

i) Fit the regression equation of number of twists on percentage of element A. Determine the predicted number of twists required to break an alloy when percentage of element is 20.

ii) Find 99% confidence interval for the regression coefficient (i.e.slope)

11. In a certain factory, there are two independent processes manufacturing the same item. The average weight in a sample of 250 items produced from one process is found to be 120 gram with a standard deviation of 12 gram, while the corresponding figures in a sample of 400 items from the other process are 124 and 14 respectively. Test whether the two mean weights differ significantly or not at 5 percent level of significance.

[5]

12. Three trained operators work on production of new product. The productivity of the operators are recorded as below:

[5]

Operators	Production			
1	10	12	14	16
2	12	11	13	16
3	14	15	12	11

Using ANOVA test whether the difference in average productivity due to the difference in operators are significant. Use $\alpha = 5\%$

OR

Define confidence level and significance level. A company claims that its light bulbs are superior to those of its main competitor. If a study showed that a sample of 40 of its bulbs has mean lifetime of 647 hours of continuous use with standard deviation of 27 hour. While a sample of 40 bulbs made by its main competitor had mean lifetime of 638 hours of continuous use with standard deviation of 31 hours. Does this substantiate claim at 1% level of significance?

13. Write down the steps for testing hypothesis on difference between two population proportions for the large sample size.

[5]

14. 1072 students were classified according to their intelligence and economic conditions. Test whether there is any association between intelligence and economic condition.

[6]

Economic Condition	Intelligence			
	Excellent	Good	Mediocre	Dull
Good	48	199	181	82
Not good	81	185	190	106

Exam.	New Back (2066 & Later Batch)		
Level	BE	Full Marks	80
Programme	BEL, BEX, BCT, B.Agri.	Pass Marks	32
Year / Part	III / I	Time	3 hrs.

Subject: - Probability and Statistic (SH602)

✓ Candidates are required to give their answers in their own words as far as practicable.
✓ Attempt *All* questions.
✓ The figures in the margin indicate *Full Marks*.
✓ *Necessary tables are attached herewith.*
✓ Assume suitable data if necessary.

1. What is absolute and relative Measure of Dispersion? Construct a Box plot from the following data of marks of students as: [1+5]

Marks	10-20	20-30	30-40	40-50	50-60
No. of students	2	6	22	13	7

2. State the law of addition of probability. In a training, the 70% of persons achieved a rating of Satisfactory. Of those as rated as Satisfactory, 80% had Acceptable Scores on the personality test. Of those rated as Unsatisfactory, 35% had Acceptable Scores. Find the probability that an applicant would be a Satisfactory trainee given the Acceptable scores on personality test. [2+4]

3. Define Negative binomial distribution with its important characteristics. [5]

4. A particularly long traffic light on your morning commute is green 20% of the time that you approach it. Assume that each morning represents as independent trial. [5]

   i) Over five mornings, what is the probability that the light is green on exactly one day?
   ii) Over 20 mornings, what is the probability that the light is green on exactly four days?

5. The distribution function for a random variable X is [5]

   $F(x) = 1 - e^{-2x}$ for $x \geq 0$

   $= 0$ for $x < 0$

   i) Find $P(X > 2)$
   ii) Find mean and variance of the variable X.

6. Define Standard Normal Distribution with their respective probability density function and describe its properties. [5]

7. An article in Wear (Vol.152, 1992, pp.171-181) presents data on the fretting wear of mild steel and oil viscosity. Representative data follow, with x = oil viscosity and y = wear volume (10^{-4} cubic millimeters). [5]

y	240	181	193	155	172	110	113	75	94
x	1.6	9.4	15.5	20.0	22.0	35.5	43.0	40.5	33.0

   i) Fit the simple linear regression model using least
   ii) Predict fretting wear when viscosity x = 30

8. What are the two regression coefficients and what do they represent? Write the properties of regression coefficient. [5]

9. Define Central Limit Theorem. An electronics company manufactures resistors that have a mean resistance of 100 ohms and a standard deviation of 10 ohms. The distribution of resistance is normal. Find the probability that a random sample of 25 resistors will have an average resistance less than 95 ohms. [5]

10. Define standard error of sample mean. A population consist of the four numbers 12, 19, 13, 16.

[5]

   i) Write down all possible sample size of two without replacement.
   ii) Find standard error of the sample mean.

11. Describe the procedure of the test of significance for difference of two population mean for large sample.

[5]

12. In the investigation of a citizens' committee complaint about the availability of fire protection within the country, the distance in miles to the nearest fire station was measured for each of five randomly selected residences in each of four areas.

[5]

Area 1	7	5	5	6	8
Area 2	1	4	3	4	5
Area 3	7	9	8	7	8
Area 4	4	6	3	7	5

Do these data provide sufficient evidence to indicate a difference in mean distance for the four areas at the = 0.05 level of significance?

OR

The diameter of steel rods manufactured on two different extrusion machines is being investigated. Two random samples of sizes $n_1 = 15$ and $n_2 = 17$ are selected, and the sample means and sample variances are $\bar{x}_1 = 8.73, s_1^2 = 0.35, \bar{x}_2 = 8.68,$ and $s_2^2 = 0.40,$ respectively. Assume that $\sigma_1^2 = \sigma_2^2$ and that the data are drawn from a normal distribution. Is there evidence to support the claim that the two machines produce rods with different mean diameters? Use $\alpha = 0.05$ in arriving at this conclusion.

13. A random sample of 500 adult residents of Maricopa County found that 385 were in favor of increasing the highway speed limit to 75 mph, while another sample of 400 adult residents of Pima County found that 267 were in favor of the increased speed limit. Construct 95% confidence interval on the difference in the two proportions.

[5]

14. Define chi-square distribution. From the following data can you conclude that there is association between the purchase of brand and geographical region?

[5]

	Region		
	Central	Eastern	Western
Purchase brand	40	55	45
Do not purchase brand	60	45	55

Use 5% level of significance.

15. The following table shows the number of hours 45 hospital patients slept following the administration of a certain anesthetic.

[8]

7	10	12	4	8	7	3	8	5
12	11	3	8	1	1	13	10	4
4	5	5	8	7	7	3	2	3
8	13	1	7	17	3	4	5	5
3	1	17	10	4	7	7	11	8

   i) Find sample mean, sample variance and sample standard deviation.
   ii) Compute a value that measures the amount of variability relative to the value of mean.

Exam.	New Back (2066 & Later Batch)		
Level	BE	Full Marks	80
Programme	BEL, BEX, BCT, B.Agri.	Pass Marks	32
Year / Part	III / I	Time	3 hrs.

Subject: -Probability and Statistics *(SH602)*

✓ Candidates are required to give their answers in their own words as far as practicable.
✓ Attempt *All* questions.
✓ The figures in the margin indicate *Full Marks.*
✓ *Necessary tables are attached herewith.*
✓ Assume suitable data if necessary.

1. Write difference between measure of central tendency and measure of dispersion and their importance. The following table represents the marks of 100 students. [6]

Marks	0-20	20-40	40-60	60-80	80-100
No. of Students	14	?	27	?	15

   If the mode value is 58, find the missing frequencies and the mean of all 100 students.

2. Define multiplication law of probability for dependent and independent events with suitable examples. The independent probabilities that the three sections of a costing department will encounter a computer error 0.2, 0.3 and 0.1 per week respectively. What is the probability that there would be: [6]
   i) At least one computer error per week?
   ii) One and only one computer error per week?

3. Define Negative binomial distribution with an example. How does the negative binomial distribution differ from binomial distribution? [2+3]

4. A heavy machinery manufacturer has 3840 large generators in the field that are under warranty. If the probability is 1/1200 that any one will fail during the given year, find the probability: [5]
   i) That exactly 3 generators will fail during the given year?
   ii) That between 2 and 6 are fail during the given year?

5. Define the standard normal distribution. Give the condition for normal approximation of Poisson distribution. [2+3]

6. The breakdown voltage X of a randomly chosen diode of a particular type is known to be normally distributed with mean 40 volts and variance 2.25 volts. What is the probability that the breakdown voltage will be: [5]
   i) Between 39 and 42 volts
   ii) Between 40 and 43 volts
   iii) Less than 44 volts

   OR

   A probability density function is given by f(x)=Ax (6-x)^2 for $0 < x < 6$
   i) Find the value of A
   ii) Find the mean and variance of this distribution

7. Define sampling distribution of proportion with example. [4]

8. The monthly income of a particular group of retailer's follows a normal distribution with mean Rs.21,000.00 and standard deviation of Rs.9,487.00. A random sample of size 10 retailers was taken and the mean income is calculated. Find the probability that this sample lies between Rs.18,000.00 and Rs.27,000.00. [6]

9. Define partial correlation and multiple correlations with suitable examples. Write down properties of partial and multiple correlations. [5]

10. The following data gives the number of twists required to break a certain kind of forced alloy bar and percentage of alloying element A present in the metal. [5]

Number of twists	41	49	69	65	40	50	58	57	31	36
Percentage of element A	10	12	14	15	13	12	13	14	13	12

    i) Fit the regression equation of number of twists on percentage of element A. Determine the predicted number of twist required to break an alloy when percentage of element is 20.

11. The mean weight loss of n = 16 grinding balls after a certain length of time in mill slurry is 3.42 grams with a standard deviation of 0.68 gram. Construct a 99% confidence interval for the true mean weight loss of such grinding balls under the stated conditions. [4] ˊ35

12. Four trained operators works on production of new product. The productivity of the operators are recorded as below: [6]

Operators	Production			
1	10	12	14	16
2	12	11	13	16
3	14	15	12	11
4	16	10	17	17

Using ANOVA, test whether the difference in average productivity due to the difference in operators are significant. Use $\alpha = 5\%$

OR

The following are the average weekly losses of worker hours due to accidents in 10 industrial plants before and after a certain safety program was put into operation:

Before	45	73	46	124	33	57	83	34	26	17
After	36	60	44	119	35	51	77	29	24	11

Use the 0.05 level of significance to test whether the safety program is effective.

13. Define confidence level and significance level. A manufacturer claimed that at least 95% of the cables supplied to the ABC Company confirmed to specifications. However, the production manager at ABC Company wasn't satisfied with the claim of the manufacturer. Hence, to test the claim, the manager examined a sample of 250 cables supplied last month and found that 228 cables as per the specifications. Can you conclude that the production manager is right to doubt on the claim of the manufacturer? (α=0.01) [5]

14. Define chi-square distribution. A book containing 500 pages was thoroughly checked. The distribution of number of error page was given below as: [5]

Number of errors	0	1	2	3	4	5
Number of pages	275	138	75	7	4	1

Using chi-square test of goodness of fit, verify whether the arrivals follow a Poisson distribution at 5% level of significance.

15. The sample of length of life of bulbs from two companies are given below: [8]

Length of Life (hours)	Company	
	A	B
500-600	10	3
600-700	21	8
700-800	6	15
800-900	8	12
900-1000	21	4
1000-1100	10	5
1100-1200	2	15
1200-1300	12	13
1300-1400	19	7
1400-1500	9	7
1500-1600	3	4
1600-1700	7	6
1700-1800	5	3
1800-1900	4	2
1900-2000	1	3

i) Calculate mean length of life of bulbs for Company A and Company B.
ii) Calculate sample standard deviation and sample variance for given data.
iii) Which Company's bulbs are more uniform?

Exam.	Regular		
Level	BE	Full Marks	80
Programme	BEL, BEX, BCT, B.Agri.	Pass Marks	32
Year / Part	III / I	Time	3 hrs.

Subject: - Probability and Statistics (SH602)

✓ Candidates are required to give their answers in their own words as far as practicable.
✓ Attempt **All** questions.
✓ The figures in the margin indicate **Full Marks**.
✓ Necessary tables are attached herewith.
✓ Assume suitable data if necessary.

1. Calculate the standard deviation from the following data regarding marks obtained by students in a test: [3+3]

Marks:	1	2	3	4	5	6	7	8	9
No. of Students	32	41	57	98	123	83	46	17	3

   What will be the value of standard deviation if the marks obtained by each of the students are increased by one?

2. State Baye's theorem. A manufacturer of air-conditioning units purchases 70% of its thermostats from company A, 20% from company B and the rest from company C. Past experience shows that 0.5% of company A's thermostats, 1% of company B's thermostats and 1.5% of company C's thermostats are likely to be defective. An air-conditioning unit randomly selected from this manufacturer's production line was found to have a defective thermostat. Find the probability that company A supplied the defective thermostat. [2+4]

3. Write the differences and similarities between Binomial probability Distribution and Negative Binomial Probability distribution. [2+3]

4. The number of accident in a year attributes to taxi drivers in a city follows Poisson distribution with mean 3. Out of 1000 taxi driver, find the approximately the number of driver with: [5]

   i) No accidents in a year
   ii) More than 3 accident in a year

5. Define normal distribution. Give the condition for normal approximation of Binomial distribution and Poisson distribution. [6]

6. The time required to assemble a piece of machinery is a random variable having approximately a normal distribution with mean 12.9 minutes and standard deviation of 2 minutes. What are the probabilities that the assembly of a piece of machinery of this kind will take (a) at least 11.5 minutes (b) between 11.0 to 14.8 minutes? [4]

   OR

   The probability density function given by
   $$f(x) = cx^2, 0 < x < 3$$
   $$0, \text{Otherwise}$$
   i) Find the value constant C?
   ii) Compute P(1<x<2)
   iii) Find the distribution function

7. What do mean by central limit theorem? Write its applications. [4]

8. The lifetime of a certain brand of an electric bulb may be considered a random variable with mean 1200 hours and standard deviation 150 hours. Using central limit theorem, find the probability that the sample mean of the lifetime with a sample of size 36, is between 1100 hours and 1300 hours. [2+4]

9. Define partial correlation and multiple correlations with suitable examples. Write two properties of each. [6]

10. Observation on the yield of a chemical reaction taken at various temperatures was recorded as follows: [4]

X (°C)	150	150	200	250	250	300	150
Y%	75.4	81.2	85.5	89	90.5	96.7	75.4

Fit a simple linear regression and estimate value of yield at 200°C.

11. An analysis for pH (acidity) in an random sample of water from 40 rainfalls showed that mean is 6.7 and s.d. is 0.5. Find a 99% confidence interval for the mean pH in rainfalls. [4]

12. As a part of investigation of the collapse of the roof of a building, a testing laboratory is given all the available bolts that connected the steel structure at three different positions on the roof. The forces required to shear each of these bolts (coded values) are as follows:. [6]

Position 1	90, 82, 79, 98, 83, 91
Position 2	105, 89, 93, 104, 89, 95, 86
Position 3	83, 89, 80, 94

Perform an ANOVA to test at the 0.05 level of significance whether the difference among the sample means at the three positions are significant.

OR

The following are the average weekly losses of worker-hours due to accidents in 10 industrial plants before and after a certain safety program was put into operation:

45 and 36, 73 and 60, 46 and 44, 124 and 119, 33 and 35, 57 and 51, 83 and 77, 34 and 29, 26 and 24, 17 and 11. Use the 0.05 level of significance to test whether the safety program is effective.

13. The results of polls conducted two weeks and four weeks before an election are shown in the following table: [5]

	Two weeks before election	Four weeks before election
For republican candidate	79	91
For democratic candidate	84	66
Undecided	37	43

Use the 0.05 level of significance to test whether there has been change in opinion during the 2 weeks between the polls.

14. A manufacturer of submersible pumps claims that at most 30% of the pumps require within the first 5 years of operation. If a random sample of 120 of these pumps includes 47 which required repairs within the first 5 years, test the null hypothesis $p = 0.30$ against the alternative hypothesis $P > 0.30$ at the 0.05 level of significance. [5]

15. The following data are the ages (in months) at which $n = 50$ children were first enrolled in a preschool. [8]

38	40	30	35	39
47	35	34	43	41
32	34	41	30	46
55	39	33	32	32
42	50	37	39	33
40	48	36	31	36
36	41	43	48	40
35	40	30	46	37
45	42	41	36	50
45	38	46	36	31

a) Find sample mean, sample variance and sample standard deviation
b) Compute a value that measures the amount of variability relative to the value of mean

Exam.	New Back (2066 & Later Batch)		
Level	BE	Full Marks	80
Programme	BEL, BEX, BCT, B.Agri.	Pass Marks	32
Year / Part	III / I	Time	3 hrs.

Subject: - Probability and Statistics (SH602)

✓ Candidates are required to give their answers in their own words as far as practicable.
✓ Attempt *All* questions.
✓ The figures in the margin indicate *Full Marks*.
✓ *Necessary tables are attached herewith.*
✓ Assume suitable data if necessary.

1. In statistics paper five candidates obtain the marks as 33, 38, 48, 59 and 72. Calculate the mean and standard deviation of these marks. If 10 marks are added for each student, what will be mean and standard deviation? [3+3]

2. Distinguish between mutually exclusive and equally likely events with examples. What is the use of Bayes theorem in theory of probability? In a college 45% students belong to Civil, 30% Electronics and remaining to other faculties. The probability of being top is 5%, 4% and 2% respectively in civil, electronics and others. If this year's result is published, what is the probability that the topper is form electronics? [6]

3. Define poisson probability Distribution. Write the conditions for poisson approximation to Binomial Distribution. [2+3]

4. A quality control engineers inspects a random sample of 3 batteries from each lot of 24 car batteries that is ready to shipment. If such a lot contain six batteries with slight defects, what is the probabilities that the inspector's sample will contain. [5]

    i) None of the batteries with defect?
    ii) Only one of the batteries with defect?
    iii) At least two of the batteries with defect?

5. Define standard normal distribution with area property. [6]

6. The marks obtained by IOE students in statistics are 50 on average with variance 16. If 5000 students have given the exam, find the following: [4]

    a) The number of students securing marks less than 40?
    b) The number of students securing marks between 35 to 60?

OR

Let X denotes the amount of time for which a book on two-hour reserve at a college library is checked out by a randomly selected students, and suppose that X has density function $f(x) = kx, 0 \le x \le 2$
                0, otherwise
    a) Find the value of k
    b) Calculate $P(X \le 1)$
    c) Calculate $P(0.5 \le X \le 1.5)$
    d) Calculate $P(1.5 < X)$ [4]

7. Define sampling distribution of mean.

8. Define Central Limit Theorem. In a sample of 16 observations from a normal distribution with mean of 150 and a variance of 256, what is (a) $P(\bar{x} < 160)$ (b) $P(\bar{x} > 142)$ [2+4]

9. What is the difference between correlation and regression? Plot the sample regression line of Y on X. [2+4]

Speed x	30	40	50	60	70
Stopping distance y	160	240	330	435	500

10. What do you mean by correlation coefficient? Show that correlation coefficient lies between -1 and +1.

[4]

11. Describe the procedure of the test of significance of difference between two means for large sample.

[4]

12. Set up an ANOVA table for the following acre production of data for three varieties of wheat, each growth on 4 plots and state if the variety differences are significant. Use $\alpha = 0.05$

[6]

Plot of land	Variety of wheat		
1	6	5	5
2	7	5	4
3	3	3	3
4	8	7	4

OR

The following random samples are measurement of the heat producing capacity (in millions of calories per ton) of specimens of coal from two mines:

Mine 1	8260	8130	8350	8070	8340	-
Mine 2	7950	7890	7900	8140	7920	7840

Use the 0.01 level of significance to test whether the difference between means of these two samples is significant.

13. What do you mean by chi square distribution? The following test gives the information for the engineering students interest with ability in computer. Is there any significant relationship between interest in engineering and ability in computer?

[5]

Ability in computer	Interest in Engineering	Low	Average	High
	Low	6	12	32
	Average	33	61	18

14. Two different types of injection-molding machines are used to from plastic parts. A part is considered defective if it has excessive shrinkage or is discolored. Two random samples, each of size 300, are selected and 15 defective parts are found in the sample from machine 1 while 8 defective parts are found in the sample from machine 2. Is it reasonable to conclude that both machines produce the same fraction of defective parts, using $\alpha = 0.05$?

[5]

15. The following table shows the number of hours 45 hospital patients slept following the administration of a certain anesthetic.

[8]

.7	10	12	4	8	7	3	8	5
12	11	3	8	1	1	13	10	4
4	5	5	8	7	7	3	2	3
8	13	1	7	17	3	4	5	5
3	1	17	10	4	7	7	11	8

a) Find sample mean, sample variance and sample standard deviation
b) Compute a value that measures the amount of variability relative to the value of mean

Subject: - Instrumentation (EX 504)

✓ Candidates are required to give their answers in their own words as far as practicable.
✓ Attempt __All__ questions.
✓ The figures in the margin indicate __Full Marks__.
✓ Assume suitable data if necessary.

1. a) With block diagram, describe characteristics of data logger. [4]

   b) Differentiate analog and digital system. [2]

2. a) Explain the measurement of inductance using Maxwell's Bridge. [5]

   b) A voltmeter whose accuracy is 2% of the full-scale reading is used on its 0-50V scale. It is used to measure a voltage of 15V and 42V. Calculate the possible error of both readings and comment on your answer. [3]

3. What is inverse transducer? Explain the working principle of Linear Variable Differential Transformer (LVDT) with neat diagram. [7]

4. Explain different PC interfacing techniques. [4]

5. The 8255A PPI is mapped with 8085 microprocessors in mode 0. The address captured by the 8255A card is 4004H to 4007H. Input is taken from switches from part A and port C upper and displayed at port B and Port C lower. Find the port address of each port. Draw an interfacing circuit. Write a program for the given operation. [1+3+3+2]

6. What are the different errors in serial transmission? Explain in brief. Explain how data communication can exist between two computers using RS 232. [3+5]

7. Explain the working of R-2R ladder type DAC with example. [5]

8. What are the different noise coupling mechanism? Explain how they affect the circuit and what are the remedial approach. [5]

9. Write an importance of decoupling, ground bounce, cross talk and impedance matching in designing circuit. [5]

10. List the general rules for component placement. Explain how can you eliminate the crosstalk effect in the circuit. [5]

11. What is software reliability? Compare waterfall and prototyping model. [2+3]

12. Explain the working principle of energy meter and show that number of revolutions is directly proportional to energy consumption. [5]

13. Describe the different processing plants that you have studied in your case study. With neat and clean diagram, explain how the further improvement of these plants can improve the performance of the overall system. [8]

Subject: - Instrumentation (EX 504)

✓ Candidates are required to give their answers in their own words as far as practicable.
✓ Attempt **All** questions.
✓ The figures in the margin indicate **Full Marks**.
✓ Assume suitable data if necessary.

1. What is an instrumentation system? Explain various components of a measurement system with the help of a block diagram. [1+3]

2. When are Maxwell's bridge and Hay's Bridge used? Which AC bridge is used for the measurement of capacitance? Also, derive its balanced condition. [6]

3. Differentiate between sensors and actuators. A strain gauge is bonded to a beam that is 16 cm long and has a cross-sectional area of 4 cm^2. The unstrained resistance of the strain gauge is 300Ω and the gauge factor is 2. There is a change in resistance of 0.015Ω on the application of load. If the modulus of elasticity for steel is 207 GN/m^2, calculate the amount of force applied on the beam and the change in length the steel beam. [2+4]

4. Differentiate between open loop system and closed loop system with examples. [4]

5. What is the control word format for MODE2 programming? Explain the input and output operation in MODE 1 with proper timing diagram and control signals. [2+6]

6. How is USB different than OTG? Justify the statement, "USB offers great expandability" with proper examples and diagrams. [2+6]

7. Explain the errors associated with ADC and DAC. [5]

8. Is data storage, data backup and data archiving the same thing? Explain with examples. [4]

9. What is electrostatic discharge? What guidelines can be adopted for protection against ESD? [2+6]

10. What is fault tolerance? What are the approaches to fault tolerance? [5]

11. What is a decoupling capacitor and a bypass capacitor? If you are designing a low frequency circuit, what kind of grounding method will you prefer and why? [2+2]

12. What is a good programming practice? Explain in brief. [5]

13. Explain the working of frequency meter. [5]

14. In your case study, what are the problems you indentified in the current plant/process. Give recommendations/suggestions from your side and draw the block diagram of the proposed system. [8]

Subject: - Instrumentation *(EX 504)*

✓ Candidates are required to give their answers in their own words as far as practicable.
✓ Attempt __All__ questions.
✓ The figures in the margin indicate __Full Marks__.
✓ Assume suitable data if necessary.

1. a) Define Measurement and Measurement System. [3]

   b) What are the characteristics of Bluetooth communication? [3]

2. a) A voltmeter whose accuracy is 2% of the full- scale reading is used on its 0-50V scale. It is used to measure a voltage of 15 V and 42V. Calculate the possible error of both readings. Comment on your answer. [3]

   b) Describe the measurement of inductance using Maxwell Bridge. [5]

3. What is the loading effect of the potentiometer? Show that the error will be maximum when the potentiometer slider is at potentiometer's midpoint. [8]

4. Draw and explain the block diagram of the closed- loop microprocessor-based instrumentation system. [4]

5. Assume that your group has decided to make microprocessor based instrumentation system for a cookies factory using an 8255 PPI card at base address 6000H in memory mapped I/Q mode for controlling purpose. You need to measure 3 temperature points and 1 pressure point.

   a) List out collected documents and components.
   b) List out different signals you need to drive and or can be directly connected to your interfacing circuit.
   c) Draw minimum mapping circuit for above system.
   d) What are addresses captured by your card? Generate the control word for the system.
   e) Write a program module for measuring temperature and control if the temperature is not in the range. Assume suitable data if necessary.   [1+1+2+1+3]

6. What do you understand by bit rate and baud rate? How can we exchange data between two Data terminal equipment using Rs232 serial interface? [2+6]

7. Describe the successive approximation method of analog to digital (A/D) conversion, taking an example of a 4-bit converter with a full range of 5V and input of 3.225V. [5]

8. What are the different noise coupling mechanism? How can you reduce the conductive noise coupling? [2+3]

9. Explain how we can avoid many failures that may occur on the circuit by using careful design, testable function and redundant architecture. [5]

10. What is trace density? How can you reduce crosstalk while routing signal traces in a PCB? [5]

11. A software company is planning to build new software useful for educational institutes to improve online teaching and learning activities. Which software development model do you suggest for them? Explain the procedure, advantages and limitations of the recommended software development model. [5]

12. Explain in details about ferrodynamic type frequency meter. [5]

13. Explain the existing instrumentation system of the industry involved in your case study. What was your recommendation for further improvement of the system? What are the advantages and limitations of the recommended system? [8]

Level	BE	Full Marks	80
Programme	BEI	Pass Marks	32
Year / Part	II / I	Time	3 hrs.

Subject: - Instrumentation *(EX 504)*

✓ Candidates are required to give their answers in their own words as far as practicable.
✓ Attempt __All__ questions.
✓ The figures in the margin indicate __Full Marks__.
✓ Assume suitable data if necessary.

1. a) Explain different working environment of an instruments. [3]
   b) Sketch the block diagram of data acquisition system. [3]

2. a) Explain the measurement of capacitance using Schering Bridge. [4]
   b) A moving coil ammeter has a uniform scale with 50 divisions and gives full scale reading of 5A. The instrument can read upto one-fourth of the full scale division with a fair degree of certainty. Determine the resolution of instrument in mA. [4]

3. Describe loading effect in a potentiometer and discuss the methods to reduce loading effect in a potentiometer. Also prove that linearity and sensitivity are two conflicting requirements in a potentiometer. [8]

4. What are the benefits of microprocessor based system? [4]

5. The address captured by 8255 PPI are C0C0H to C0C3H. Sketch the interfacing circuit with 8085 microprocessor in memory mapped I/O for same. What will be the control words for following configurations of 8255 PPI? [2+2+2+1+1]
   a) Port A: Mode 0 output
      Port B: Mode 0 input
      Port C: Mode 0 output
   b) Port A: Mode 1 output
      Port B: Mode 1 input
      $PC_{4,5}$: Output
   c) Port A: Bidirectional
      Port B: Mode 1 output
   d) Set PC_5 in BSR mode

6. a) Describe the functions of RS232C signals used in handshaking. [4]
   b) What is Enumeration in USB protocol? Describe different types of packets used in USB Protocol. [4]

7. Explain how do you interface a 10-bit DAC with 8085 in detail. [5]

8. Explain the different types of filtering mechanism used to reduce conductive noise coupling based on frequency. [5]

9. Explain reliability and fault tolerance in the context of circuit design. [5]

10. Explain the general rules to follow while doing the component placement. List out the factors that should be considered in routing the signal traces on printed circuit board (PCB). [3+2]

11. Explain about spiral model of software development life cycle in detail. [5]

12. Explain the construction and working principle of dynamometer type single phase power factor meter. [5]

13. Draw the complete block diagram of the industrial process control involved in your case study. What are the critical factors affecting the production you have noticed in the visited industry and what are the measures can you suggest for the same? Also mention advantages and disadvantages of suggested system. [8]

2079 Baishakh

Exam.		**Back**	
Level	BE	**Full Marks**	80
Programme	BEI	Pass Marks	32
Year / Part	II / I	Time	3 hrs.

Subject: - Instrumentation (*EX 504*)

✓ Candidates are required to give their answers in their own words as far as practicable.
✓ Attempt **All** questions.
✓ The figures in the margin indicate **Full Marks**.
✓ Assume suitable data if necessary.

1. Define signal. Compare between analog and digital signals. Explain data compression techniques. [2+2+2]

2. Explain static characteristics of measurement system: Accuracy and Precision. Describe the measurement of inductance using Maxwell Bridge. [3+5]

3. a) Explain the working of a capacitance transducer based on change in distance between plates. [4]

   b) The output of an LVDT is connected to 5 mV voltmeter through amplifier whose amplification factor is 250. An output of 2mV appears across terminals of LVDT when the core moves through a distance of 0.5 mm. Calculate the sensitivity of LVDT and that of whole set up. The milli voltmeter scale has 100 divisions. The scale can be 1/5 of the division. Calculate the resolution of the instrument in mm. [4]

4. Define microprocessor-based instrumentation system. Mention its advantages and disadvantages. [4]

5. Port A is designed as input for a keyboard with interrupt I/O and port B as output port for a printer with status check I/O of 8255 in mode 1 and I/O mapped I/O. [2+1+1+1+1+2]

   a) Draw the block diagram representation for the given statement with appropriate logic for CS' of 8255.
   b) Find the port addresses.
   c) Determine the control word to set up port A as input and port B as output.
   d) Determine the BSR word to enable $INTE_A$.
   e) Determine the masking byte to verify OBF_B' line for port B.
   f) Write initialization instructions and a printer subroutine to output characters that are stored in memory.

6. Mention the advantages of serial interface over parallel interface. Compare among RS 232, RS 422 and RS 423. [3+5]

7. Explain the interfacing of 8-bit DAC with 8085 MPU. [5]

8. Describe the different mechanism of energy coupling. [5]

9. Discuss about reliability and fault tolerance in the context of circuit diagram. [5]

10. Explain common impedance and trace density in routing signal traces. [5]

11. Describe prototyping model of software development with advantages and disadvantages. [5]

12. Explain the working principle of Electrodynamometer Wattmeter. [5]

13. Discuss the current mechanism of the industrial process control system involved in your case study with its block diagram. Draw the new instrumentation system that you have designed for betterment and explain it. Also mention advantages and disadvantages of implementing this new control system. [8]

Exam.		Back	
Level	BE	Full Marks	80
Programme	BEI	Pass Marks	32
Year / Part	II / I	Time	3 hrs.

Subject: - Instrumentation *(EX 504)*

✓ Candidates are required to give their answers in their own words as far as practicable.
✓ Attempt *All* questions.
✓ The figures in the margin indicate *Full Marks*.
✓ Assume suitable data if necessary.

1. Sketch the block diagram of generalized measurement system. [3]

2. a) If Voltmeter having accuracy of 1% and full scale range of 100v is used to measure (i) 80 v and (ii) 12 v. How accurate will the reading be? Comment your answer. [4]

   b) Explain the method used to measure inductance of coil with circuit diagram. [4]

3. Explain in detail about Optical Pyrometer with its advantages and limitations. [8]

4. Draw and explain the block diagram of microprocessor based instrumentation system. [4]

5. The addresses captured by 8255A PPI are D0D0H to D0D3H. What are the addresses captured by the card? Sketch the interfacing circuit with 8085 microprocessor in memory mapped I/O. Write the control word for following configuration. [1+2+2+1+2]

   a) Port A: Mode 1 input
      Port B: Mode 1 input
      Port $C_{6,7}$: output
   b) Set PC2 in BSR mode
   c) Port A: Bidirectional Port
      Port B: Mode 1 I/P

6. What are errors in serial data transmission? Explain error detection techniques in serial transmission. Explain USB-OTG in brief. [3+3+2]

7. Explain the operation of Flash type ADC with suitable example. [5]

8. Explain the Bluetooth network topology. [3]

9. Explain the various corrective strategies for different energy coupling mechanisms. [5]

10. What are the factors that describe reliability of an electronic system? Describe the working principle of decoupling capacitors in short. [3+2]

11. Write about the factors we should considered while doing component placement. How do you reduce crosstalk when routing signal traces on PCB? [3+2]

12. Explain the process of software development using Spiral model. [5]

13. Explain in detail about Induction type single-phase Energy meter. [5]

14. Explain the existing system involved in your case study with necessary block diagram. Recommend the changes that you deem necessary in the visited industry during your case study. [8]

Exam.		Regular	
Level	BE	Full Marks	80
Programme	BEI	Pass Marks	32
Year / Part	II / I	Time	3 hrs.

Subject: - Instrumentation (EX 504)

✓ Candidates are required to give their answers in their own words as far as practicable.
✓ Attempt _All_ questions.
✓ The figures in the margin indicate _Full Marks_.
✓ Assume suitable data if necessary.

1. a) Define analog and digital signals. Differentiate between analog and digital systems. [1+3]
   b) What is a data logger? What are its applications? [2]

2. a) Distinguish between static and dynamic characteristics of a measurement system. Describe various parameters used to study these characteristics. [4]
   b) Explain quality factor in Maxwell's bridge? Why is it not suitable to use a Maxwell bridge for measuring the inductance of a large quality factor $(Q > 10)$? [4]

3. a) Explain the working principle of LVDT for the measurement of displacement. [4]
   b) A capacitive transducer is made up of two concentric cylindrical electrodes. The outer diameter of inner electrode is 5 mm and the dielectric medium is air. The inner diameter of outer electrode is 5.1 mm. Calculate the dielectric stress when a voltage of 120V is applied across the electrode. Is it within the safe limit? The length of electrode is 20mm. Calculate the change in capacitance if electrode is moved through a distance of 2 mm. The breakdown strength of air is 4 kV/mm. [4]

4. Design an interface arrangement for 8085 microprocessor to map output ports in address space 85 H and input ports in address space 89 H. [4]

5. A dairy factory uses an 8255 PPI card at base address 5000 H.
   a) Explain how port address is changed with the change in address lines of 8085 connected with 8255. [2]
   b) How do you initialize a control word for 8255? [2]
   c) Write a program to read data from port B and display at port A and also, data from port C_U to C_L. [4]

6. a) Describe the various error detection techniques used in data communication. [4]
   b) Discuss the types of data packets used in USB protocol. [4]

7. How can you interface 10 bit DAC with 8085? Explain. [4]

8. What is the general principle of grounding? Explain the capacitive noise coupling mechanisms in electronic circuits. [1+4]

9. During circuit design process, what are some general technical dilemmas faced by engineers? Explain how an engineer can arrive at an optimal solution given the requirements of a customer. [5]

10. Define impedance matching and ground bounce? What are the different ways of reducing crosstalk when routing signal traces on a PCB? [2+3]

11. Explain spiral software development model with its advantages and disadvantages. [5]

12. Explain the constructional detail and working principle of electrical resonance type frequency meter. [5]

13. Discuss the current control system and methodology of the instrumentation system involved in your case study with necessary block diagram. What are the suggestions and recommendations you would provide to enhance the current system. Explain with necessary reasons why your recommendations should be implemented. [8]

Programme	BEI	Pass Marks	32
Year / Part	II / I	Time	3 hrs.

Subject: - Instrumentation (EX 504)

✓ Candidates are required to give their answers in their own words as far as practicable.
✓ Attempt All questions.
✓ The figures in the margin indicate Full Marks.
✓ Assume suitable data if necessary.

1. a) What are the essential components of Data Acquisition System? Explain it with the help of a block diagram. [4]

   b) What are the reasons to prefer pneumatic systems over hydraulic and electrical system? [2]

2. Obtain the balanced equation of an ac bridge and explain with diagram how Schering bridge can be used to measure unknown capacitance. [8]

3. What do you mean by piezoelectric effect? What are the different types of piezoelectric materials? Explain piezoelectric sensors in detail. [8]

4. Explain the types of microprocessor –based instrumentation system. [4]

5. Interface a printer and a keyboard in mode 1. Port A is designed as output for printer with status check I/O and port B is designed as input for keyboard with interrupt I/O.

   a) Draw the mapping circuit in I/O mapped I/O. [2]
   b) What are the port addresses captured by the PPI card. [2]
   c) Generate required control words. [1]
   d) Write initializing instructions and subroutines to read characters from keyboard and to send them to the printer. [3]

6. What are the errors in data communication? Compare and contrast Rs 232, Rs 422, and Rs 423 interfaces. [3+5]

7. Explain the working principle of successive approximation type of ADC. [5]

8. What do you understand by decoupling capacitor? Explain the capacitive shielding mechanism. [2+3]

9. What is fault tolerant system? Explain how careful design, testable functions and redundant architecture can avoid many failures in electronic circuits. [1+4]

10. Poor circuit layout and signal propagating principle may cause many problems in the circuit operation, manufacturing ease and probability of design errors. What factors will you consider while routing the signal traces on PCB. [5]

11. How does protyping model overcomes the short comings of waterfall model? Explain. [5]

12. What is wattmeter? Explain the working principle of induction wattmeter with diagram. [5]

13. Explain the existing system involved in your case study with the necessary block diagram. What was your recommendation over the existing system in terms of cost, manpower and plant automation? [8]

Exam.		Back	
Level	BE	Full Marks	80
Programme	BEL, BEX, BCT	Pass Marks	32
Year / Part	II / II	Time	3 hrs.

Subject: - Instrumentation I (EE 552)

✓ Candidates are required to give their answers in their own words as far as practicable.
✓ Attempt _All_ questions.
✓ The figures in the margin indicate _Full Marks_.
✓ Assume suitable data if necessary.

1. a) Define Instrumentation system with example. Explain the main elements of measurement system with the help of block diagram. [6]
   b) Differentiate between static and dynamic performance parameter with describing each parameter in brief. [4]
   c) A 1000 Hz bridge has the following constants: [6]
   Arm AB: R=1000Ω in parallel with C=0.5μF
   Arm BC: R=1000Ω in parallel with C=0.5μF
   Arm CD: R=200Ω in parallel with L=30mH
   Find the constants of Arm DA to balance the bridge express the result as a pure R in parallel with a pure C or L.

2. a) Explain how magnitude & direction of displacement can be measured using inductive sensor. [6]
   b) Explain working principle of capacitive sensor. Also explain how linear relation between output & input can be obtained in the case of capacitive sensor working on the principle of change in separation distance. [6]
   c) A strain gauge is bonded to a beam which is 12cm long & has a cross-sectional area of 3.8cm^2. The unstrained resistance & gauge factor of the strain gauge are 220Ω & 2.2 respectively. On the application of load, the resistance of the gauge changes by 0.015Ω. If the modulus of elasticity for steel is 207 GN/m^2, calculate (i) the change in length of the steel beam. (ii) the amount of force applied to the beam. [4]

3. a) Explain the ideal characteristics of operational amplifier & derive the expression for closed loop gain in non-inverting mode. [6]
   b) Explain the "loading effect" on input-output relationship in measurement made by a potentiometer. How can the error due to loading be minimized? [6]
   c) A capacitive transducer is made up of two concentric cylindrical electrodes. The outer diameter of inner cylindrical electrode is 3 mm and the dielectric medium is air. The inner radius of the outer electrode is 3.1mm. Calculate the dielectric stress when a voltage of 100V is applied across the electrodes. Is it within safe limit? The length of electrode is 20mm. Calculate the change in capacitance if the inner electrode is moved through a distance of 2mm. the breakdown strength of air is 3KV/mm. [4]

4. a) Explain the method of Digital-Analog conversion using R-2R ladder network. Why do we prefer to use this DAC instead of WRN type, explain. [6]
   b) What is data acquisition system. Explain function of the different components of digital data acquisition system. [6]
   c) An 8 bit DAC has maximum supply voltage 12V. Find
   i) What voltage change does LSB represent?
   ii) What voltage change does MSB represent?
   iii) What voltage does 10111100 represent? [4]

5. a) State and explain Sampling theorem. What is aliasing? Define the terms analog signal and discrete signal. [8]
   b) Write short notes on: [2 x 4]
   i) Frequency meter
   ii) Instrument transformer

***

Exam.		Regular	
Level	BE	Full Marks	80
Programme	BEL, BEX, BCT	Pass Marks	32
Year / Part	II / II	Time	3 hrs.

Subject: - Instrumentation I (EE552)

✓ Candidates are required to give their answers in their own words as far as practicable.
✓ Attempt All questions.
✓ The figures in the margin indicate Full Marks.
✓ Assume suitable data if necessary.

1. a) Explain the difference between static and dynamic characteristics of measurement system. Also explain following static performance parameter. [6]

    i) Accuracy
    ii) Precision
    iii) Sensitivity
    iv) Resolution
    v) Linearity

  b) Explain quality factor in Maxwell's bridge. Why Maxwell bridge cannot be used for the measurement of inductance having quality factor less than 1 and greater than 10 ($1 <= Q <= 10$). [6]

  c) An AC bridge has following constants

    Arm AB, R = 1000 Ω in parallel with C = 0.5 μF
    Arm BC, R = 3000 Ω
    Arm CD, unknown capacitance C_x in series with R_x
    Arm DA, C = 0.55 μF
    Supply frequency 1000HZ

    Determine the unknown resistance Rx and capacitance Cx to make the bridge balance. [4]

2. a) Discuss the methods to reduce loading effect in a Potentiometer. Also prove that linearity and sensitivity of potentiometer is two conflicting requirements. [6]

  b) Explain how the nonlinear characteristics of a capacitive transducer used for the measurement of displacement using the principle of change in capacitance due to change in distance between plates can be made linear. [6]

  c) A rotatory POT having 100 turns and total resistance of 1000 Ω is made up of wire of 1 meter length. It has the power limit of 10 watt. Calculate the maximum excitation voltage that can be applied to the POT. Also calculate the resolution (in volts) of the potentiometer under that maximum excitation. [4]

3. a) Explain the working principle of Piezo-electric sensor and derive the expression for the output voltage in the piezo-electric Sensor. [6]

  b) What are the characteristics of an ideal operational amplifier? Derive the expression for close loop gain of operational amplifier in inverting and non-inverting mode. [6]

  c) Design an integrator circuit which will produce a ramp voltage of -20V/ms. [4]

4. a) Explain how analog to digital conversior can be achieved by using dual Ramp ADC. [8]

   b) A 6-bit DAC has 20 kΩ resistance in MSB position. The converter is designed with weighted resistor network. The reference voltage is 12 V. The output of the resistive network is connected to an op amp with a feedback resistance of 5 kΩ. What will be the analog output for a binary input of 111010? [8]

5. a) State and explain Nyquist criterion. Also explain the phenomenon a aliasing and the way to eliminate it. [4]

   b) Explain the function of sample and hold circuit with the help of circuit diagram. [6]

   c) Explain the construction and working of single phase electrodynamometer wattmeter with expression for ac operation. [6]

Exam.	Back		
Level	BE	Full Marks	80
Programme	BEL, BEX, BCT	Pass Marks	32
Year / Part	II / II	Time	3 hrs.

Subject: - Instrumentation I *(EE552)*

✓ Candidates are required to give their answers in their own words as far as practicable.
✓ *Attempt __All__ questions.*
✓ *The figures in the margin indicate __Full Marks__.*
✓ *Assume suitable data if necessary.*

1. a) Sketch basic blocks of a generalized measurement system. Write function of each block. [6]

   b) Explain analog and digital modes of operation. Why digital instruments are becoming popular now? [4]

   c) An AC bridge circuit is working at 1000 Hz. Arm AB has 0.2 µF pure capacitance, arm BC has 500 Ω pure resistance, arm CD contains an unknown impedance and arm DA has 300 Ω resistance in parallel with 0.1 µF capacitor. Find the constant of arm CD considering it as a series circuit. [6]

2. a) What are the different parameters to define the static performance of an instrument? Distinguish between accuracy and precision of an instrument with a suitable example. [6]

   b) A strain gauge is bonded to a beam which is 12 cm long and has a cross sectional area of 3.8 cm². The unstrained resistance and gauge factor of the strain gauge are 220Ω and 2.2 respectively. On the application of load the resistance of the gauge changes by 0.015Ω. If the modulus of elasticity for steel is 207 GN/m², calculate [4]

      (i) the change in length of the steel beam
      (ii) the amount of force applied to the beam.

   c) Explain the working principle of a thermocouple for measuring temperature. State different laws associated with it. [6]

3. a) Explain the principles of operation of capacitive sensor. Also explain how linear relation between output and input can be obtained when capacitive sensor works on the principle of change in separation distance. [6]

   b) Explain the features of instrumentation amplifier and derive the expression for its Gain. [6]

   c) State and explain sampling theorem. [4]

4. a) A 6 bit DAC has a reference voltage of 11 volts if it uses [4]

      (i) R-2R ladder network.
      (ii) Weighted resistive network.
      Find the minimum value of resistance in both cases such that the output current does not exceed 10mA.

   b) What are the drawbacks of weighted resistor network? With suitable diagram explain the R-2R ladder digital to analog converter. [6]

   c) What is the purpose of using a S/H circuit in A/D conversion system. Explain its operation along with basic circuit and characteristic waveform. [6]

5. a) Describe the construction and working principle of a single phase induction type energy meter. Show that the total number of revolution made by disc during particular time is proportional to the energy consumed. [8]

   b) Explain the working principle of instrument transformer. Also explain why the secondary winding of current transformer should never be kept open circuited while primary is energized? [8]

Subject: - Instrumentation II (EX 602)

✓ Candidates are required to give their answers in their own words as far as practicable.
✓ Attempt All questions.
✓ The figures in the margin indicate Full Marks.
✓ Assume suitable data if necessary.

1. a) Explain microprocessor based instrumentation system with its block diagram. [5]

   b) List out the factors to be consider while selecting a processor. [3]

2. An 8255A PPI card is connected to 8085 microprocessor has system as shown in figure below in which control word is stored in address of F3H. [1+3+2+2+2]

   a) What are the addresses captured by 8255A PPI card?
   b) Draw the minimum interfacing circuit.
   c) Write down the control word to initialize the 8255A PPI card.
   d) Write down the status word format for 8255A PPI card for the system.
   e) Write down BSR control word to initialize port A interrupt request.
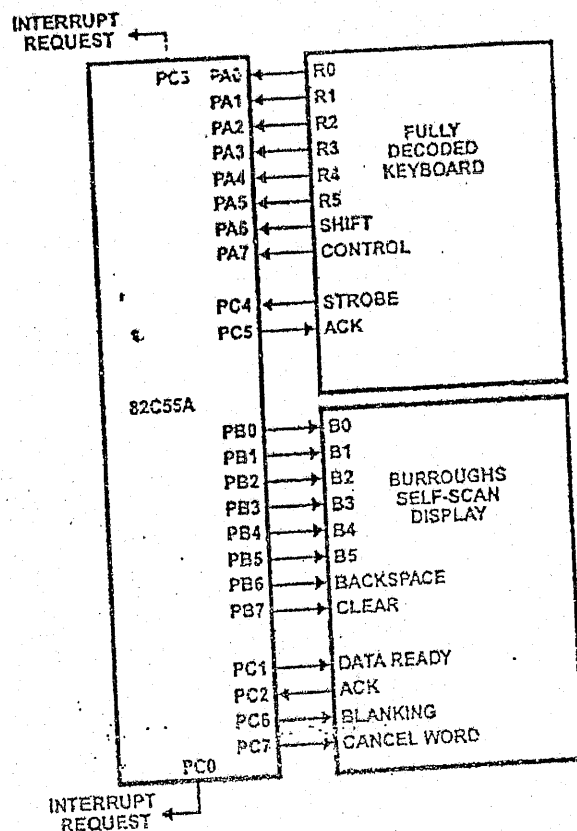

3. a) What is the importance of RS 232-C in serial communication? Explain the RS 232-C working principle with its different types of signals. [1+4]

b) What is USB? Explain its common packet fields. [1+3]

4. a) Describe INL and DNL error of data converter with necessary illustrations. [4]

   b) With necessary diagram, Explain interfacing of 8 channel 8 bit ADC with 8085 microprocessor along with timing diagram. [5]

5. a) Discuss analog communication system and digital communication system with an appropriate block diagram. [4]

   b) Mention the characteristics of Bluetooth. Differentiate between piconet and scatternet network topology used in Bluetooth environment. [4]

6. a) What will happen to the electronic circuit connected in single point ground system when operated in frequency greater than 1 MHz? Explain with necessary illustration. [3]

   b) Explain how decoupling capacitor can be used to suppress the transient current. What effects do you observe when very large decoupling capacitor is connected in your circuit? [3+2]

7. a) What is reliability? List out the factor affecting reliability. [1+2]

   b) What are the factors that need to be considered while designing high speed circuit. [3]

8. How do you reduce crosstalk when routing signal traces on a PCB? [4]

9. Explain different types of software bugs that might exist in software. How these bugs can be identified while implementing different types of software testing. [6]

10. Explain existing industrial process control system involved in your case study with necessary block diagram. Recommend the changes that you deem necessary for the improvement of overall system performance. Explain why management should implement these changes. What are the probable problems you might face after implementation of your recommended system? [12]

Exam.		**Regular / Back**	
Level	BE	Full Marks	80
Programme	BEL, BEX, BCT	Pass Marks	32
Year / Part	III / I	Time	3 hrs.

Subject: - Instrumentation II *(EX 602)*

✓ Candidates are required to give their answers in their own words as far as practicable.
✓ Attempt *All* questions.
✓ The figures in the margin indicate *Full Marks*.
✓ Assume suitable data if necessary.

1. a) Define closed loop MBI system with suitable example. [2]

   b) Among full or partial address decoding, which method of address decoding do you choose while interfacing memory device? Give reasons with suitable example. [4]

2. Interface a parallel bus centronics printer with 8085 microprocessor using 8255A in mode 1 output configuration.

   a) Draw the necessary interfacing circuit required for this purpose using 8255 PPI in handshake mode. [3]

   b) Determine port address as per your chip select logic. [2]

   c) Determine the control word required for printing operation. [2]

   d) Draw the timing waveform for transferring data to the printer. [2]

   e) Write an ALP to print characters whose ASCII code is available in memory location from 9000H. [3]

3. a) Explain the transferring of serial data using asynchronous transfer. One character is formed with 7-bit ASCII code, 1-bit start, 2-bit stop and 1-bit parity. [4]

   b) Describe up to date USB standards. Differentiate different USB data transfer mechanisms with suitable example of each. [6]

4. a) Explain the interfacing technique of 12-bit DAC to 8-bit Data bus. [6]

   b) Explain different types of errors in ADC & DAC. [4]

5. Explain Bluetooth network topology in detail. Why optical fiber has high demand in the field of communication. [4+2]

6. Explain different types of Energy coupling mechanisms with suitable example of each. How can a circuit be protected from ESD? [6]

7. What do you mean by reliability in a circuit design? Discuss how the reliablity can be achieved by incorporating fault tolerance. [6]

8. a) What is PCB? Write down the advantages of PCB. [1+2]

   b) How do you reduce cross talk when routing signal traces on a PCB? [3]

9. Define roll back recovery with suitable example. Explain the spiral model software development cycle. [2+4]

10. Explain your industrial visit carried out on your case study in terms of existing system circumstances, problem identification and analysis, recommendation plan, requirement and feasibility analysis of the recommended plan and rollback plan if necessary. Also list out the different advantages of the proposed plan in terms of technology, production rate, quality assurance, cost-benefit and return on investment (ROI) for the particular industry. [12]

Subject: - Instrumentation II *(EX602)*

✓ Candidates are required to give their answers in their own words as far as practicable.
✓ Attempt **All** questions.
✓ The figures in the margin indicate **Full Marks**.
✓ Assume suitable data if necessary.

1. a) What do you mean by interfacing? A RAM chip of 512 bytes is given for interfacing with 8085 microprocessor system. Design an address decoding hardware for the same. [1+3]
   b) What is an interrupt driven data transfer? Explain the operation of interrupt driven data transfer with flowchart of interrupt subroutine and main programme sequence. [1+5]

2. A/D converter requires signal to start the conversion and indicates with the end of conversion signal. 8255A PPI is interfaced with 8085 microprocessors at 80H. Microprocessor reads 8-bits O/P data of the ADC at port A and display the same data to eight LED's connected at port B of 8255A. State any assumptions made.

   a) Identify the address captured by the card [1]
   b) Determine the necessary control words [2]
   c) Draw the schematic interfacing circuit [2]
   d) Write a program to perform the operation [3]

3. a) What is the importance of RS232-C in serial communication? Determine the time required to transmit a string: "Life is beautiful." using asynchronous serial data transfer method in baud rate of 4800 Baud. Suppose a character has 7 bits data, one bit start bit, one bit stop bit and one bit even parity bit. [2+4]
   b) Differentiate between USB 1.0 and USB 2.0. [1]

4. Interface a 10-bit DAC with 8255 PPI and 8085 CPU running at 2 MHz. Write an ALP to generate a triangular wave of frequency 500 Hz using the same interfacing circuit. The amplitude of the triangular wave should be +5V. [8]

5. a) 'In satellite communication the uplink frequency and downlink frequency are different.' Why? Explain the Bluetooth network topology. [1+3]
   b) Compare data archiving and data storage. With the block diagram describe the characteristics of data logger. [1+4]

6. Explain different types of filtering based on frequency, mode (common and differential) and amplitude (surge suppression). [6]

7. While selecting a processor for an embedded system product, you have to specify the performance, number of peripherals functions, memory and tool support to determine the appropriate processor for the product. As a system designer, provide a technical explanation for each of these factors required to achieve the proper functional design. [6]

8. What are general guidelines to avoid the crosstalk while routing signal traces on Printed Circuit Board? What are the problems due to impedance mismatch? [4+2]

9. What is software reliability? Compare waterfall and prototyping model. Describe Embedded and Real Time Software. [2+3+3]

10. Answer the following questions with regard to your case study.
    a) Design a proposed system using microprocessor/microcontroller input/output devices, interfacing process, communication protocols, data converters and handshake signals with neatly labeled block diagram. [6]
    b) Mention different types of problems that might occur after implementing the recommended setup and probable mitigating factors to overcome these problems. [6]

✓ Candidates are required to give their answers in their own words as far as practicable.
✓ Attempt *All* questions.
✓ The figures in the margin indicate *Full Marks*.
✓ Assume suitable data if necessary.

1. a) Describe various well-known techniques while interfacing an I/O device with a personnel computer system. [3]
   b) Differentiate I/O mapped I/O and memory mapped I/O with suitable examples. How can you generate I/O mapped and memory mapped signals using IO/M, RD and WR signals? [5]

2. Explain the different schemes of parallel data transfer with suitable timing diagram. Explain the functional block diagram of 8255A PPI with neat diagram. [4+4]

3. a) Describe the various error detection techniques used in serial data transmission. [3]
   b) Explain the functions of USB Host, USB Hub and USB Device. Discuss different packets used in USB protocol. [5]

4. What are the different types dynamic errors in ADC and DAC? What will be the control word for interfacing as shown figure below? Also write the subroutine program to read the digital data from ADC. [4+6]
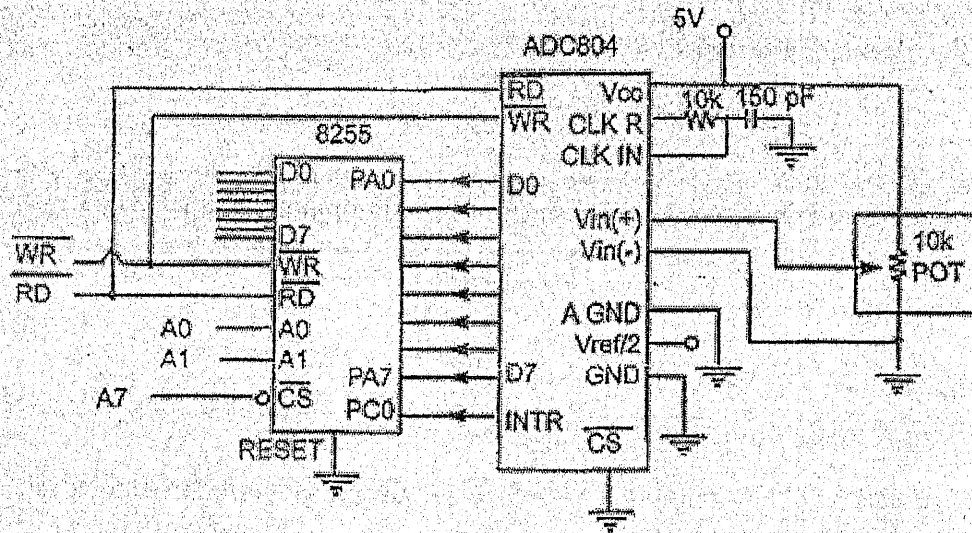

5. Explain the advantages of optical fiber over copper wire? Explain each block of data logger. [2+6]

6. a) What are the different noise coupling mechanism? [3]
   b) How can you reduce the conductive noise coupling? Explain in detail. [3]

7. What are general approaches of establishing requirements for circuit design? What are the two factors that drive reliability of a product? [4+2]

8. Poor circuit layout and signal propagating principle may cause many problems in the circuit operation, manufacturing ease and probability of design errors. What factors will you consider while routing the signal traces on PCB. [6]

9. Explain Prototyping Model for software development in brief. Explain different phases of introduction of bugs in software. [3+5]

10. Describe the different processing plants that you have studied in case study. With neat and clean block diagram explain how the further improvement of these plants can improve the performance of the overall system. [12]

***

Exam.		Regular		
Level	BE		Full Marks	80
Programme	BEL, BEX, BCT		Pass Marks	32
Year / Part	III / I		Time	3 hrs.

Subject: - Instrumentation II *(EX602)*

✓ Candidates are required to give their answers in their own words as far as practicable.
✓ Attempt *All* questions.
✓ The figures in the margin indicate *Full Marks*.
✓ Assume suitable data if necessary.

1. a) Define Microprocessor Based Instrumentation System. Explain, with suitable example, why microcomputer is an important consideration in instrumentation design. What are the basic features of microprocessor based instrumentation system? [1+2+2]

   b) Explain the interrupt driven data transfer scheme. [3]

2. a) List out the technical benefit of using 8255 PPI in MBI system. Explain PCI bus in brief. [2+2]

   b) Explain how the base address of 8255A is changed with change in address lines of 8085 connection with 8255A? [3]

3. a) Describe the functions of RS-232C signals used in handshaking. Why RS-422A can transfer data in longer distance and at higher rate than RS-232C? [1+3+1]

   b) Explain USB-OTG in brief. Discuss the types of data packets in USB protocol. [2+3]

4. a) Why analog signals need to be transferred to digital? What are the errors associated with ADC and DAC? [1+3]

   b) Explain the way you can interface a 10-bit DAC with 8085. [4]

5. a) Explain the characteristics of data logger. [4]

   b) Explain the Bluetooth network topology. [4]

6. a) How can you protect a circuit from electrostatic discharge? [2]

   b) A new model sports car had a disconcerning problem: occasionally the dashboard lights would all illuminate simultaneously. Two service calls later, replacement of a wire harness for the spark plugs solved the problem. Explain what the coupling mechanism was and how it can be reduced? [6]

7. Kathmandu Milk Supply Scheme has planned to automatize the milk refilling process. As an engineer, what would be your design considerations to reduce the probability of failure of the system? [5]

8. What is crosstalk? Explain the guidelines for low power design. [1+5]

9. Explain the approach for good programming practice. What are the basic criteria for selecting a company for purchasing reliable software? [4+4]

10. Discuss the current control mechanism of the industrial process control system involved in your case study with the help of block diagram. What was your recommendation for further improvement of this system? Explain why the management should implement your recommendation. Do you foresee any problems after implementing this control system? [12]

Exam.		**Back**	
Level	BE	**Full Marks**	80
Programme	BEL, BEX, BCT	Pass Marks	32
Year / Part	III / I	Time	3 hrs.

Subject: - Instrumentation II (EX602)

✓ Candidates are required to give their answers in their own words as far as practicable.
✓ Attempt **All** questions.
✓ The figures in the margin indicate **Full Marks**.
✓ Assume suitable data if necessary.

(1) If the speeds of I/O devices do not match the speed of the microprocessor, what types of data transfer techniques are used? Describe them with necessary block diagrams and control signals. [6]

(2) A microprocessor kit has an onboard 8255. Interface to the 8255 eight single-pole-double-throw (SPDT) switches numbered S0 to S7 and a seven segment common anode LED display. Draw the complete circuit setup. Define clearly the functions of all ports, write a program to initialize 8255, detect a switch closure, and display the value of the switch number on the LED display. [8]

(3) (a) Explain the design of a USB to RS-232 adapter with the aid of a neat circuit diagram, appropriate voltage translation chips, and necessary handshake/control signals. [6]

(b) What is the time required for transmission of a character with one start bit, seven data bits, one parity bit, and one stop bit with 1200 baud? [2]

(4) The data converter that is being used in your project is suffering from differential nonlinearity and harmonic distortion. Instead of purchasing a new converter, you are required to use the defective converter. Discuss technical measures that can be implemented to mitigate the aforementioned errors. [6]

(5) Signals from three different transducers need to be recorded in a data logger. The analog signals supplied by the three transducers are dual polarity (− 50 mV to 50 mV) having frequencies of 5 KHz, 10 KHz and 15 KHz. Explain the design of the following stages of the data logger:

(a) Input scanner stage of the data logger such that it can appropriately sample the incoming signals [3]

(b) Signal conditioner stage if the 8-bit ADC used inside the data logger accepts only positive polarity signals ranging from 0 volts to 5 volts. [3]

(6) Explain the mechanism of filtering line noise with the aid of chokes. How does a choke differentiate between the signal that it needs to pass and the noise that it needs to suppress? Describe the circumstances where chokes are preferred over other noise filtering approaches. [8]

(7) During circuit design process, what are some general technical dilemmas faced by engineers? Explain how an engineer can arrive at an optimal solution given the requirements of a customer? [8]

(8) (a) In a multi-layer PCB, describe how grounding is performed and how coupling amongst the layers is minimized. [4]

(b) A faulty computer motherboard has severe clock jitter. The crystal producing the clock pulses is functioning properly, but clock signals arriving at various motherboard chips suffer from jitter. Discuss the source of the problem and provide some remedies. [4]

(9) (a) Discuss the shortcomings of existing software development models, and suggest measures to overcome them. [5]

(b) The testing time for software cannot be too long, yet software needs to be thoroughly tested before it can be commercialized. Explain how this paradox is overcome in a real-world software development environment. [5]

(10) Answer the following questions with regard to your case study:

(a) Discuss the main architectural differences between the existing system and the proposed system. [2]

(b) Does your proposed system use a microcontroller or a microprocessor? Justify your choice, and make a neatly labeled block diagram of your proposed system. [3]

(c) In your proposed system, explain in detail the interfacing process of peripheral devices with the microcontroller or microprocessor in terms of data format, data rate, data converters, communication protocols, timing diagrams, and handshaking signals. [5]

(d) List the technical drawbacks present in your proposed design. [2]

| Exam.	Regular		
Level	BE	Full Marks	80
Programme	BEL, BEX, BCT	Pass Marks	32
Year / Part	III / 1	Time	3 hrs.

Subject: - Instrumentation II *(EX602)*

✓ Candidates are required to give their answers in their own words as far as practicable.
✓ Attempt **All** questions.
✓ The figures in the margin indicate **Full Marks**.
✓ Assume suitable data if necessary.

1. a) What do you understand by a closed loop MBI system? [1]
    b) Differentiate unique vs non unique address decoding. [4]
    c) Specify the addresses for the ports of 8255PPI shown in figure below. [3]
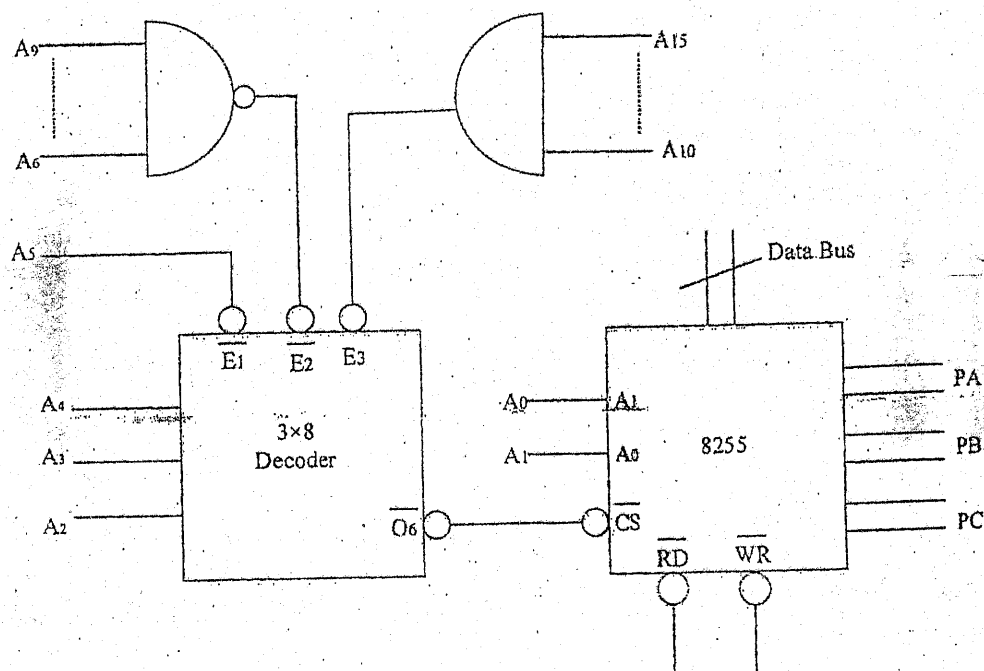

2. a) List out the technical benefits of using 8255 PPI in a MBI system. [2]
    b) With a neat timing diagram and an appropriate example, explain the operation of 8255 PPI in mode 2. You should clearly show the necessary control signals and an interfacing circuit to connect 8255PPI to 8085 microprocessor. Also write the necessary control words to configure the 8255 in this fashion. [3+3+2]

3. a) What are the errors associated with serial data transfer and their error checking mechanism? [4]
    b) What is USB on the Go? Write short note on USB packet types. [1+3]

4. a) With necessary illustrations, explain the cause behind the DNL and INL errors in A/D and D/A conversion. [2]
    b) Interface a suitable DAC using 8255 PPI to a 8085 microprocessor to generate a square wave oscillating between 0V and -5V having a frequency of 1 KHz. Show the interfacing circuit and the necessary program. [3+3]

5. A datalogger receives signals from Bluetooth Scatternet which consists of different Bluetooth devices. The data retrieved needs to be transmitted via option fiber links.

    a) What is frequency hopping? Relate it with the Bluetooth technology. [2]
    b) Write in brief about the typical characteristics of a datalogger. [3]
    c) Draw a neat and labelled block diagram of the complete system. [2]
    d) Compare and contrast the terms data archiving and data storage. [1]

6. a) Explain the remedial strategies for various energy coupling mechanisms. [4]

    b) An electronic circuit receives noise from a switching element. If voltage on the switching device swings from 4V to 6V within 100μs, during which current makes a transition from 10 μA to 25 μA in 10 ns, what might be the noise coupling mechanism? Identify it using suitable calculations. [2]

7. DOECE is looking for an expert engineer to work in the research projects of high frequency, high speed applications. What guidelines would you suggest as an engineer to design high speed and high frequency circuits? Explain in detail. [6]

8. Circuit boards combine electronic components and connectors in to a functional system through electrical connections and mechanical support. Explain the factors that need to be considered while creating traces to connect the electronic components. [6]

9. A software company is planning to make new software. Suggest good procedure to develop software. Explain different types of software models. [3+5]

10. Draw the complete block diagram of the industrial process control involved in your case study. What are the critical factors affecting the production you have noticed in the visited industry and what are the measures can you suggest for the same? Also mention advantages and disadvantages of suggested system. [12]

| Exam.		Regular	
Level	BE	Full Marks	80
Programme	BEI, BAS	Pass Marks	32
Year / Part	II / I	Time	3 hrs.

Subject: - Control System *(EE 504)*

✓ Candidates are required to give their answers in their own words as far as practicable.
✓ Attempt *All* questions.
✓ The figures in the margin indicate **Full Marks.**
✓ Assume suitable data if necessary.

1. a) Define control system. Why closed loop system has better disturbance rejection capability than open loop? Illustrate your answer. [2+4]

   b) Find the transfer function $\dfrac{x_2(s)}{F(s)}$. Also draw the F-V analogous circuit. [8+2]
2. a) Determine the transfer function C(s)/R(s) of the following block diagram using Block Diagram Reduction Technique. [8]
   b) The open loop transfer function of a unity feedback system is given by ;

   $$G(S)H(S) = \frac{K}{s(1+ST)}$$

   Where , K is gain constant and T is time constant. With the gain multiplied by a factor K_1 the maximum overshoot of the system is increased from 25% to 50%. Determine K_1. [8]

3. a) The open loop transfer function of a unity feedback system is given by;

$$G(S) = \frac{k}{s(s+3)(s^2+s+1)}$$

Determine the value of k that will cause sustained oscillation in the closed loop system. Also determine the oscillation frequency. [6]

b) Sketch Root locus plot for the system having open loop transfer function

$$G(s)H(s) = \frac{k(s+1)}{(s^2+2s+2)(s^2+2s+5)}$$

[10]

4. a) Using Nyquist criteria, determine the stability of the closed loop system whose open loop transfer function is given by: [6+2]

$$G(s)H(s) = \frac{50}{(s+1)(s+2)} \; ; \text{ also find the phase margin.}$$

b) The differential equations related to the system are $\frac{dx_1}{dt} = -3x_1 + x_2$ and $\frac{dx_2}{dt} = -2x_1 + u$ for t > 0. Its output is given by $y = x_2$. Derive the transfer function of the system with these differential equation and check stability. [8]

5. a) Discuss principle and working performance of PD controller. [4]

b) Design a lag compensator for unity feedback system with open loop transfer function.

$$G(s) = \frac{2}{s(s+1)(s+2)}$$ such that velocity error constant at leat 5 sec^{-1}, phase margin at least 40° and gain margin at least 10 dB.

Subject: - Control System *(EE 504)*

✓ Candidates are required to give their answers in their own words as far as practicable.
✓ Attempt *All* questions.
✓ The figures in the margin indicate *Full Marks*.
✓ Assume suitable data if necessary.

1. a) Define control system with its importance. What are the components of closed loop systems? Explain. [5]

   b) How would a closed loop system differ from open loop one on its step response? Explain with the required mathematical expression. [3]

   c) Discuss briefly about PI controller and its effect on time response. [4]

2. a) Find the transfer function $\frac{Q_1(s)}{T(s)}$ for the given rotational mechanical system. Also draw analogous electrical networks. [10]
   b) Determine the transfer function Y(s)/R(s) for the block diagram below by signal flow graph method. [6]
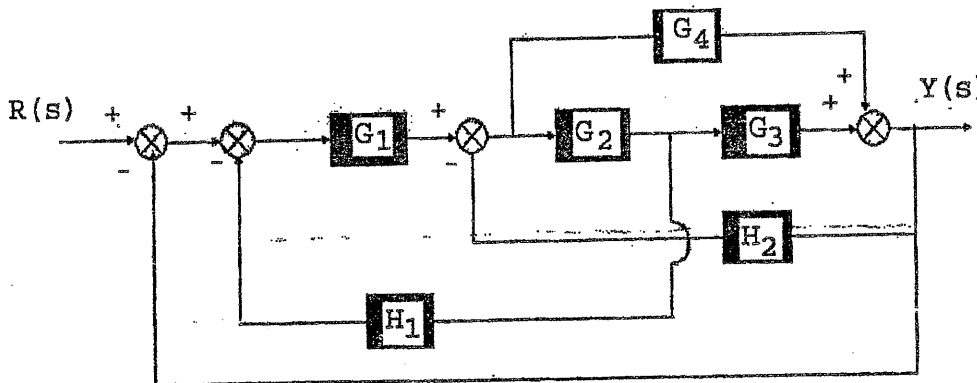

3. a) The open loop transfer function of a unity feedback system is given by

$$G(s) = \frac{108}{s^2(s+4)(s^2+3s+12)}$$

   Find the static error coefficients and steady state error of the system when subjected to an input given by $r(t) = 2+5t+8t^2$. [6]

   b) Construct Routh array and determine the stability of the system whose characteristics equation is $s^6+3s^5+4s^4+6s^3+5s^2+3s+2$. Comment on the location of the roots characteristics equation. [6]

c) For a second order system given by the transfer function. Find the: rise time, peak time, settling time and maximum overshoot. [4]

$$G(s) = \frac{25}{s^2 + 8s + 25}$$

4. a) Sketch the root locus of the system having open loop poles and zero plot as shown below. And the range of parameter K. for stability. [8]
b) Using Nyquist criterion determine the stability of the feedback system whose open loop transfer function is given by $G(s)\,H(s) = \dfrac{60}{(s+1)(s+2)(s+5)}$ [8]

5. a) A system is described by the transfer function $\dfrac{Y(s)}{U(s)} = \dfrac{10(s^2 + 2s)}{(s^3 + 5s^2 + 8s + 15)}$ .Find its state and output equation in matrix form. [8]

b) Design a suitable phase lead compensating network for $G(s) = \dfrac{k}{s(1+0.1s)(1+0.001s)}$ to meet the following specification. [12]

$K_v = 1000\ Sec^{-1}$

$P.M \geq 45°$

Subject: - Control System *(EE504)*

✓ Candidates are required to give their answers in their own words as far as practicable.
✓ *Attempt All questions.*
✓ *The figures in the margin indicate Full Marks.*
✓ *Assume suitable data if necessary.*

1. a) Draw the block diagram of closed loop control system and briefly explain each component. [5]

   b) How feedback effect the stability of a control system? Explain with suitable example. [3]

   c) Explain PID controller with block diagram and its transfer function, along with its characteristics. [6]

2. a) Find the transfer function of mechanical system given below taking output as velocity of mass M_2 also draw F-V and F-I analogy electrical networks. [8]
   b) Using block diagram reduction technique, find the tr. Function $\dfrac{C(s)}{R(s)}$ of the fig given below. [8]
3. a) What is the importance of error coefficients in design of control system? For a unity feedback system having $G(s) = \dfrac{k(s+2)}{s^2(s^2+7s+12)}$, determine [6]

   (i). Type and order of the system

   (ii) Error coefficients and

   (iii)Steady state error for parabolic input $r(t) = 2.5\ t^2$

   b) Check for stability of the system using R-H Criterion whose characteristic equation is given by: [6]

   $$q(s) = s^5 + 2s^4 + 2s^3 + 4s^2 + s + 2 = 0$$

   Also Determine the number of poles in R-H plane and in imaginary axis.

4. a) The open loop transfer function of a control system is given by

   $$G(S)H(S) = \dfrac{k}{s(s+4)(s^2+4s+20)}$$

   Sketch the root locus for $0 \le K \le \infty$ and determine the breakway point, the angle of departure from complex poles and the stability conditions. [10]

   b) What is Nyquist Contour? Map the Nyquist contour of open loop transfer function $G(s) = \dfrac{300}{(S+3)(S+1)(S+2)}$ into G(s) plane and apply Nyquist criterion to check the stability of closed loop system. [8]

5. a) Obtain a state-space representation of the mechanical system shows in the figure where external force F is the input and the displacements of the masses x_1 and $x_2 x_1$ and x^2 are the outputs. [8]
   b) Design a suitable lag compensating network for $G(S) = \dfrac{k}{s(s+2)(s+20)}$ to meet the following specification. [12]

   $Kv = 20 Sec^{-1}$

   $P.M \ge 35°$

Subject: - Control System *(EE 504)*

✓ Candidates are required to give their answers in their own words as far as practicable.
✓ Attempt *All* questions.
✓ The figures in the margin indicate *Full Marks*.
✓ Assume suitable data if necessary.

1. a) Define control system. Draw the block diagram of closed loop control system and explain the role of each block briefly. [1+4]

   b) Why closed loop system is faster than open loop control system? Explain. [3]

   c) What is derivative feedback controller? Draw block diagram and find the transfer function and hence show its effect on transient performance of the system. [6]

2. a) Find the transfer function, $\dfrac{\theta_2(S)}{T(S)}$, for the mechanical rotational system of figure below. Also draw the T-V and T-I analogy circuit of the system. [8]
   b) Determine the transfer function C(s) / R(s) of the block diagram given below, using block diagram reduction technique. [8]
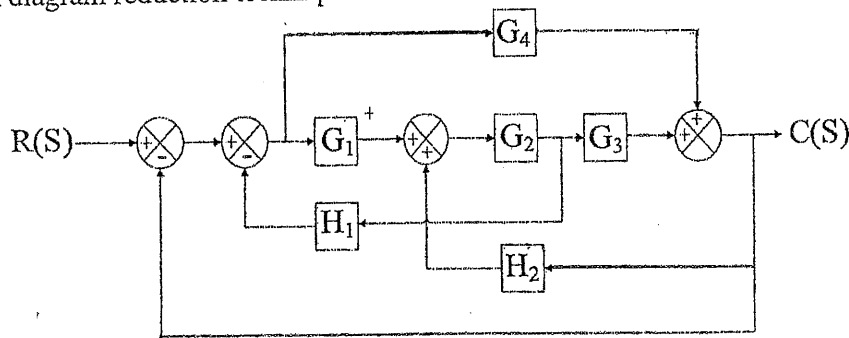

3. a) Using R-H criteria, tell how many roots of polynomial is in right half s-plane, in left half s-plane and on jw axis. Comment on stability. [8]

   $$S^5 + 4S^4 + 2S^3 + 8S^2 + S + 4 = 0$$

   b) The open loop transfer function of a unity feedback system is given by:

   $$G(S)H(S) = \frac{K}{S(1+ST)}$$

   Where, K is gain constant and T is time constants. With the gain multiplied by a factor K_1 the maximum overshoot of the system is increased from 25% to 50%. Determine K_1. [6]

4. a) Sketch the root locus of unity feedback system with $G(s) = \dfrac{k(s-4)}{(s^2 + 6s + 18)}$, hence find the range of parameter k for stability of the closed loop system. Does the system exhibit sustained oscillation for any value parameter k? [8]

b) The open loop transfer function of a system is $G(s)H(s) = \dfrac{1+4s}{s^2(1+s)(1+2s)}$.

Determine the stability of open and closed loop system using Nyquist Criterion. [8]

5. a) A system is characterized by the equation

$$\frac{Y(S)}{U(S)} = \frac{20(4s+2)}{s^3 + 5s^2 + 8s + 2}$$

Find its state and output equation and express in matrix form. [8]

b) The forward path transfer function of unity feedback system is given by $G(s) = \dfrac{K}{s(s+10)(s+2)}$. Design a suitable location of pole zero pair for a lead compensating network so that phase margin is at least 50° and velocity error constant is maintained at least 800 sec^{-1}. [12]

✓ Attempt *All* questions.
✓ The figures in the margin indicate *Full Marks*.
✓ Assume suitable data if necessary.

1. Define control system with its importance. State an example of close and open loop system that you see in everyday life with block diagram. [4+4]

2. Find the transfer function of given mechanical system. Draw the analogous electrical circuit of the mechanical system given below. [2+6]
3. Determine the transfer function Y(s)/R(s) for the block diagram below by reduction method. [8]
4. Construction Routh array and determine the stability of the system whose characteristics equation is $s^6+2s^5+8s^4+12s^3+20s^2+16s+16$

   Comment on the location of the roots characteristics equation. [8]

5. Sketch the root locus of following system and determine the range of k for which the system will be stable. [6+2]
6. Find the Gain crossover frequency, phase crossover frequency, gain and phase margin using Bode plots for the following transfer function. [8]

$$G(s) = \frac{1000}{(1+0.1s)(1+0.001s)}$$

7. Sketch the polar plot of the given system. [8]

$$G(s) = \frac{20}{s(s+1)(s+2)}$$

8. For a second order system given by the transfer function. Find the: rise time, peak time, settling time and maximum overshoot. [8]

$$G(s) = \frac{25}{s^2 + 8s + 25}$$

9. Write short notes on: [2×4]

   a) PID controllers in control system.
   b) Lead and Lag Compensators.

10. Discuss the advantages and limitations of state space analysis of control systems. Find the transfer function for the system represented by following state space model. [2+6]

$$\dot{x} = \begin{bmatrix} -3 & 1 \\ -2 & 0 \end{bmatrix} x + \begin{bmatrix} 0 \\ 1 \end{bmatrix} u$$

$$y = \begin{bmatrix} 1 & 0 \end{bmatrix} x$$

✓ Candidates are required to give their answers in their own words as far as practicable.
✓ Attempt *All* questions.
✓ The figures in the margin indicate **Full Marks**.
✓ *Semi log/ Graph paper will be provided.*
✓ Assume suitable data if necessary.

1. a) Stating an example of a system that you see in your field of study, explain what do you understand by closed loop system and its importance. [5]

   b) Why closed loop system is faster than open loop control system? Describe with necessary mathematical expressions. [3]

   c) Find transfer function for the system as in figure. Also develop F-V and F-I analogy circuits. [4+2+2]
2. a) Find overall transfer function of the following diagram using block diagram reduction technique. [8]
   b) The system below in figure (a) when subjected to unit step input; the output response is as shown in the figure (b). Determine the value of K and T. [8]

Figure: (a)   Figure: (b)
3. a) For a unity feedback system the OLTF of a control system is given by
$G(S) = \dfrac{K}{S(S+4)(S^2+4S+20)}$; Sketch the root locus for $0 \le K \le \infty$ and determine the breakaway point, the angle of departure from complex poles and the stability conditions.

[10]

b) Find state space representation of the system.

[6]
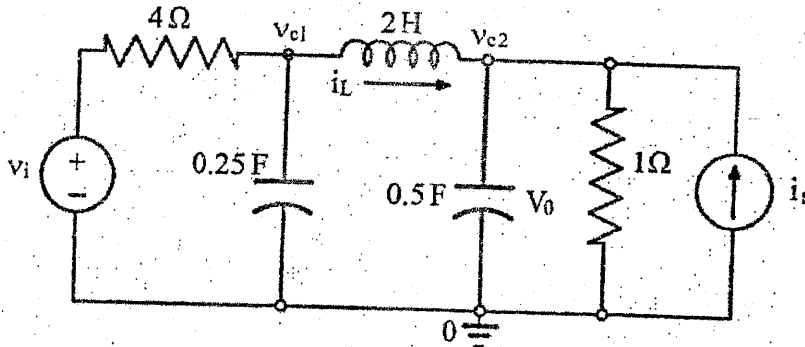

4. a) The characteristics equation of a feedback control system is

[8]

$$S^4 + 20S^3 + 15S^2 + 2S + K = 0$$

(i) Determine the range of K for the system to be stable.

(ii) Can the system be marginally stable? If so, find the required value of K and the frequency of sustained oscillation.

b) Sketch polar plot, determine Gain Margin, phase margin and comment on stability for a unity feedback system with feed forward transfer function $G(S) = \dfrac{10}{S(S+1)^2}.$

[8]

5. a) There exists a permanent mismatch actually to track the reference by the actual system. Suggest a wayout to follow your system as per reference and justify.

[4]

b) Design a suitable phase lag compensating network for $G(S) = \dfrac{K}{S(1+0.1S)(1+0.2S)}$ to meet the following specifications: $K_v = 30\ sec^{-1}$ $P.M \ge 40^\circ$

✓ Candidates are required to give their answers in their own words as far as practicable.
✓ Attempt *All* questions.
✓ The figures in the margin indicate *Full Marks*.
✓ *Semi log/ Graph paper will be provided.*
✓ Assume suitable data if necessary.

1. a) As a control engineer, you are required to control the actuator of a rotating system to get constant speed. Which type of control system will you suggest and why? [5]

   b) Discuss the effect of feedback on time constant of a control system. [3]

   c) Find Transfer function and develop F-V and F-I analogous circuits of the following figure. [8]
2. a) From the given block diagram, find the transfer ratio $\frac{C(S)}{R(S)}$ using block diagram reduction method. [8]
   b) A servomechanism as shown in block diagram below is designed to keep a radar antenna pointed at a flying aeroplane. If the aeroplane is flying with a velocity of 600 km/hr, at a range of 2 km and the maximum tracking error is to be within 0.1°, determine the required velocity error coefficient. [4]
   c) A system has 25% overshoot and settling time of 6 seconds, for a unit step input. Determine the transfer function and Calculate peak time. Assume e_{ss} as 2%. [4]

3. a) The characteristic equation of the system is $s^3 + 9s^2 + sK + K = 0$. Sketch the complete root locus and comment on stability. [8]

b) A system is described by the following equations:

$$x(t) = \begin{bmatrix} -1 & 1 \\ 0 & -2 \end{bmatrix} x(t) + \begin{bmatrix} 1 & 0 & 1 \\ 0 & 1 & 1 \end{bmatrix} u(t)$$

$$y(t) = \begin{bmatrix} 1 & 2 \\ 1 & 0 \\ 1 & 1 \end{bmatrix} x(t)$$

Find the transfer function of the system and identify if the system is stable. [8]

4. a) What is relative and absolute stability? Check the stability of system with characteristics equation: $S^6 + 2S^5 + 8S^4 + 12S^3 + 20S^2 + 16S + 16 = 0$ using R-H criteria. [2+6]

b) Using Nyquist criteria, determine the stability of the feedback system whose OLTF is given by: [8]

$$G(s).H(s) = \frac{1}{s^2(1+2s)(1+s)}$$

5. a) In response to unit ramp input, discuss role of derivative feedback controller for a second order system. [4]

b) The open loop transfer function of type-II system with unity feedback system is given by $G(S) = \frac{K}{S^2(1+0.25\,S)}$ Design a lead compensator to meet the following specifications.

(i) Acceleration error Constant $(K_a) = 10/sec^2$
(ii) PM at least $35°$ [12]

| Exam.		Regular	
Level	BE	Full Marks	80
Programme	BEI, BAS	Pass Marks	32
Year / Part	II / I	Time	3 hrs.

Subject: - Control System (EE 504)

✓ Candidates are required to give their answers in their own words as far as practicable.
✓ Attempt *All* questions.
✓ The figures in the margin indicate *Full Marks*.
✓ Assume suitable data if necessary.

1. a) What is control system? "When feedback is added on a control system, it's response is faster." Illustrate this statement mathematically. [2+6]

   b) Find the transfer function, $\dfrac{\theta 2(S)}{T(S)}$, for the mechanical rotational system of figure below. Also draw the T-V and T-I analogy circuit of the system. [8]
2. a) Determine the transfer function C/R for the block diagram below by signal flow graph (SGF) techniques. [8]
   b) The open loop TF a unity feedback control system is given as

   $$G(S) = \frac{k}{s(s^2+s+1)(s+2)+k}$$

   Determine the range of gain k for the system to be stable. Also determine the value of k which will cause the sustained oscillation and corresponding oscillation frequency. [5+3]

3. a) The open loop transfer function of a control system is given by

   $$G(S)H(S) = \frac{k}{s(s+4)(s^2+4s+20)}$$

   Sketch the root locus for $0 \le K \le \infty$ and determine the breakaway point, the angle of departure from complex poles and the stability conditions. [10]

   b) Write short notes on followings: [3+3]
   (i) Characteristics of PI and PD control actions
   (ii) Nyquist stability criterion

4. a) Sketch the polar plot of the system whose open loop transfer function is given by

$$G(S)H(S) = \frac{1}{s(1+s)(1+2s)}.$$ Also comment on stability.   [8]

b) Discuss the advantages and limitations of state space analysis of control systems. Find the transfer function for the system represented by following state space model.   [2+6]

$$x = \begin{bmatrix} -3 & 1 \\ -2 & 0 \end{bmatrix} x + \begin{bmatrix} 0 \\ 1 \end{bmatrix} u$$
$$y = \begin{bmatrix} 1 & 0 \end{bmatrix} x$$

5. Design a suitable lead compensating network for $G(S) = \dfrac{k}{s^2(1+0.25s)}$ to meet the following specification

$$K_a = 10 \text{ sec}^{-1}$$
$$P.M \geq 35°$$

Subject: - Control System (EE 602)

✓ Candidates are required to give their answers in their own words as far as practicable.
✓ Attempt *All* questions.
✓ The figures in the margin indicate *Full Marks*.
✓ Assume suitable data if necessary.

1. a) Define control system. Why closed loop control system is more pronounced in modern complex systems rather than open loop control systems. Justify. [6]

   b) The given mechanical system has force, f(t) as input and x1 and x2 as displacement outputs. Draw equivalent f-v and f-I analogous electrical circuit and determine the transfer function with x_2 as output. [10]
2. a) Reduce the following block diagram and find transfer function. [8]
   b) For a unity feedback system, the open loop transfer function is $G(S) = \dfrac{50}{s(s+2)}$. With unit step input find maximum overshoot and settling time. Also determine static error coefficients and steady state error if the input to the system is $r(t) = 2 + 4t + 6t^2, t \geq 0$. [8]

3. a) In the following system, determine K if the system just oscillates at a frequency 2 rad/sec. [6]

$$\frac{k(s+1)}{s^3 + as^2 + 2s + 1}$$
   b) Draw Bode plot for unity feedback system with open loop transfer function $G(S) = \dfrac{40(s+2)}{(2+s+25s^2)(1+2s)s}$. Find GM and comment on stability. [10]

4. a) Obtain the transfer function from the following system equations given by, [4]

$$\begin{bmatrix} \dot{x}_1 \\ \dot{x}_2 \end{bmatrix} = \begin{bmatrix} 0 & 1 \\ -K/M & -B/M \end{bmatrix} \begin{bmatrix} x_1 \\ x_2 \end{bmatrix} + \begin{bmatrix} 0 \\ 1/M \end{bmatrix} u$$

$$y = \begin{bmatrix} 1 & 0 \end{bmatrix} \begin{bmatrix} x_1 \\ x_2 \end{bmatrix}$$

b) Sketch the Nyquist contour and plot of unity feedback system having open loop transfer function: $G(S)H(S) = \dfrac{s+10}{(S-3)(S+3)}$

(i) Comment on stability.

(ii) Determine gain margin. [5+1+2]

c) Discuss briefly about PD controller. [4]

5. a) How does the location of poles affect the stability in control system? [2]

b) For a unity feedback system with feed forward transfer function $G(s) = \dfrac{10}{s(s+1)}$, design a lead compensator such that the settling time of the system will become 2sec and maximum percent overshoot 5%. [12]

c) Describe angle criteria for a point in s-plane such that the root locus would cross through the point. [2]

Level	BE	Full Marks	80
Programme	BEL, BEX, BME, BAM, BIE	Pass Marks	32
Year / Part	III / I	Time	3 hrs.

Subject: - Control System (EE 602)

✓ Candidates are required to give their answers in their own words as far as practicable.
✓ Attempt All questions.
✓ The figures in the margin indicate Full Marks.
✓ Semilog graph paper will be provided.
✓ Assume suitable data if necessary.

1. a) What is control system? Draw the block diagram of a closed loop control system and briefly explain the function of each block. [6]

   b) Find the transfer function. $\dfrac{X(S)}{F(S)}$, for the mechanical system of figure below. Also draw the F-V and F-I analogy circuit of the sy stem. [10]
2. a) Develop Signal Flow graph for the block diagram model below and find transfer function using Mason's gain formula. [2+6]
   b) Check stability for the system with open loop transfer function [4]
   $$G(S)H(S)=\dfrac{2}{2s^5+3s^4+2s^3+s^2+2s}$$ using R-H criterion.

   c) What is derivative controller? How and why it can be useful? [4]

3. a) Determine values of a and b of the closed loop control system shown below, so that maximum overshoot for unit step input is 25% and the peak time is 2 sec. Assume that J=1 kg/m³. [6]
b) Sketch Root locus plot for the system open loop transfer function $G(s)H(s) = \dfrac{k(s+2)}{s((s+1)(s^2+8s+64))}$. Discuss the region for stability, unstability and marginal stability. What is frequency of oscillation at the point of marginal stability? [10]

4. a) the open loop transfer function of closed loop system is $G(s) = \dfrac{2}{s(s+1)(2s+1)}$. Using Niquist Criterion, determine closed loop stability of this system. [8]

b) Consider a mechanical system shown in figure below. The external force u(t) is input to the system and displacement y(t) of the mass is the output. Obtain the state space representation of the system. [8]
5. Why lead compensator is required? Design a suitable lead compensating network for $G(S) = \dfrac{k}{s^2(1+0.25s)}$ to meet the following specification $K_a = 10\ sec^{-1}$ $P.M \geq 35°$. [2+14]

✓ Candidates are required to give their answers in their own words as far as practicable.
✓ Attempt All questions.
✓ The figures in the margin indicate Full Marks.
✓ Semilog graph paper will be provided.
✓ Assume suitable data if necessary.

1. a) Which of the system is more sensitive to the disturbance and prove it how? Also discuss effect of gain on response of the system. [4+4]

   b) Find the transfer function $\frac{\theta(s)}{T(s)}$ for the mechanical system rotational system shown below: Also develop T-I analysis circuit. [8]
2. a) Using block diagram reduction technique, find the tr. Function $\frac{C(S)}{R(S)}$ of the figure given below. [8]
   b) A system has 40% overshoot and requires a settling time of 4 seconds when given a step input. Find peak time and rise time. [8]

3. a) Using R-H criteria fin the range of K for system having characteristics equation shown below, to be stable. [6]
   $$S^4+2S^3+(4+K)S^2+9S+25=0$$

   b) Sketch Rout locus plot for the system with open loop transfer function. [6]
   $$G(s)H(s) = \frac{k(s-1)}{s(s-1)}$$

   c) What sort of measures would you apply to track a reference from the actual output of the system? [4]

4. a) Using Nyquist criterion determine the stability of the feedback system whose open loop transfer function is given by $G(s) H(s) = \dfrac{1}{s(1+2s)(1+s)}$ and what is its gain margin? [10]

b) Develop state space model for circuit below. [6]
5. a) Consider a system shown below. The open loop transfer function is given by: $G(s)H(s) = \dfrac{2}{s(s+1)(s+2)}$. It is desired to compensate the system, so that the static velocity error constant K_v is 5 per second. The phase margin is at least 40^0 and gain margin is at least 10dB. Determine transfer function of appropriate lag compensator. [12]

b) Consider a point P in s-plane which actually indicate dominant closed loop pole of the system. How would you recognize that the root locus passes through the point P? [4]

Subject: - Control System (EE602)

✓ Candidates are required to give their answers in their own words as far as practicable.
✓ Attempt __All__ questions.
✓ The figures in the margin indicate __Full Marks__.
✓ Assume suitable data if necessary.

1. a) Inspite of cost and complicated design, closed loop control system are widely preffered over open loop control system. Justify the statement with some examples. [4]

    b) Find the transfer function of given circuit. [4]
    c) For the mechanical system shown below find the transfer function $M_2(s)/F(s)$. Draw the force voltage analogy. [6+2]
2. a) Develop block diagram model for the circuit shown in figure below. [4]
    b) Using Masons gain formula, find the tr. Function $\frac{C(S)}{R(S)}$ of the fig given below. [8]
    c) Using R-H criteria, tell how many roots of polynomial is in right half s-plane. [4]
    $$S^5 + 4S^4 + 2S^3 + 8S^2 + S + 4 = 0$$

3. a) Fig (ii) is step response of system as in fig (i) find K and P. [6]
Fig. (i)
Fig. (ii)

b) Sketch the root locus for unity feedback the system having the forward path transfer function $G(S) = \dfrac{K}{(s^2 + 2s + 2)(s^2 + 2s + 5)}$ [10]

4. a) Using Nyquist criterion determine the stability of the feedback system whose open loop transfer function is given by

$$G(S)H(S) = \frac{(S+5)}{(S-2)(S+2)}$$

Also find GM.

[8]

b) A system is characterized by the equation

$$\frac{Y(S)}{U(S)} = \frac{20(4s+2)}{s^3 + 5s^2 + 8s + 2}$$

Find its state and output equation and express in matrix form. Then using your matrix, how do you get characteristic equation?

[8]

5. a) Discuss effect of addition of a zero to a system.

[4]

b) The open loop transfer function of a system is given by:

$$G(S) = \frac{1}{S(S+1)(0.5S+1)}$$

Compensate the system, such that, $K_v = 5 \ sec^{-1}$ and phase margin is at least 40° and the gain margin is at least 10 dB with a lag compensator.

✓ Assume suitable data if necessary.

1. a) What is control system? Draw the block diagram of a closed loop control system and briefly explain the function of each block. [5]

   b) Show that the speed of response increases with the increase of the gain of the system. [3]

   c) Find the transfer function $\dfrac{\theta_m(S)}{V_a(S)}$ of the system below by constructing the block diagram. [8]
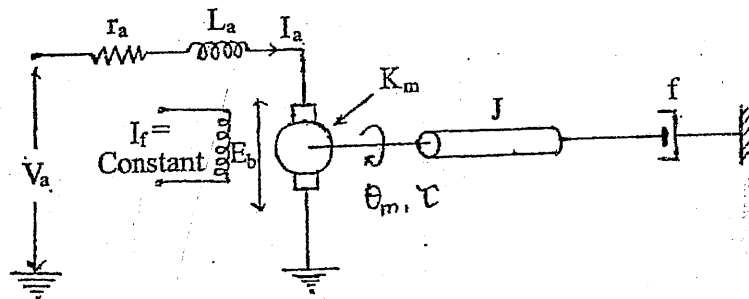

2. a) Determine the transfer function of the given system by reducing blocks. [8]
   b) Consider a unity feedback control system with the closed loop transfer function

   $$\frac{C(S)}{R(S)} = \frac{Ks+b}{(s^2+as+b)}$$

   Determine the open loop transfer function. Show that the steady state error in the unit ramp input response is given by [5]

   $$e_{ss} = \frac{a-k}{b}$$

   c) How we can perform relative stability analysis using RH-Criteria? [3]

3. a) For a unity feedback system the open loop transfer function of a control system is given by

[10]

$$G(S) = \frac{k}{s(s+4)(s^2 + 4s + 20)}$$

Sketch the root locus for $0 \le K \le \infty$ and determine the breakaway point, the angle of departure from complex poles and the stability conditions.

b) Write the state equation for the circuit shown below. Also write output equation. [6]
4. a) Discuss working of PI controller. [4]

b) Suppose that the step response of a first order system is $C(t) = 5(1 - e^{-t/5})$. What are impulse and ramp responses? [4]

c) Sketch the Nyquist Plot of Unity feedback system having open loop transfer function and $G(S)H(S) = \frac{s+10}{(s-3)(s+3)}$. Comment on stability. What is gain margin? [8]

5. a) Discuss the purpose of lead and lag compensators. [4]

b) Design a suitable phase lag compensating network for $G(S) = \frac{k}{S(1+0.1s)(1+0.2s)}$ to meet the following specification

[12]

$K_v = 30 \, Sec^{-1}$

$P.M \ge 40°$

Subject: - Engineering Mathematics III *(SH 501)*

✓ Candidates are required to give their answers in their own words as far as practicable.
✓ Attempt __All__ questions.
✓ The figures in the margin indicate __Full Marks__.
✓ Assume suitable data if necessary.

1. Using the properties of determinant, prove the following identity. [5]

$$\begin{vmatrix} a & b & c \\ b+c & c+a & a+b \\ a^2 & b^2 & c^2 \end{vmatrix} = -(a-b)(b-c)(c-a)(a+b+c)$$

2. Define transpose of a matrix. Prove that every square matrix can be expressed as a sum of symmetric matrix and skew-symmetric matrix uniquely. [1+4]

3. Define rank of matrix. Find the rank of matrix $\begin{bmatrix} 3 & 1 & 4 \\ 0 & 5 & 8 \\ -3 & 4 & 4 \\ 1 & 2 & 4 \end{bmatrix}$ by reducing to normal form. [1+4]

4. State Cayley-Hamilton Theorem and verify it for the matrix. [1+4]

$$A = \begin{bmatrix} 1 & 0 & 2 \\ 0 & 2 & 1 \\ 2 & 0 & 3 \end{bmatrix}$$

5. Prove that the integral $\int_A^B \vec{F}.d\vec{r}$ is independent of the path joining any two points A and B in a region if and only if $\int_c \vec{F}.d\vec{r} = 0$ for any simple closed curve C in the region formed by arcs joining the points A and B. [5]

6. State Green's theorem in plane and apply it to evaluate $\int_c [(2x - y + 4)dx + (5y + 3x - 6)dy]$ around a triangle in the xy-plane with vertices at (0,0), (3,0), (3,2). [1+4]

7. State Gauss' divergence Theorem. Evaluate $\iint_S \vec{F}.\hat{n}\, ds$ where $\vec{F} = x\,\vec{i} + y\,\vec{j} + z\,\vec{k}$ and S is the surface of the sphere $x^2 + y^2 + z^2 = 1$ by using Gauss' divergence theorem. [1+4]

8. Evaluate $\int_C (xy\,dx + xy^2\,dy)$ by stoke's theorem where C is the square in the xy-plane with vertices (1,1), (-1,1), (-1,-1) and (1,-1). [5]

9. Find the fourier series of the function $f(x) = x\sin x$ as a fourier series in $-\pi \le x \le \pi$. Also deduce that $\dfrac{1}{1.3} - \dfrac{1}{3.5} - \dfrac{1}{7.9}\cdots\cdots\cdots = \dfrac{\pi-2}{4}$. [4+1]

10. Find half range Fourier sine series for $f(x) = x - x^2$ in $0 < x < 1$. [5]

11. State the condition for a function to exist its Laplace transform. Find the Laplace transform of : [1+2+2]

   a) $\dfrac{1}{t}(e^{at} - \cos 6t)$

   b) $f(t) = \begin{cases} \sin t, & \text{for } 0 < t < \pi \\ t & \text{for } t > \pi \end{cases}$

12. Find the inverse Laplace transform of [2+3]

   a) $\tan^{-1}\left(\dfrac{1}{s}\right)$

   b) $\dfrac{1}{s(s-4)^2}$

13. Solve the initial value problem by Laplace transform method: [5]
   $$y'' + y = \sin 3t; \quad y(0) = 0, \; y'(0) = 0.$$

14. Use the simplex method to solve the linear programming problem (constructing duality): [7]
   Minimize $z = 3x_1 + 2x_2$ subject to $3x_1 - x_2 \ge -5$,
   $-x_1 + 4x_2 \ge 1$, $x_1 + 9x_2 \ge 6$ and $x_1, x_2 \ge 0$.

15. Solve the linear programming problem by simplex method using Big-M method:
   Maximize $F = 2x_1 + x_2$ subject to $2x_1 - x_2 \ge 2$,
   $x_1 - x_2 \le 2$, $x_1 + x_2 \le 4$ and $x_1, x_2 \ge 0$. [8]

Subject: – Engineering Mathematics III *(SH 501)*

✓ Candidates are required to give their answers in their own words as far as practicable.
✓ Attempt *All* questions.
✓ The figures in the margin indicate *Full Marks*.
✓ Assume suitable data if necessary.

1. Use properties of determinant to prove: $\begin{vmatrix} (b+c)^2 & a^2 & a^2 \\ b^2 & (c+a)^2 & b^2 \\ c^2 & c^2 & (a+b)^2 \end{vmatrix} = 2abc(a+b+c)^3$ [5]

2. Prove that the necessary and sufficient condition for a square matrix A to possess an inverse is that A is non-singular. [5]

3. Define rank of a matrix. Reduce the matrix $\begin{bmatrix} 2 & -2 & 0 & 6 \\ 4 & 2 & 0 & 2 \\ 1 & -1 & 0 & 3 \\ 1 & -2 & 1 & 2 \end{bmatrix}$ into echelon form and hence find its rank. [1+4]

4. Find the modal matrix of the matrix $A = \begin{bmatrix} 1 & 0 & -1 \\ 1 & 2 & 1 \\ 2 & 2 & 3 \end{bmatrix}$ [5]

5. A vector field is given by $\vec{F} = \text{Sin}y\ \vec{i} + x(1+\cos y)\ \vec{j}$. Evaluate the line integral over the circular path given by $x^2 + y^2 = a^2, z = 0$ [5]

6. State Green's theorem. Using Green's theorem, find the area of asteroid $x^{\frac{2}{3}} + y^{\frac{2}{3}} = a^{\frac{2}{3}}$ [1+4]

7. State Gauss divergence theorem. Evaluate $\iint_S \vec{F}.\hat{n}ds$ for $\vec{F} = 2x\ \vec{i} + 3y\ \vec{j} + 4z\ \vec{k}$ where S is the surface of sphere $x^2 + y^2 + z^2 = 1$ by Gauss's divergence theorem. [1+4]

8. Use Stoke's theorem to evaluate $\iint_S \left(\nabla \times \vec{F} \right).\vec{n}\ ds$ where $\vec{F} = y\ \vec{i} + x(1-2z)\ \vec{j} - xy\ \vec{k}$ and S is the surface of the sphere $x^2 + y^2 + z^2 = a^2$ above the xy-plane. [5]

9. Find the Fourier series of the function f(x) = $|x|$ for $-\pi \le x \le \pi$ in a Fourier series and deduce $\frac{\pi^2}{8} = \frac{1}{1^2} + \frac{1}{3^2} + \frac{1}{5^2} + \dots\dots$ [4+1]

10. Find half-range Fourier sine series of $f(x) = e^{ax}$ in the interval $0 \le x \le \pi$. [5]

11. Discuss the existence of Laplace transform. Find the Laplace transform of   [1+2+2]
    (i) te^t (ii) sinhat sinat

12. Find the Inverse Laplace transform of a) $\dfrac{s^2}{(s-1)^3}$ b) $\dfrac{s^2}{(s^2+4)^2}$ [2+3]

13. Solve the following differential equation by Laplace transform method
    $y''+3y'+2y = e^t, y(0) = 0 = y'(0)$
                                                                            [5]
14. Solve the following linear programming problem using the big M method;   [7]
    Maximize $P = 2x_1+x_2$ subject to

    $x_1+x_2 \leq 10$

    $-x_1+x_2 \geq 2$

    $x_1, x_2 \geq 0$

15. Use duality of simplex method to minimize, $z = 8x_1+9x_2$ subject to :   [8]

    $x_1+3x_2 \geq 4$

    $2x_1+x_2 \geq 5$

    $x_1, x_2 \geq 0$

Exam.		Back	
Level	BE	Full Marks	80
Programme	All(Except BAR)	Pass Marks	32
Year / Part	II / I	Time	3 hrs.

Subject: - Engineering Mathematics *(SH 501)*

✓ Candidates are required to give their answers in their own words as far as practicable.
✓ *Attempt __All__ questions.*
✓ *The figures in the margin indicate __Full Marks.__*
✓ *Assume suitable data if necessary.*

1. Use properties of Determinant to show $\begin{vmatrix} a-b-c & 2a & 2a \\ 2b & b-c-a & 2b \\ 2c & 2c & c-a-b \end{vmatrix} = (a+b+c)^3$. [5]

2. Show that for every complex square matrix, it can be uniquely express as the sum of a Hermitian matrix and a skew- Hermitian matrix. [5]

3. Test the consistency of the system of equations:

   $x+2y-z = 0$, $2x+3y+z = 10$, $3x-y-7z = 1$.

   and solve completely if found consistent. [5]

4. Find the eigen-values of the matrix $A = \begin{bmatrix} 2 & -2 & 2 \\ 1 & 1 & 1 \\ 1 & 3 & -1 \end{bmatrix}$. [3+1+1]

   Hence use them to compute:

   a) $|A|$

   b) Eigenvalues of A^{-1}

5. Evaluate $\int_c \vec{F}.d\vec{r}$ where $\vec{F} = (\sin y)\ \vec{i} + x(1+\cos y)\ \vec{J}$ and the curve is circular path given by $x^2 + y^2 = a^2, z = 0$. [5]

6. Evaluate $\iint_S \vec{F}.\vec{n}\ ds$ where $\vec{F} = y^2z^2\ \vec{i} + z^2x^2\ \vec{j} + x^2y^2\ \vec{k}$ and S is the surface of the sphere $x^2 + y^2 + z^2 = 1$ above the xy-plane. [5]

7. State Green's theorem in plane. Apply it to find the area of the curve $x^{2/3} + y^{2/3} = a^{2/3}$. [1+4]

8. Apply Gauss' divergence theorem to evaluate $\iint_S \vec{F} . \hat{n} \, ds$ where

$\vec{F} = (2xy + z) \vec{i} + y^2 \vec{j} - (x + 3y) \vec{k}$ and v is the region bounded by the surface of the planes $2x + 2y + z = 6$, $x = 0$, $y = 0$, $z = 0$. [5]

9. Obtain a Fourier series to represent $x + x^2$ for $-\pi \leq x \leq \pi$ and

Deduce that $\dfrac{\pi^2}{6} = \dfrac{1}{1^2} + \dfrac{1}{2^2} + \dfrac{1}{3^2} + \dfrac{1}{4^2} \dots\dots\dots\dots$ [5]

10. Define periodic function. Find the Fourier series of the function [2+3]

$f(x) = 2x - x^2$ in the interval (0,2)

11. State existence condition for Laplace transform. Obtain the Laplace transform of [1+2+2]

a) $\dfrac{1}{\sqrt{t}}$

b) $\dfrac{1 - \cos 2t}{t}$

12. Obtain a Fourier series to represent $x + x2$ for $-\pi \leq x \leq \pi$ and

Deduce that $\dfrac{\pi^2}{6} = \dfrac{1}{1^2} + \dfrac{1}{2^2} + \dfrac{1}{3^2} + \dfrac{1}{4^2} \dots\dots\dots\dots$ [5]

13. Solve the initial value problem by Laplace transform method:

$y'' - 3y' + 2y = 4x + e^{3x};$ $y(0) = 1$, $y'(0) = -1$. [5]

14. Solve the following Linear programming problem by using simplex method
Max $p = 15x + 10y$, subject to $2x + y \leq 10$, $x + 3y \leq 10$ and $x, y \geq 0$. [7]

15. Solve the Linear Programming Problem by Big M method: [8]

Maximize: $P = 2x_1 + x_2 + 3x_3$

Subject to: $x_1 + x_2 + 2x_3 \leq 5$

$2x_1 + 3x_2 + 4x_3 = 12$

and $x_1, x_2, x_3 \geq 0$.

Exam.		Regular	
Level	BE	Full Marks	80
Programme	All (Except BAR)	Pass Marks	32
Year / Part	II / I	Time	3 hrs.

Subject: - Engineering Mathematics III *(SH 501)*

✓ Candidates are required to give their answers in their own words as far as practicable.
✓ Attempt __All__ questions.
✓ The figures in the margin indicate __Full Marks__.
✓ Assume suitable data if necessary.

1. Prove that $\begin{vmatrix} a^3 & 3a^2 & 3a & 1 \\ a^2 & a^2+2a & 2a+1 & 1 \\ a & 2a+1 & a+2 & 1 \\ 1 & 3 & 3 & 1 \end{vmatrix} = (a-1)^6$ by using properties of determinate. [5]

2. Define transpose of a matrix. Prove that the transpose of the product of two matrices is the product of their transpose taken in reverse order. [1+4]

3. Find the rank of the matrix $\begin{bmatrix} 1 & 0 & -5 & 6 \\ 3 & -2 & 1 & 2 \\ 3 & -2 & -9 & 14 \\ 4 & -2 & -4 & 8 \end{bmatrix}$ by reducing it into normal form. [5]

4. State Cayley-Hamilton Theorem. Use it to find the inverse of the matrix: [1+4]

$$\begin{bmatrix} 1 & 1 & 3 \\ 1 & 3 & -3 \\ 2 & -4 & -4 \end{bmatrix}$$

5. Prove that the line integral $\int_c \vec{F}.d\vec{r}$ of a continuous vector function $\vec{F}$ defined in a region R is independent of the path C joining any two points in R if and only if there exists a single valued scalar function ϕ, having first order partial derivatives such that $\vec{F} = \nabla\phi$. [5]

6. Evaluate $\iint_S \vec{F}.\vec{n}\ ds$ where $\vec{F} = y^2z^2\ \vec{i} + z^2x^2\ \vec{j} + x^2y^2\ \vec{k}$ and S is the surface of the sphere $x^2 + y^2 + z^2 = 1$ above the xy-plane. [5]

7. Apply Green's theorem in plane to evaluate, $\int_c \vec{F}.d\vec{r}$ where $\vec{F} = (x^2 - xy^3)\ \vec{i} + (y^2 - 2xy)\ \vec{j}$ and C is a square with vertices (0, 0), (2, 0), (2, 2), (0, 2). [5]

8. Verify the stroke's theorem for $\vec{F} = (x^2 + y^2)\ \vec{i} - 2xy\ \vec{j}$ taken round the rectangle bounded by the lines $x = \pm a$, $y = 0$, $y = b$. [5]

9. Define Laplace transform of function f(t). Find the Laplace transform of

    a) $te^{-4t}sin3t$ b) $\dfrac{1-e^t}{t}$

    [1+2+2]

10. Find the inverse Laplace transform of:

    a) $\dfrac{s^2}{(s+2)^3}$ b) $tan^{-1}\dfrac{2}{s}$

    [2+3]

11. Solve the following initial value problem by using Laplace transform
$y'' + 2y' - 3y = sint, y(0) = y'(0) = 0.$

    [5]

12. Find the Fourier series of the function $f(x) = \dfrac{(\pi - x)^2}{4}$ in the interval $0 \le x \le 2\pi$.

    [5]

13. Obtain the half-range Fourier cosine series of sinx in the interval $0 \le x \le \pi$.

    [5]

14. Solve the linear programming problem maximize by simplex method

    [7]

    Maximize: $Z = 10x_1 + x_2 + 2x_3$
    Subject to: $x_1 + x_2 - 2x_3 \le 10$
              $4x_1 + x_2 + x_3 \le 20$
          and $x_1, x_2, x_3 \ge 0.$

15. Solve the linear programming problem by simplex method using two phase method:

    [8]

    Maximize $Z = 3x_1 - x_2$
    Subject to $2x_1 + x_2 \ge 2$
          $x_1 + 3x_2 \le 2$
          $x_2 \le 4; \; x_1, x_2 \ge 0.$

Exam.		Back	
Level	BE	Full Marks	80
Programme	All (Except BAR)	Pass Marks	32
Year / Part	II / I	Time	3 hrs.

Subject: - Engineering Mathematics III (*SH 501*)

✓ Candidates are required to give their answers in their own words as far as practicable.
✓ *Attempt All questions.*
✓ *The figures in the margin indicate Full Marks.*
✓ *Assume suitable data if necessary.*

1. Applying properties of determinant, prove that $\begin{vmatrix} a & b & a & a \\ a & b & b & b \\ b & b & b & a \\ a & a & b & a \end{vmatrix} = -(b-a)^4$. [5]

2. Prove that every square matrix can be uniquely expressed as the sum of symmetric and skew-symmetric matrices. [5]

3. Find the rank of the augmented matrix and test the consistency of the system of linear equations $x+9y-z = 27$, $x-8y+16z = 10$, $2x+y+15z = 37$. Also find the solution if the system is consistent. [5]

4. State Cayley-Hamilton theorem and use it to find the inverse of the matrix: [5]
$$\begin{bmatrix} -2 & 2 & -3 \\ 2 & 1 & -6 \\ -1 & -2 & 0 \end{bmatrix}$$

5. If $\vec{F} = 3x^2yz^2\vec{i} + x^3z^2\vec{j} + 2x^3yz\vec{k}$, show that $\int_c \vec{F}.d\vec{r}$ is independent of the path of integration. Hence evaluate the integral on any path C from P: (0,0,0) to Q: (1,2,3). [3+2]

6. Evaluate the flux of $\vec{F} = (x+y^2)\hat{i} - 2x\hat{j} + 2yz\hat{k}$ over the surface of the plane $2x + y + 2z = 6$ lying in the first octant. [5]

7. State and prove the Green's theorem in plane. [5]

8. State stoke's theorem. Apply it to evauate $\iint_S (\nabla \times \vec{F}).\vec{n}\, ds$ where $\vec{F} = (2x-y)\vec{i} - yz^2\vec{j} - y^2z\vec{k}$, S is the upper half surface of the sphere $x^2 + y^2 + z^2 = a^2$ and C is its boundary. [1+4]

9. Find the Laplace transform of: (i) Sinhat Cosbt (ii) $\dfrac{e^{-at} - e^{-bt}}{t}$ [5]

10. What do you mean by convolution of two functions f (t) and g(t)? Hence or otherwise find the inverse Laplace transform of $\dfrac{s^2}{(s^2+4)(s^2+9)}$ [1+4]

11. Using laplace transform, solve the initial value problem: [5]
$y'' + 2y' + 2y = 5\sin x$, $y(0) = y'(0) = 0$.

12. Find the Fourier series to represent $f(x) = x-x^2$ from $-\pi$ to π and deduce that: [5]

$$\frac{\pi^2}{12} = \frac{1}{1^2} - \frac{1}{2^2} + \frac{1}{3^2} - \frac{1}{4^2} + \cdots$$

13. Find half range sine as well as cosine series for $f(x) = e^x$ in $(0,2)$.

[2+3]

14. Solve the following LPP by the simplex method:

[7]

Maximize, $P = -x_1 + 2x_2$

Subject to :

$$-x_1 + x_2 \leq 2$$
$$-x_1 + 3x_2 \leq 12$$
$$x_1 - 4x_2 \leq 4$$
$$x_1 \geq 0, x_2 \geq 0$$

15. Solve the following LPP by Big-M, method:

Maximize, $P = 2x_1 + 5x_2$

[8]

Subject to :

$$x_1 + 2x_2 \leq 18$$
$$2x_1 + x_2 \leq 21$$
$$x_1 + x_2 \geq 10$$
$$x_1 \geq 0, x_2 \geq 0$$

Exam.		Regular		
Level	BE		Full Marks	80
Programme	All (Except BAR)		Pass Marks	32
Year / Part	II / I		Time	3 hrs.

Subject: - Engineering Mathematics III *(SH 501)*

✓ Candidates are required to give their answers in their own words as far as practicable.
✓ Attempt **All** questions.
✓ The figures in the margin indicate **Full Marks**.
✓ Assume suitable data if necessary.

1. Use the Properties of determinant to show that:

$$\begin{vmatrix} (a+b)^2 & ca & bc \\ ca & (b+c)^2 & ab \\ bc & ab & (c+a)^2 \end{vmatrix} = 2abc\,(a+b+c)^3$$ [5]

2. Define Hermitian and Skew-Hermitian of a square complex matrix. If A is any square matrix, prove that $A + A^*$ is Hermitian and $A - A^*$ is Skew – Hermitian matrix.   [5]

3. Test the consistency of the system by matrix rank method and solve it completely if consistent: [5]

   $x + 2y - z = 0,\ 2x + 3y + z = 10,\ 3x - y - 7z = 1$

4. Find the eigenvalues of the matrix $A = \begin{bmatrix} 1 & 0 & -1 \\ 1 & 2 & 1 \\ 2 & 2 & 3 \end{bmatrix}$ and use them to compute

   (i) eigenvalues of A-1
   (ii) determinant of A   [2+1+1+1]
   (iii) eigenvalues of adj A

5. Evaluate $\int_C \vec{F}.d\vec{r}$ where $\vec{F} = \mathrm{Sin}\,y\,\vec{i} + x(1+\cos y)\vec{j}$ and C is the circular path given by $x^2 + y^2 = a^2, z = 0$.   [5]

6. Evaluate $\iint_S \vec{F}.\vec{n}\,ds$ where $\vec{F} = yz\,\vec{i} + zx\,\vec{j} + xy\,\vec{k}$ where S is the surface of the sphere $x^2 + y^2 + z^2 = 1$ in the first octant.   [5]

7. Apply Green's Theorem in plane to compute the area of the curve $\left(\dfrac{x}{a}\right)^{2/3} + \left(\dfrac{y}{b}\right)^{2/3} = 1$.   [5]

8. State Gauss divergence theorem in vector calculus. Apply it to evaluate $\iint_S \left[(x^3 - yz)\vec{i} - 2x^2 y\vec{j} + 2\vec{k}\right].\vec{n}\,ds$ where S denote the surface of the cube bounded by the planes $x = 0,\ x = a,\ y = 0,\ y = a,\ z = 0,\ z = a$.   [1+4]

9. State the condition for existence property of Laplace transform. Find the Laplace transform of: (a) $\dfrac{1}{\sqrt{t}}$ (b) $\dfrac{1-\cos 2t}{t}$ [1+2+2]

10. State the convolution theorem for inverse Laplace transform and use it to find the inverse Laplace transform of $\dfrac{s}{(s^2 + 1)(s^2 + 4)}$.   [5]

11. Solve the initial value problem by applying Laplace transform: [5]

$$y'' - 10y' + 9y = 5t, \ y(0) = -1, \ y'(0) = 2.$$

12. Obtain the Fourier series of $f(x) = x + x^2$ in $-\pi \leq x \leq \pi$. [5]

13. Express $f(x) = x^2$ as a half-range sine series in $0 < x < 3$. [5]

14. Solve following LPP by the Simplex method: [7]

Maximize, $P = x_1 + x_2$

Subject to : $2x_1 + x_2 \leq 16$

$$x_1 \leq 6$$
$$x_2 \leq 10$$
$$x_1 \geq 0, \ x_2 \geq 0$$

15. Solve following LPP by the Dual Method: [8]

Minimize, $C = 21x_1 + 50x_2$

Subject to : $2x_1 + 5x_2 \geq 12$

$$3x_1 + 7x_2 \geq 17$$
$$x_1 \geq 0, \ x_2 \geq 0$$

Exam.		Back	
Level	BE	Full Marks	80
Programme	All (Except BAR)	Pass Marks	32
Year / Part	II / I	Time	3 hrs.

Subject: - Engineering Mathematics III *(SH 501)*

✓ Candidates are required to give their answers in their own words as far as practicable.
✓ Attempt **All** questions.
✓ The figures in the margin indicate **Full Marks**.
✓ Assume suitable data if necessary.

1. If $\begin{vmatrix} a & a^2 & a^3-1 \\ b & b^2 & b^3-1 \\ c & c^2 & c^3-1 \end{vmatrix} = 0$; where $a \neq b \neq c$, apply the properties of determinants to show $abc = 1$. [5]

2. Define an orthogonal matrix. Prove that the product of two orthogonal matrices of the same order is also orthogonal. [5]

3. For the matrix $= \begin{bmatrix} 5 & 4 \\ 1 & 2 \end{bmatrix}$, find the modal matrix and the corresponding diagonal matrix. [5]

4. State Cayley-Hamilton theorem and verify the theorem for the square matrix $A = \begin{bmatrix} 1 & 3 & 7 \\ 4 & 2 & 3 \\ 1 & 2 & 1 \end{bmatrix}$. [5]

5. Prove that "for any simple closed curve C, the line integral $\int_A^B \vec{F} . d\vec{r}$ is independent of the path joining the points A and B in the region if and only if $\int_C \vec{F}.d\vec{r} = 0$. [5]

6. State Green's theorem in the plane. Using Green's theorem find the area of the hypocycloid $\left(\frac{x}{a}\right)^{2/3} + \left(\frac{y}{b}\right)^{2/3} = 1$. [5]

7. Evaluate $\iint_S \vec{F} . n \, ds$ by Gauss' divergence theorem, where $\vec{F} = x \vec{i} - y \vec{j} + (z^2 - 1) \vec{k}$ and S is the cylinder formed by the surfaces $x^2 + y^2 = 4, z = 0, z = 1$. [5]

8. Verify Stoke's theorem for $\vec{F} = (x^2 - y^2)\vec{i} + 2xy\vec{j}$ taken over the rectangular bounded by the lines $x = 0, x = a, y = 0, y = b$. [5]

9. Define Laplace transform of f(t). Find the Laplace transform of:
   a) $t\,e^{-t}\cosh t$ b) $\frac{\text{Sin t Sin 5t}}{t}$ [1+1.5+2.5]

10. Find the inverse Laplace transform of:
    a) $\log\frac{s}{s+1}$ b) $\frac{1}{(s-2)(s^2+1)}$ [2.5+2.5]

11. Solve the initial value problem $y'' + 4y' + 3y = 0$, $y(0) = 3$, $y'(0) = 1$ by using Laplace transform. [5]

12. Find the Fourier series of $f(x) = 2x - x^2$ in $(0, 2)$. [5]

13. Obtain the half range sine series for $f(x) = e^x$ in $0 < x < 1$. [5]

14. Use Simplex method to solve following LPP: [7]

    Maximize, $P = 50x_1 + 80x_2$
    Subject to : $x_1 + 2x_2 \leq 32$
    $\qquad\qquad 3x_1 + 4x_2 \leq 84$
    $\qquad\qquad x_1, x_2 \geq 0$

15. Solve the following LPP by using big M method: [8]

    Maximize, $P = 2x + y$

    Subject to: $x + y \leq 10$
    $\qquad\qquad -x + y \geq 2$
    $\qquad\qquad x, y \geq 0$

Subject: - Engineering Mathematics III *(SH 501)*

✓ Candidates are required to give their answers in their own words as far as practicable.
✓ Attempt __All__ questions.
✓ The figures in the margin indicate __Full Marks__.
✓ Assume suitable data if necessary.

1. Prove that $\begin{vmatrix} 1+a^2-b^2 & 2ab & -2b \\ 2ab & 1-a^2+b^2 & 2a \\ 2b & -2a & 1-a^2-b^2 \end{vmatrix} = (1+a^2+b^2)^3$ by using the properties of determinants. [5]

2. Prove that every square complex matrix can uniquely be expressed as a sum of a Hermitian and a skew-Hermitian matrix. [5]

3. Reduce the matrix $\begin{bmatrix} 1 & 0 & -5 & 6 \\ 3 & -2 & 1 & 2 \\ 5 & -2 & -9 & 14 \\ 4 & -2 & -4 & 8 \end{bmatrix}$ into normal form and hence find its rank. [5]

4. Find the eigen values and eigen vectors of the matrix $\begin{bmatrix} 2 & 0 & 1 \\ 0 & 2 & -1 \\ 0 & 0 & 2 \end{bmatrix}$ and also find its modal matrix. [5]

5. If $\vec{F} = 3x^2yz^2\,\vec{i} + x^3z^2\,\vec{j} + 2x^3yz\,\vec{k}$, show that $\int_c \vec{F}.d\vec{r}$ is independent of the path of integration. Hence evaluate the integral on any path C from (0, 0, 0) to (1, 2, 3). [5]

6. Verify Green's Theorem in plane for $\int_c [(x-y)\,dx + (x+y)\,dy]$ where c is the boundary of the region enclosed by $y^2 = x$ and $x^2 = y$. [5]

7. Evaluate $\iint_S \vec{F}.\vec{n}\,ds$ where $\vec{F} = 4x\,\vec{i} - 2y^2\,\vec{j} + z^2\,\vec{k}$ taken over the region bounded by the cylinder $x^2 + y^2 = 4$ and the planes $z = 0, z = 3$. [5]

8. Evaluate $\int_c \vec{F}.d\vec{r}$, where c is the rectangle bounded by the lines $x = \pm a, y = 0, y = n$ and $\vec{F} = (x^2 + y^2)\,\vec{i} - 2xy\,\vec{j}$. [5]

9. State the condition for existence of Laplace transform. Obtain the Laplace transform of:

   a) $Cos^3 2t$ (b) $\dfrac{\cos at - \cos bt}{t}$ [1+1.5+2.5]

10. Find the inverse Laplace transform of:

   a) $\dfrac{s+3}{(s^2+6s+13)^2}$ b) $\dfrac{e^{-2s}}{(s+1)(s^2+2s+2)}$ [2+3]

11. Solve the differential equation $y''+2y'-3y=\sin t$ under the conditions $y(0)=y'(0)=0$ by using Laplace transform.

[5]

12. Obtain the Fourier series to represent the function $f(x)=e^x$ for $-\pi \le x \le \pi$. [5]

13. Obtain the half range cosine series for the function $f(x)=x\sin x$ in the interval $(0, \pi)$. [5]

14. Use Simplex method to solve following LPP:

   Maximize, $P=30x_1+x_2$

   Subject to : $2x_1+x_2 \le 10$

   $x_1+3x_2 \le 10$

   $x_1, x_2 \ge 0$

[7]

15. Use Big M method to solve following LPP:

16. Minimize, $Z=4x_1+2x_2$

   Subject to : $3x_1+x_2 \ge 27$

   $-x_1-x_2 \le -21$

   $x_1+2x_2 \ge 30$

   $x_1, x_2 \ge 0$

Subject: - Engineering Mathematics III (SH 501)

✓ Candidates are required to give their answers in their own words as far as practicable.
✓ Attempt All questions.
✓ The figures in the margin indicate Full Marks.
✓ Assume suitable data if necessary.

1. Prove that: $\begin{vmatrix} (b+c)^2 & c^2 & b^2 \\ c^2 & (c+a)^2 & a^2 \\ b^2 & a^2 & (a+b)^2 \end{vmatrix} = 2(ab+bc+ca)^2$ [5]

2. Prove that the necessary and sufficient condition for a square matrix A to possess an inverse is that $|A| \neq 0$.   [5]

3. Find the rank of the matrix $\begin{bmatrix} 2 & -2 & 0 & 6 \\ 4 & 2 & 0 & 2 \\ 1 & -1 & 0 & 3 \\ 1 & -2 & 1 & 2 \end{bmatrix}$ by reducing it to normal form.   [5]

4. State any two properties of eigen values of a matrix. Obtain eigen values and eigen vectors of the matrix $\begin{bmatrix} -2 & 2 & -3 \\ 2 & 1 & -6 \\ -1 & -2 & 0 \end{bmatrix}$ [1+4]

5. Prove that the line integral $\int_A^B \vec{F}.d\vec{r}$ is independent of path joining any two points A and B in the region if and only if $\int_C \vec{F}.d\vec{r} = 0$ for any simple closed curve C in the region.   [5]

6. State Green's Theorem and use it to find the area of the curve $\left(\dfrac{x}{a}\right)^{2/3} + \left(\dfrac{y}{b}\right)^{2/3} = 1$.   [1+4]

7. Use Gauss' divergence theorem to evaluate $\iint_S \vec{F}.\vec{n}ds$ where $\vec{F} = (2xy + z)\vec{i} + y^2\vec{j} - (x + 3y)\vec{k}$ and S is the surface bounded by the plane 2x+3y+z=6, x=0, y=0, z=0.   [5]

8. Verify Stoke's Theorem for the vector field $\vec{F} = (2x - y)\vec{i} - yz^2\vec{j} - y^2z\vec{k}$ over the upper half of the sphere $x^2+y^2+z^2=1$ bounded by its projection on xy-plane.   [5]

9. Find the Laplace transform of: [2+3]

   i) $t^2\cos at$

   ii) $\dfrac{1 - \cosh(at)}{t}$

10. Find the inverse Laplace transform of : [2+3]

i) $\dfrac{e^{-\pi s}(s+1)}{s^2+2s+2}$

ii) $\tan^{-1}\dfrac{2}{s}$

11. Solve the differential equation $y''+3y'+2y=e^{-t}$, $y(0)=y'(0)=0$ by applying Laplace transform. [5]

12. Find the Fourier Series of the function $f(x)=|\sin x|$ for $-\pi \le x \le \pi$. [5]

13. If $f(x) = lx-x^2$ in $(0,1)$, show that the half range sine series for $f(x)$ is

$\dfrac{8l^2}{\pi^3}\sum\limits_{n=0}^{\infty}\dfrac{1}{(2n+1)^3}\sin(2n+1)\dfrac{\pi x}{l}$. [5]

14. Find the maximum and minimum values of the function $z=20x+10y$ subject to: $x+2y\le 40$, $3x+y\ge 30$, $4x+3y\ge 60$, $x,y\ge 0$ by graphical method. [5]

15. Solve the following linear programming problem using big M method:

Maximize $P=2x_1+5x_2$
subject to : $x_1+2x_2 \le 18$
$2x_1+x_2 \ge 21$
$x_1,x_2 \ge 0$. [10]

Exam.		Regular / Back	
Level	BE	Full Marks	80
Programme	All except BAR	Pass Marks	32
Year / Part	II / I	Time	3 hrs.

Subject: - Engineering Math III (SH 501)

✓ Candidates are required to give their answers in their own words as far as practicable.
✓ Attempt **All** questions.
✓ The figures in the margin indicate **Full Marks**.
✓ Assume suitable data if necessary.

1. If $\begin{vmatrix} a & a^2 & a^3-1 \\ b & b^2 & b^3-1 \\ c & c^2 & c^3-1 \end{vmatrix} = 0$, where $a \neq b \neq c$ show that $abc=1$. [5]

2. If A is a square matrix of order n, prove that $A(adj. A) = (adj. A)A = |A|I_n$, where I_n is a unit matrix having same order as A. [5]

3. Test the consistency of the system by matrix rank method and solve completely if found consistent: $x+2y-z=3, 2x+3y+z=10, 3x-y-7z=1$ [5]

4. State Cayley-Hemilton Thorem and verify it for the matrix $A=\begin{bmatrix} 1 & 0 & -1 \\ 1 & 2 & 1 \\ 2 & 2 & 3 \end{bmatrix}$ [1+4]

5. A vector field is given by $\bar{F} = \sin y\,\bar{i} + x(1+\cos y)\,\bar{j}$. Evaluate the line integral $\int_c \bar{F}.d\bar{r}$ over the circular path c given by $x^2+y^2=a^2$, z=0. [5]

6. State and prove Green's Theorem in plane. [1+4]

7. Evaluate $\iint_s \bar{F}.\bar{n}\,ds$ for $\bar{F} = yz\bar{i} + zx\bar{j} + xy\bar{k}$ where S is the surface of the sphere $x^2+y^2+z^2=1$ in the first octant. [5]

8. State Stoke's theorem. Evaluate $\oint_c (xydx + xy^2dy)$ by Stoke's theorem taking c to be a square in the xy-plane with vertices (1,0),(-1,0),(0,1) and (0,-1). [1+4]

9. Find the Laplace transform of : [2+3]
   i) $te^{-t}\sin t$
   ii) $\dfrac{\cos 2t - \cos 3t}{t}$

10. Find the inverse Laplace transform of : [2+3]
    i) $\dfrac{s+2}{(s+1)^4}$
    ii) $\cot^{-1}(s+1)$

11. Solve the differential equation $y''+y=\sin 3t$, $y(0)=y'(0)=0$ by using Laplace transform. [5]

12. Define Fourier Series for a function f(x). Obtain Fourier series for $f(x)=x^3$; $-\pi \leq x \leq \pi$. [5]

13. Express $f(x)=e^x$ as the half range Fourier Sine series in $0<x<1$. [5]

14. Find the maximum and minimum values of the function $z = 50x_1 + 80x_2$ subject to: $x_1 + 2x_2 \leq 32, 3x_1 + 4x_2 \leq 84, x_1 x_2 \geq 0$; by graphical method. [5]

15. Solve the following Linear Programming problem using big M method: [10]
    Maximize $P= 2x_1+x_2$
    Subject to : $x_1+x_2 \leq 10$
    $-x_1+x_2 \geq 2$
    $x_1, x_2 \geq 0$

Exam.		Back	
Level	BE	Full Marks	80
Programme	All (Except B.Arch.)	Pass Marks	32
Year / Part	II / I	Time	3 hrs.

Subject: - Engineering Mathematics III (SH501)

✓ Candidates are required to give their answers in their own words as far as practicable.
✓ Attempt All questions.
✓ The figures in the margin indicate Full Marks.
✓ Assume suitable data if necessary.

1. Define the determinant as a function and using its properties. Show that [5]

$$\begin{vmatrix} b+c & c+a & a+b \\ q+r & r+p & p+q \\ y+z & z+x & x+y \end{vmatrix} = 2\begin{vmatrix} a & p & x \\ b & q & y \\ c & r & z \end{vmatrix}$$

2. If A and B are orthogonal matrices of same order, prove that the product AB is also orthogonal. [5]

3. Test the consistency of the system $x - 2y + 2z = 4$, $3x + y + 4z = 6$ and $x + y + z = 1$ and solve completely if found consistent. [5]

4. For a matrix $A = \begin{pmatrix} 5 & 4 \\ 1 & 2 \end{pmatrix}$, find the modal matrix and the corresponding diagonal matrix. [5]

5. Prove that line integral $\int_A^B \vec{F}.d\vec{r}$ is independent of path joining any two points A and B in the region if and only if $\oint_C \vec{F}.d\vec{r} = 0$ for any simple closed curve C in the region. [5]

6. Verify Green's theorem in the plane for $\int_C\left[\left(3x^2 - 8y^2\right)dx + (4y - 6xy)dy\right]$ where C is region bounded by $y = x^2$ and $x = y^2$. [5]

7. Evaluate $\iint_S \vec{F}.\vec{n}\,ds$ where $\vec{F} = 6z\vec{i} - 4\vec{j} + y\vec{k}$ and S is the region of the plane $2x + 3y + 6z = 12$ bounded in the first octant. [5]

8. Evaluate using Gauss divergence theorem, $\iint_S \vec{F}.\vec{n}\,ds$ where $\vec{F} = x^2y\vec{i} + xy^2\vec{j} + 2xyz\vec{k}$ and S is the surface bounded by the planes $x = 0$, $y = 0$, $z = 0$, $x + 2y + z = 2$. [5]

9. Obtain the Fourier Series to represent $f(x) = x - x^2$ from $x = -\pi$ to $x = \pi$ and deduce that

$$\frac{\pi^2}{12} = \frac{1}{1^2} - \frac{1}{2^2} + \frac{1}{3^2} - \frac{1}{4^2} + \dots\dots\dots$$ [5]

10. Obtain the half range Fourier Sine Series for $f(x) = \pi - x$ in the range $0 < x < \pi$. [5]

11. State the conditions for existence of Laplace transform. Obtain the Laplace transform of: [1+2+2]

(i) $e^{2t}\cos^3 2t$ (ii) $\dfrac{\cos 2t - \cos 3t}{t}$

12. Find the inverse Laplace transform of:

(i) $\dfrac{1}{(S-2)(S^2+1)}$ (ii) $\cot^{-1}(S+1)$ [2.5+2.5]

13. Solve the following intial value problem by using Laplace transform:

$y'' + 4y' + 3y = e^t$, $y(0) = 0; y'(0) = 2$ [5]

14. Graphically maximize $Z = 7x_1 + 10x_2$

Subject to constraints:
$$3x_1 + x_2 \le 9$$
$$x_1 + 2x_2 \le 8$$ [5]
$$x_1, x_2 \ge 0.$$

15. Solve the following linear Programming Problem by simple method:

Maximize: $Z = 3x_1 + 5x_2$
Subject to:
$$3x_1 + 2x_2 \le 18$$
$$x_1 \le 4, \ x_2 \le 6$$ [10]
$$x_1, x_2 \ge 0.$$

Exam.		**Regular**	
Level	BE	Full Marks	80
Programme	All (Except B.Arch.)	Pass Marks	32
Year / Part	II / I	Time	3 hrs.

Subject: - Engineering Mathematics III *(SH501)*

✓ Candidates are required to give their answers in their own words as far as practicable.
✓ Attempt *All* questions.
✓ The figures in the margin indicate *Full Marks*.
✓ Assume suitable data if necessary.

1. If $\begin{vmatrix} a & a^2 & a^3-1 \\ b & b^2 & b^3-1 \\ c & c^2 & c^3-1 \end{vmatrix} = 0$ where $a \neq b \neq c$; apply properties of determinant to show $abc = 1$. [5]

2. If A be an $n \times n$ matrix, prove that

   $Adj(A).A = A.(AdjA) = |A|I$ where I is an $n \times n$ unit matrix. [5]

3. Find the rank of the following matrix by reducing it into normal form:

   $$\begin{pmatrix} 3 & 1 & 4 \\ 0 & 5 & 8 \\ -3 & 4 & 4 \\ 1 & 2 & 4 \end{pmatrix}$$
   [5]

4. Find the modal matrix for the matrix

   $$A = \begin{pmatrix} 2 & 1 & 1 \\ -2 & 1 & 3 \\ 2 & 1 & -1 \end{pmatrix}$$
   [5]

5. State and prove Green's theorem in plane. [5]

6. Find the total work done in moving the particle in a force field given by
   $\vec{F} = Siny\,\vec{i} + x(1+cosy)\,\vec{j}$ over the circular path $x^2 + y^2 = a^2$, $z = 0$. [5]

7. Evaluate $\iint_s \vec{F}.d\vec{s}$ where $\vec{F} = x\,\vec{i} - y\,\vec{j} + z\,\vec{k}$ and s is the surface of the cylinder $x^2 + y^2 = a^2, 0 < z < b$. [5]

8. Verify Stoke's theorem for $\vec{F} = (x^2 + y^2)\vec{i} - 2xy\,\vec{j}$ taken round the rectangle bounded by the lines $x = \pm a, y = 0, y = b$. [5]

9. Obtain Fourier series for $f(x) = x^3$ in the interval $-\pi \leq x \leq \pi$. [5]

10. Express $f(x) = e^x$ as a half range Fourier Cosine Series in $0 < x < 1$. [5]

11. State existence theorem for Laplace Transform. Obtain the Laplace transform of

    a) $te^{-t} \sin t$ b) $\dfrac{e^{-at} - e^{-bt}}{t}$ 1+2+2]

12. Find the inverse Laplace transform of:

a) $\dfrac{1}{s^2 - 5s + 6}$

b) $\tan^{-1}\dfrac{2}{s}$

[2+5.+2.5]

13. By using Laplace transform, solve the initial value problem:

$y'' + 2y = r(t)$, $y(0) = y'(0) = 0$
Where $r(t) = 1, 0 < t < 1$
          $= 0$, otherwise

[5]

14. Graphically maximize $Z = 5x_1 + 3x_2$ Subject to constraints

$x_1 + 2x_2 \le 50$

$2x_1 + x_2 \le 40$.

$x_1, x_2 \ge 0$

[5]

15. Solve the following Linear Programming Problem by simple method:

Maximize : $Z = 4x + 3y$

Subject to : $2x + 3y \le 6$
              $-x + 2y \le 3$
              $2y \le 5$
              $2x + y \le 4$
              $x, y \ge 0$.

Level	BE	Full Marks	80
Programme	ALL (Except B. Arch)	Pass Marks	32
Year / Part	II / I	Time	3 hrs.

Subject: - Engineering Mathematics III *(SH501)*

✓ Candidates are required to give their answers in their own words as far as practicable.
✓ Attempt *All* questions.
✓ The figures in the margin indicate *Full Marks*.
✓ Assume suitable data if necessary.

1. Use properties of determinant to show [5]

$$\begin{vmatrix} x^2 & x^2-(y-z)^2 & yz \\ y^2 & y^2-(z-x)^2 & zx \\ z^2 & z^2-(x-y)^2 & xy \end{vmatrix} = (x-y)(y-z)(z-x)(x+y+z)(x^2+y^2+z^2)$$

2. Prove that every square matrix can be uniquely expressed as the sum of symmetric and a skew symmetric matrix. [5]

3. Define eigen values and eigen vectors in terms of linear transformation with matrices as operator. Find eigen values of the matrix. [2+3]

$$\begin{pmatrix} -2 & 2 & -3 \\ 2 & 1 & -6 \\ -1 & -2 & 0 \end{pmatrix}$$

4. Test the consistency of the system $x+y+z=3$, $x+2y+3z=4$, $2x+3y+4z=7$ by using rank of matrix method and solve if consistent. [5]

5. If $\vec{F}$ is the gradient of some scalar point functions ϕ i.e $\vec{F}=\nabla\phi$, prove that the line integral is independent of the path joining any two points in the region and conversely. [5]

6. Evaluate $\iint_S \vec{F}.\vec{n}\, ds$, where $\vec{F}=xy\,\vec{i}-x^2\,\vec{j}+(x+z)\vec{K}$ and S is the region of the plane $2x+2y+z=6$ bounded in the first quadrant. [5]

7. State and prove Green's theorem in plane. [5]

8. Apply Gauss' divergence theorem to evaluate $\iint_S\left[(x^3-yz)\vec{i}-2x^2y\,\vec{j}+2\vec{K}\right].\vec{n}\, ds$, where S is the surface of the cube bounded by the planes $x=0$, $x=a$, $y=0$, $y=a$, $z=0$, $z=a$. [5]

9. Expand $f(x) = x\sin x$ as a Fourier series in $-\pi \le x \le \pi$. [5]

10. Obtain half range cosine series for $f(x) = x$ in the interval $0 \le x \le \pi$. [5]

11. Find the Laplace transform of: [3+2]

    i) $t^2\cos at$

    ii) $\dfrac{\sin t}{t}$

12. State convolution theorem for inverse Laplace transform and use it to find the inverse Laplace transform of $\dfrac{S}{(S^2+4)(S^2+9)}$ [1+4]

13. Solve the following initial value problem by using Laplace transform: [5]

$y''+2y'-3y=\sin t,\ y(0)=y'(0)=0$

14. Graphically maximize [5]

$Z=7x_1+10x_2$

Subject to constraints,

$3x_1+x_2\le 9$

$x_1+2x_2\le 8$

$x_1,x_2\ge 0$

15. Solve the following LPP by simplex method using duality of: [10]

Minimize $Z=20x+50y$

Subject to:

$2x+5y\ge 12$

$3x+7y\ge 17$

$x,y\ge 0$

Programme	All (Except B. Arch)	Pass Marks	32
Year / Part	II / I	Time	3 hrs.

Subject: - Engineering Mathematics III (SH501)

✓ Candidates are required to give their answers in their own words as far as practicable.
✓ *Attempt All questions.*
✓ *The figures in the margin indicate Full Marks.*
✓ *Assume suitable data if necessary.*

1. Distinguish a matrix and a determinant. Use property of determinant to prove:

$$\begin{vmatrix} a+b+2c & a & b \\ c & b+c+2a & b \\ c & a & c+a+2b \end{vmatrix} = 2(a+b+c)^3$$

2. Prove that the necessary and sufficient condition for a square matrix to posses an inverse is that it is non singular. [5]

[5]

3. Find the rank of the matrix:

$$\begin{pmatrix} 1 & 0 & -5 & 6 \\ 3 & -2 & 1 & 2 \\ 3 & -2 & -9 & 14 \\ 4 & -2 & -4 & 8 \end{pmatrix}$$ by reducing it to normal form.

[5]

4. State Cayley-Hamilton theorem and use it to find inverse of the matrix $\begin{pmatrix} 4 & 3 & 1 \\ 2 & 1 & -2 \\ 1 & 2 & 1 \end{pmatrix}$ [5]

5. Find the work done by the force $\vec{F} = yz\,\vec{i} + zx\,\vec{j} + xy\,\vec{k}$ in displacement of a particle along the straight segment C from point (1,1,1) to the point (3,3,2). [5]

6. State Gauss divergence theorem and apply it to evaluate $\iint_s \vec{F}.\vec{n}\,ds$, where

$\vec{F} = x\,\vec{i} + y\,\vec{j} + z\,\vec{k}$ and S is the surface of the cube bounded by the planes x = 0, x = a, y = 0, y = a, z = 0, z = a. [5]

[5]

7. State and prove Green's theorem in plane.

8. Verify stokes theorem for the vector field $\vec{F} = (2x - y)\vec{i} - yz^2\,\vec{j} - y^2z\,\vec{k}$ over the upper half of the surface of $x^2 + y^2 + z^2 = 1$ bounded by its projection the xy-plane. [5]

9. Find the Fourier series to represent $f(x) = x - x^2$ from -π to π. [5]

10. Find the half range Fourier sine series for $f(x) = e^{2x}$ in 0 < x < π. [5]

11. Define Laplace transform of a function and state criteria of existence of a Laplace transform of a function. Find the Laplace transform of $f(t) = \dfrac{1 - \cos 2t}{t}$ [1+1+3]

12. Find inverse Laplace transform of [2+3]

    (i) $\dfrac{1}{s(s+2)}$ (ii) $\tan^{-1}\left(\dfrac{1}{s}\right)$

13. Solve the following initial value problem using Laplace transform: [5]

    $y''+4y'+3y=0, \quad y(0)=3, \quad y'(0)=1$

14. Use simplex method to solve the following LPP: [10]

    Maximum $z = 50x_1 + 80x_2$

    Subject to

    $+2x_2 \leq 32$

    $+4x_2 \leq 84$

15. Graphically maximize [5]

    $z = 7x_1 + 10x_2$

    Subject to,

        $3x_1 + x_2 \leq 9$

        $x_1 + 2x_2 \leq 8$

        $x_1, x_2 \geq 0$

Exam.	New Back (2066 & Later Batch)		Full Marks	80
Level	BE		Pass Marks	32
Programme	ALL (Except B. Arch)		Time	3 hrs.
Year / Part	II / I			

Subject: - Engineering Mathematics II *(SH501)*

✓ Candidates are required to give their answers in their own words as far as practicable.
✓ Attempt *All* questions.
✓ The figures in the margin indicate *Full Marks*.
✓ Assume suitable data if necessary.

1. Use properties of determinants to prove: $\begin{vmatrix} a^2 & bc & ac+c^2 \\ a^2+ab & b^2 & ac \\ ab & b^2+bc & c^2 \end{vmatrix} = 4a^2b^2c^2$ [5]

2. Prove that the necessary and sufficient condition for a square matrix A to posses an inverse is that the matrix A should be non singular.   [5]

3. Find the rank of the matrix $\begin{pmatrix} 1 & 3 & -2 & 1 \\ 1 & 1 & 1 & 1 \\ 2 & 0 & -3 & 2 \\ 3 & 3 & -3 & 3 \end{pmatrix}$ [5]

   by reducing it into normal form.

4. Find the eigenvalues and eigenvectors of the matrix $\begin{pmatrix} 2 & 1 & 1 \\ 1 & 2 & 1 \\ 0 & 0 & 1 \end{pmatrix}$ [4+1]

   Give an example showing importance of eigenvectors.

5. Show that $\vec{F} = (2x+z^2)\vec{i} + Z\vec{j} + (y+2xz)\vec{K}$ is irrotational and find its scalar potential.   [5]

6. State and prove Green's Theorem in plane.   [5]

7. Evaluate $\iint_S \vec{F}.\vec{n}\, ds$, where $\vec{F} = yz\vec{i} + zx\vec{j} + xy\vec{k}$ and S is the surface of the sphere $x^2+y^2+z^2 = 1$ in the first octant.   [5]

8. Evaluate $\int_c xy\,dx + xy^2\,dy$ by applying stokes theorem where C is the square in xy-plane with vertices (1,0), (-1,0), (0,1), (0,-1)   [5]

9. Find the Laplace transform of :   [2+3]

   i) $te^{2t}\sin 3t$

   ii) $\dfrac{e^{-t}\sin t}{t}$

10. Find the inverse Laplace transform of : [2+3]

i) $\dfrac{s+2}{s^2-4s+13}$

ii) $\log\left(\dfrac{s+a}{s-a}\right)$

11. Solve the following initial value problem using Laplace transform: [5]

$x''+4x'+4x=6e^{-t}, \quad x(0)=-2, \quad x'(0)=-8$

12. Find the Fourier series representation of $f(x)=|x|$ in $[-\pi, \pi]$ [5]

13. Obtain the half range Fourier Sine Series for the function $f(x)=x^2$ in the interval $(0, 3)$. [5]

14. Apply Graphical method to maximize, [5]

$Z=5x_1+3x_2$

Subject to the constraints:

$x_1+2x_2 \le 50$

$2x_1+x_2 \le 40$

$x_1 \ge 0, \ x_2 \ge 0$

15. Solve the following Linear Programming Problem by Simplex method: [10]

Maximize: $Z=15x_1+10x_2$

Subject to: $x_1+3x_2 \le 10$

$2x_1+x_2 \le 10$

$x_1 \ge 0, \ x_2 \ge 0$

✓ The figures in the margin indicate **Full Marks**.
✓ Assume suitable data if necessary.

1. Use properties of determinants to prove: [5]

$$\begin{vmatrix} a^2+1 & ba & ca & da \\ ab & b^2+1 & cb & db \\ ac & bc & c^2+1 & dc \\ ad & bd & cd & d^2+1 \end{vmatrix} = 1+a^2+b^2+c^2+d^2$$

2. Show that every square matrix can be uniquely expressed as the sum of symmetric and Skew-Symmetric matrices.   [5]

3. Test the consistency of the system $x+y+z=3, x+2y+3z=4$ and $2x+3y+4z=7$ and solve completely if found consistent.   [5]

4. State Cayley-Hamilton theorem and verify it for the matrix; $A = \begin{pmatrix} -2 & 2 & -3 \\ 2 & 1 & -6 \\ -1 & -2 & 0 \end{pmatrix}$ [1+4]

5. Prove that "The line integral $\int_c \vec{F}.d\vec{r}$ of a continuous function $\vec{F}$ defined in a region R is independent of path C joining any two points in R if and only if there exists a single valued scalar function ϕ having first order partial derivatives such that $\vec{F} = \nabla\phi$".   [5]

6. State Green's theorem and use it to find the area of astroid $x^{2/3} + y^{2/3} = a^{2/3}$ [5]

7. Evaluate $\iint_s \vec{F}.\vec{n}\, ds$, where $\vec{F} = x^2\vec{i} + y^2\vec{j} + z^2\vec{k}$ and 's' is the surface of the plane $x+y+z=1$ between the co-ordinate planes.   [5]

8. Apply Gauss' divergence theorem to evaluate $\iint_s \vec{F}.\vec{n}\, ds$ where $\vec{F} = (x^3-yz)\vec{i} - 2x^2y\vec{j} + 2\vec{k}$ and 's' is the surface the cube bounded by the planes $x=0, x=a, y=0, y=a, z=0, z=a$.   [5]

9. Find the Laplace transform of: [2+3]

   i) $t\sin^2 3t$

   ii) $\dfrac{\sin 2t}{t}$

10. Find the inverse Laplace transform of: [2+3]

   i) $\dfrac{1}{s^2 - 3s + 2}$

   ii) $\dfrac{1}{s(s+1)^3}$

11. Apply Laplace transform to solve the differential equation: [5]

   $y'' + 2y' + 5y = e^{-t}\sin t, \quad x(0) = 0, x'(0) = 1$

12. Find a Fourier series to represent $f(x) = x - x^2$ from $x = -\pi$ to $x = \pi$. Hence show that

   $\dfrac{1}{1^2} - \dfrac{1}{2^2} + \dfrac{1}{3^2} - \dfrac{1}{4^2} + \ldots\ldots = \dfrac{\pi^2}{12}$ [5]

13. Develop $f(x) = \sin\left(\dfrac{\pi x}{l}\right)$ in half range Cosine Series in the range $0 < x < l$. [5]

14. Graphically maximize, [5]

   $Z = 7x_1 + 10x_2$

   Subject to constraints,

   $3x_1 + x_2 \le 9$

   $x_1 + 2x_2 \le 8$

   $x_1 \ge 0, x_2 \ge 0$

15. Solve the following LPP using simplex method. [10]

   Maximize: $P = 50x_1 + 80x_2$

   Subject to: $x_1 + 2x_2 \le 32$

   $\qquad\qquad 3x_1 + 4x_2 \le 84$

   $\qquad\qquad x_1 \ge 0, x_2 \ge 0$

Subject: - Engineering Mathematics III (SH501)

✓ Candidates are required to give their answers in their own words as far as practicable.
✓ Attempt All questions.
✓ The figures in the margin indicate Full Marks.
✓ Assume suitable data if necessary.

1. Prove that $\begin{vmatrix} (a+b)^2 & ca & bc \\ ca & (b+c)^2 & ab \\ bc & ab & (c+a)^2 \end{vmatrix} = 2abc(a+b+c)^3$ [5]

2. If A and B are two non singular matrices, then prove that $(AB)^{-1} = B^{-1}A^{-1}$ [5]

3. Find the rank of the matrix: [5]

$$\begin{pmatrix} 1 & -1 & -2 & -4 \\ 2 & 3 & -1 & -1 \\ 3 & 1 & 3 & -2 \\ 6 & 3 & 0 & -7 \end{pmatrix}$$

4. Find the eigen values and eigen vectors of the matrix. [5]

$$\begin{pmatrix} -2 & 2 & -3 \\ 2 & 1 & -6 \\ -1 & -2 & 0 \end{pmatrix}$$

5. Prove that the line integral $\int_A^B \vec{F}.d\vec{r}$ is independent of path joining any two points A and B in the region R, if and only if, $\int_C \vec{F}.d\vec{r} = 0$ for any simple closed path C in R. [5]

6. Evaluate $\iint_S \vec{F}.\vec{n}\,ds$ where $\vec{F} = yz\vec{i} + zx\vec{j} + xy\vec{k}$ where S is the surface of the sphere $x^2 + y^2 + z^2 = 1$ in the first octant. [5]

OR

Apply Stoke's theorem to evaluate $\int_C (x+y)dx + (2x-z)dy + (y+z)\,dz$ where C is the boundary of the triangle with vertices (2,0,0), (0,3,0) and (0,0,6). [5]

7. State Green's theorem in plane and hence apply it to compute the area of the curve $x^{2/3} + y^{2/3} = a^{2/3}$. [5]

8. Apply Gauss divergence theorem to evaluate $\iint_S \vec{F}.\vec{n}\, ds$ where $\vec{F} = x^2\vec{i} + z\vec{j} + yz\vec{k}$ taken over the cube bounded by $x = 0, x = 1, y = 0, y = 1, z = 0, z = 1$. [5]

9. Find the Laplace transform of the following: [2.5×2]

   a) $\dfrac{\cos 2t - \cos 3t}{t}$

   b) $\sin^3 2t$

10. Find the inverse Laplace transform of the following: [2+3]

   a) $\dfrac{1}{s^2 - 5s + 6}$

   b) $\dfrac{s+2}{(s^2 + 4s + 5)^2}$

11. Solve the initial value problem by using Laplace transform: [5]

   $x'' + 2x' + 5x = e^{-t}\sin t; \ x(0) = 0, \ x'(0) = 1$

12. Obtain Fourier Series for the function $f(x) = x - x^2$ from $-\pi$ to π and hence show that: [5]

   $\dfrac{\pi^2}{12} = \dfrac{1}{1^2} - \dfrac{1}{2^2} + \dfrac{1}{3^2} - \dfrac{1}{4^2} + \cdots\cdots$

13. Obtain the half range sine series for the function $f(x) = x^2$ in the interval $(0,3)$. [5]

14. Graphically maximize and minimize [5]

   $Z = 5x_1 + 3x_2$ Subjected to constraints

   $3x_1 + 5x_2 \leq 15$

   $5x_1 + 2x_2 \leq 10, x_1, x_2 \geq 0$

15. Use simplex method to solve the Linear Programming problem: [10]

   Maximize $\quad Z = 15x_1 + 10x_2$

   Subject to $\quad 2x_1 + 2x_2 \leq 10$

   $\quad\quad\quad\quad x_1 + 3x_2 \leq 10$

   and $\quad\quad x_1, x_2 \geq 0$

✓ Assume suitable data if necessary.

1. Using the properties, evaluate the determinant: [5]

$$\begin{vmatrix} 1 & a & a^2 & a^3+bcd \\ 1 & b & b^2 & b^3+cda \\ 1 & c & c^2 & c^3+abd \\ 1 & d & d^2 & d^3+abc \end{vmatrix}$$

2. Prove that every square matrix can uniquely be expressed as the sum of a symmetric and a skew symmetric matrix. [5]

3. Test the consistency of the system: [5]

$$x-6y-z=10, \quad 2x-2y+3z=10, \quad 3x-8y+2z=20$$

And solve completely, if found consistent.

4. Find the eigen values and eigenvecters of the matrix $\begin{pmatrix} 2 & 2 & 1 \\ 1 & 3 & 1 \\ 1 & 2 & 2 \end{pmatrix}$. [5]

5. Using the line integral, compute the workdone by the force [5]

$$\vec{F} = (2x-y+2z)\vec{i}+(x+y-z)\vec{j}+(3x-2y-5z)\vec{k}$$

when it moves once around a circle $x^2+y^2=4; z=0$

6. State and prove Green's Theorem in plane. [5]

7. Verify Stoke's theorem for $\vec{F}=(x^2+y^2)\vec{i}-2xy\vec{j}$ taken around the rectangle bounded by the lines $x=\pm a, y=0, y=b$. [5]

8. Evaluate $\iint_S \vec{F}.\vec{n}\, ds$ where $\vec{F}=(2xy+z)\vec{i}+y^2\vec{j}-(x+3y)\vec{K}$ by Gauss divergence theorem; where S is surface of the plane $2x+2y+z=6$ in the first octant bounding the volume V. [5]

9. Find the Laplace transform of the following: [2.5×2]

a) $te^{-2t}\cos t$

b) $Sinh\, t.\cos t$

10. Find the inverse Laplace transform of : [2.5×2]

a) $\dfrac{1}{S(S+1)}$

b) $\dfrac{S^2}{(S^2+b^2)^2}$

11. Solve the differential equation $y''+2y'+5y = e^{-t}\sin t, y(0)=0, y'(0)=1,$ by using Laplace transform. [5]

12. Expand the function $f(x) = x \sin x$ as a Fourier series in the interval $-\pi \le x \le \pi$. [5]

13. Obtain half range sine series for the function $f(x) = x - x^2$ for $0 < x < 1$. [5]

14. Graphically maximize and minimize [5]

$z = 9x + 40y$ subjected to the constraints

$y - x \ge 1, y - x \le 3, 2 \le x \le 5$

15. Solve the following Linear Programming Problem by Simplex method: [10]

Maximize, $P = 20x_2 - 5x_1$

Subjected to, $10x_2 - 2x_1 \le 5$

$2x_1 + 5x_2 \le 10$ and $x_1, x_2 \ge 0$

***

Exam.	New Back (2066 & Later Batch)		
Level	BE	Full Marks	80
Programme	All (Except B.Arch)	Pass Marks	32
Year / Part	II / I	Time	3 hrs.

Subject: - Mathematics III *(SH501)*

✓ Candidates are required to give their answers in their own words as far as practicable.
✓ Attempt *All* questions.
✓ The figures in the margin indicate *Full Marks*.
✓ Assume suitable data if necessary.

1. Show that: $\begin{vmatrix} (b+c)^2 & b^2 & c^2 \\ a^2 & (c+a)^2 & c^2 \\ a^2 & b^2 & (a+b)^2 \end{vmatrix} = 2abc(a+b+c)^3$ [5]

2. Prove that every square matrix can be uniquely written as a sum of Hermitian and Skew-Hermitian matrices. [5]

3. Find the rank of the matrix by changing it into normal form: $\begin{pmatrix} 3 & 1 & 4 \\ 0 & 5 & 8 \\ -3 & 4 & 4 \\ 1 & 2 & 4 \end{pmatrix}$ [5]

4. Find the eigen value and eigen vector of the matrix: $\begin{pmatrix} 2 & 1 & 1 \\ -2 & 1 & 3 \\ 2 & 1 & -1 \end{pmatrix}$ [5]

5. Using Green's theorem, evaluate $\int_C (y^3 dx - x^3 dy)$ where C is the boundary of the circle $x^2 + y^2 = 4$. [5]

6. Show that $\vec{F}(x,y,z) = y^3 \vec{i} + (3xy^2 + e^{2z}) \vec{j} + 2ye^{2z} \vec{k}$ is conservative vector field and find its scalar potential function. [5]

7. Find the surface integral $\iint_S \vec{F}.\hat{n} \, ds$ where $\vec{F} = x\vec{i} + y\vec{j} + z\vec{k}$ and S is the upper half of the sphere $x^2 + y^2 + z^2 = 1$. [5]

8. Verify Stoke's theorem for $\vec{F}(x,y,z) = (2x-y)\vec{i} - yz^2 \vec{j} - y^2 z \vec{k}$ where S is the upper half of the sphere $x^2 + y^2 + z^2 = 4$ and C is its boundary. [5]

OR

Evaluate using Gauss divergence theorem,
$\iint_S \vec{F}.\hat{n} \, ds$ where $\vec{F}(x,y,z) = x^2 y \vec{i} + xy^2 \vec{j} + 2xyz \vec{k}$ and S is the surface bounded by the planes $x = 0, y = 0, z = 0$ and $x+2y+z = 2$ [5]

9. Find the Laplace transform of (i) $\sin 2t \cosh 4t$ (ii) $te^{2t} \sin 4t$. [5]

10. Using the Convolution theorem, find the inverse Laplace transform of $\dfrac{3s}{(s^2+4)(s^2+1)}$ [5]

11. Solve the following initial value problem using Laplace transform: [5]
$$y''+4y'+3y = e^t, y(0) = 00, y'(0) = 2$$

12. Obtain the half range Fourier sine series of $f(x) = \pi - x$ in the range $0 < x < \pi$. [5]

13. Obtain the Fourier series of $f(x) = e^{3x}$ in $0 < x < 2\pi$. [5]

14. Graphically maximum $Z = 5x_1 + 3x_2$ subject to constraints [5]
$$x_1 + 2x_2 \le 50, 2x_1 + x_2 \le 40 \text{ and } x_1 \ge 0, x_2 \ge 0$$

15. Solve the following linear programming problem by simplex method constructing the duality: [10]

Minimize: $P = 21x_1 + 50x_2$

Subject to $3x_1 + 7x_2 \ge 17$

$2x_1 + 5x_2 \ge 12$

$x_1, x_2 \ge 0$

✓ *Assume suitable data if necessary.*

1. Using the properties of determinant prove [5]

$$\begin{vmatrix} (b+c)^2 & a^2 & a^2 \\ b^2 & (c+a)^2 & b^2 \\ c^2 & c^2 & (a+b)^2 \end{vmatrix} = 2\,a\,b\,c\,(a+b+c)^3$$

2. Prove that $(AB)^T = B^T A^T$ where A is the matrix of size m×p and B is the matrix of size p×n. [5]

3. Find the rank of the following matrix by reducing normal form. $\begin{bmatrix} 1 & 3 & -2 & 1 \\ 1 & 1 & 1 & 1 \\ 2 & 0 & -3 & 2 \\ 3 & 3 & -3 & 3 \end{bmatrix}$ [5]

4. Find the eigen values and eigen vectors of the following matrix. $\begin{bmatrix} 2 & 0 & 1 \\ 0 & 2 & -1 \\ 0 & 0 & 2 \end{bmatrix}$ [5]

5. Prove that the line intergral $\int_A^B \vec{F}.d\vec{r}$ is independent of the path joining any two points A and B in a region if $\int_c \vec{F}.d\vec{r} = 0$ for any simple closed curve C in the region. [5]

6. Evaluate $\iint_S \vec{F}.\hat{n}\ ds$ where $\vec{F} = x^2\vec{i} + y^2\vec{j} + z^2\vec{k}$ and S is the finite plane $x + y + z = 1$ between the coordinate planes. [5]

OR

Evaluate $\iint_S \vec{F}.\hat{n}\ ds$ for $\vec{F} = yz\vec{i} + zx\vec{j} + xy\vec{k}$ where S is the surface of sphere $x^2 + y^2 + z^2 = 1$ in the first octant.

7. Evaluate, $\iint_S \vec{F}.\hat{n}\ ds$ for $\vec{F} = x\vec{i} - y\vec{j} + (z^2-1)\vec{k}$ where S is the surface bounded by the cylinder $x^2 + y^2 = 4$ and the planes $z = 0$ and $z = 1$ [5]

8. Verify the stoke's theorem for $\vec{F} = (2x - y)\vec{i} - yz^2\vec{j} - y^2z\vec{k}$ where S is the upper part of the sphere $x^2 + y^2 + z^2 = a^2$ C is its boundary. [5]

9. Find the Laplace transform of (a) $t^2 \sin zt$ and (b) $\dfrac{1-e^t}{t}$ [2.5×2]

10. Find the inverse Laplace transform of (a) $\dfrac{2s+3}{s^2+5s-6}$ (b) $\dfrac{s^3}{s^4-a^4}$ [2.5×2]

11. Solve the following differential equation by using Laplace transform [5]

   $y''+y'-2y = x$, $y(0) = 1$, $y'(0) = 0$

12. Obtain the Fourior series for $f(x) = x^2$ in the interval $-\pi < x < \pi$ and hence prove that

$$\sum \frac{1}{x^2} = \frac{1}{1^2} + \frac{1}{2^2} + \frac{1}{3^2} \ldots\ldots = \frac{\pi^2}{6}$$ [5]

13. Obtain half range sine series for $f(x) = \pi x - x^2$ in $(0, \pi)$ [5]

14. Graphically minimize $z = 4x_1 + 3x_2 + x_3$ [5]

   Subject to $x_1 + 2x_2 + 4x_3 \geq 12$

   $3x_1 + 2x_2 + x_3 \geq 8$ and $x_1, x_2, x_3 \geq 0$

15. Minimize $z = 8x_1 + 9x_2$ [10]

   Subject to $x_1 + 3x_2 \geq 4$

   $2x_1 + x_2 \geq 5$ with $x_1, x_2 \geq 0$

Exam.	**New Back (2066 & Later Batch)**		
Level	BE	Full Marks	80
Programme	All (Except B. Arch)	Pass Marks	32
Year / Part	II / 1	Time	3 hrs.

Subject: - Engineering Mathematics III (SH501)

✓ Candidates are required to give their answers in their own words as far as practicable.
✓ Attempt **All** questions.
✓ The figures in the margin indicate **Full Marks**.
✓ Assume suitable data if necessary.

1. Prove that: $\begin{vmatrix} a & b & b & b \\ a & b & a & a \\ a & a & b & a \\ b & b & b & a \end{vmatrix} = -(b-a)^4$ [5]

2. Prove that every matrix A can uniquely be expressed as a sum of a symmetric and a skew symmetric matrix. [5]

3. Test the consistency of the system x+y+z = 3, x+2y+3z = 4 and 2x+3y+4z = 7 and solve if consistent. [5]

4. Verify Cayley-Hamilton theorem for matrix A and find the inverse of $\begin{bmatrix} 2 & -1 & 1 \\ -1 & 2 & -1 \\ 1 & -1 & 2 \end{bmatrix}$ [5]

5. State and prove Green's theorem in the plane. [5]

OR

Verify Stroke's theorem for $\vec{F} = (x^2 + y^2)\vec{i} - 2xy\vec{j}$ taken round the rectangle in the xy-plane bounded by x = 0, x = a, y = 0, y = b.

6. Find the work done in moving particle once round the circle $x^2 + y^2 = 9$, z = 0 under the force field $\vec{F}$ given by $\vec{F} = (2x - y + z)\vec{i} + (x + y - z^2)\vec{j} + (3x - 2y + 4z)\vec{k}$ [5]

7. Evaluate $\iint_S \vec{F}.\vec{n}\ ds$ where $\vec{F} = xy\vec{i} - x^2\vec{j} + (x + z)\vec{k}$, s is the portion of the plane 2x+2y+z = 6 included in the first octant. [5]

8. Show that $\iint_S \left[(x^3 - yz)\vec{i} - 2x^2 y\vec{j} + 2\vec{k} \right].\vec{n}\ ds = \frac{a^5}{3}$ where s is the surface of the cube bounded by the planes x = 0, x = a, y = 0, y = a, z = 0, z = a [5]

9. Find the Laplace transform of (i) $f(t) = \frac{1 - \cos t}{t}$ (ii) $f(t) = te^{-t} \sin t$ [5]

10. Find the inverse Laplace transform of (i) $\dfrac{(s+2)^3}{s^4}$ (ii) $\dfrac{1}{s^2(s^2+a^2)}$ [5]

11. Using Laplace Transform to solve: $y''+4y = \sin t$; $y(0) = 0 = y'(0)$ [5]

12. Find a fourier series to represent $f(x) = x - x^2$ from $x = -\Pi$ to $x = \Pi$ [5]

13. Find a fourier series to represent $f(x) = 2x - x^2$ in the range (0,3) [5]

OR

Express $f(x) = x$ as a half range sine series in $0 < x < \Pi$

14. Use simplex method to, Maximize $p = 15x_1 + 10x_2$ [7]
    Subject to $2x_1 + x_2 \le 10$
    $x_1 + 3x_2 \le 10$, $\quad x_1, x_2 \ge 0$

15. Find the dual of following Linear programming problem and solve by simplex method [8]

    Minimize $\quad C = 16x_1 + 45x_2$
    Subject to $\quad 2x_1 + 5x_2 \ge 50$
    $\quad x_1 + 3x_2 \ge 27,$ $\qquad x_1, x_2 \ge 0$

OR

Use Big M-method to solve the following linear programming problem.

    Maximize $p = 2x_1 + x_2$
    Subject to $\quad x_1 + x_2 \le 10$
    $\quad -x_1 + x_2 \ge 2,$ $\qquad x_1, x_2 \ge 0$

Programme	All (Except B.Arch)	Pass Marks	32
Year / Part	II / I	Time	3 hrs.

Subject: - Engineering Mathematics III (SH501)

✓ Candidates are required to give their answers in their own words as far as practicable.
✓ Attempt **All** questions.
✓ The figures in the margin indicate **Full Marks**.
✓ Assume suitable data if necessary.

1. Find the value of the determinant $\begin{vmatrix} a^2 & a^2-(b-c)^2 & bc \\ b^2 & b^2-(c-a)^2 & ca \\ c^2 & c^2-(a-b)^2 & ab \end{vmatrix}$ [5]

2. Show that the matrix $B^\theta AB$ is Hermitian or skew-Hermittian according as A is Hermitian and skew- Hermitian. [5]

3. Find the rank of the matrix $\begin{bmatrix} 6 & 1 & 3 & 8 \\ 4 & 2 & 6 & -1 \\ 10 & 3 & 9 & 7 \\ 16 & 4 & 12 & 15 \end{bmatrix}$ reducing this into the triangular form. [5]

4. Obtain the characteristic equation of the matrix $A = \begin{bmatrix} 1 & 0 & 2 \\ 0 & 2 & 1 \\ 2 & 0 & 3 \end{bmatrix}$ and verify that it is satisfied by A. [5]

5. Evaluate $\int_c \vec{F}.\vec{dr}$, where $\vec{F} = (x-y)\vec{i} + (x+y)\vec{j}$ along the closed curve C bounded by $y^2 = x$ and $x^2 = y$ [5]

6. Find the value of the normal surface integral $\iint_S \vec{F}.\vec{n}\,ds$ for $\vec{F} = x\vec{i} - y\vec{j} + (z^2-1)\vec{k}$, where S is the surface bounded by the cylinder $x^2 + y^2 = 4$ between the planes $Z = 0$ and $Z = 1$. [5]

7. Using Green's theorem, find the area of the astroid $x^{\frac{2}{3}} + y^{\frac{2}{3}} = a^{\frac{2}{3}}$ [5]

8. Verify stoke's theorem for $\vec{F} = 2y\vec{i} + 3x\vec{j} - z^2\vec{k}$ where S is the upper half of the sphere $x^2 + y^2 + z^2 = 9$ and C is its boundary. [5]

OR

Evaluate the volume intergral $\iiint_V \vec{F}\,dv$, where V is the region bounded by the surface $x = 0, y = 0, y = 6, z = x^2, z = 4$ and $\vec{F} = 2xz\vec{i} - x\vec{j} + y^2\vec{k}$

9. Find the Laplace transforms of the following functions [2.5×2]
   a) $t\,e^{-4t}\sin3t$
   b) $\dfrac{\cos at - \cos bt}{t}$

10. State and prove the second shifting theorem of the Laplace transform. [5]

11. Solve the following differential equation using Laplace transform. [5]

$$\frac{d^2y}{dx^2} + \frac{dy}{dx} - 2y = x \text{ given } y(0) = 1, y'(0) = 0$$

12. Obtain the Fourier series for $f(x) = x^2$ in the interval $-\pi < x < \pi$ and hence show that

$$\sum \frac{1}{n^2} = \frac{1}{1^2} + \frac{1}{2^2} + \frac{1}{3^2} + \ldots\ldots = \frac{\pi^2}{6}$$ [5]

13. Express $f(x) = x$ as a half-range sine series in $0 < x < 2$ [5]

14. Maximize $Z = 4x_1 + 5x_2$ subject to constraints [5]

$$2x_1 + 5x_2 \leq 25$$
$$6x_1 + 5x_2 \leq 45$$
$$x_1 \geq 0 \text{ and } x_2 \geq 0$$

graphically

15. Solve the following linear programming problem using the simplex method. [10]

Maximize $P = 50x_1 + 80x_2$
Subject to $x_1 + 2x_2 \leq 32$
$$3x_1 + 4x_2 \leq 84$$
$$x_1, x_2 \geq 0$$

Subject: - Electromagnetics (EX 503)

✓ Candidates are required to give their answers in their own words as far as practicable.
✓ *Attempt All questions.*
✓ *The figures in the margin indicate Full Marks.*
✓ *Necessary formula sheet is attached herewith.*
✓ *Assume suitable data if necessary.*

1. Express a scaler potential field $V=x^2+2y^2+3z^2$ in spherical coordinates. Find the value of P at a point $(2,60^\circ,90^\circ)$. [4+1]

2. Derive the expression for an electric field intensity due to an infinite line charge using Gauss's Law. Find electric flux density at point P(6, 5, 4) due to a uniform line charge of 6nC/m at x = 4, y = 2, point charge 10nC at Q(3, 2, 4) and uniform surface charge density of $0.4nC/m^2$ at x = 3. [3+5]

3. Two uniform charges 8 nC/m are located at x = 1, z = 2 and x = -1, y = 2 in free space respectively. If the potential at origin is 100 V. Find V at P (4, 1, 3). [6]

4. Derive Poisson Equation. Find the capacitance of parallel plate capacitor by solving Laplace equation with potential difference between the plates as V_o. [3+4]

5. Evaluate both sides of Stokes's theorem for the field $\vec{H} = 12 \sin\theta \hat{a}_\phi$ and the surface $r = 4, 0 \le \theta \le 90^\circ, 0 \le \phi \le 90^\circ$. Let the surface have the $\hat{a}_r$ direction [6]

6. Differentiate Scalar Magnetic Potential and Vector Magnetic Potential. Given magnetic vector potential $\vec{A} = -\frac{\rho^2}{4}\hat{a}_z$ Wb/m. Calculate the total magnetic flux crossing the surface $\phi = \frac{\pi}{2}, 1 \le \rho \le 2, 0 \le z \le 5$. [2+6]

7. List out point form of Maxwell's equations in phasor form for time varying case. Using these equations, derive the electric field component of a uniform plane wave travelling in the perfect dielectric medium. [2+6]

8. A 9.375 GHz uniform plane wave is propagating in polythene (ε_r=2.26, μ_r=1). If the amplitude of the electric field intensity is 500 V/m and the material is assumed to be lossless: Find the phase constant, wavelength, velocity of propagation and intrinsic impedance. [2+2+2+2]

9. Explain the term Skin Depth. Using Poynting Vector deduce the time- average power density for a perfect dielectric. [4+4]

10. A lossless 60 Ω line is 1.8λ long and is terminated with pure resistance of 80 Ω. The load voltage is $15\angle30^0$ V.(i) Average power delivered to load (ii) Magnitude of minimum voltage on the line. [4+4]

11. What are the advantages of waveguides over transmission line? Consider a rectangular waveguide of dimension a=1.07 cm, b=0.43 cm. Find the cutoff frequency for TM_{11} mode. (E_r=2, μ=μ_0) [2+4]

12. Write short notes about antenna and its parameters. [2]

Exam.		Back	
Level	BE	Full Marks	80
Programme	BEX, BCT,BEL BEI	Pass Marks	32
Year / Part	II / I	Time	3 hrs.

Subject: - Electro-magnetics *(EX 503)*

✓ Candidates are required to give their answers in their own words as far as practicable.
✓ Attempt **All** questions.
✓ The figures in the margin indicate **Full Marks**.
✓ **Necessary formula sheet is attached herewith.**
✓ Assume suitable data if necessary.

1. The Magnetic field Intensity in a certain region is given as $\vec{H} = 20\hat{a}_\rho - 10\hat{a}_\phi + 3\hat{a}_z A/m$. Transform this field vector into Cartesian co-ordinate at P(x=5, y=2, z=-1). [5]

2. A point charge of 6μc located at origin, uniform line charge density of 180nc/m lies along x-axis and uniform sheet charge of 25c/m² lies on z=0 plane. Find $\vec{D}$ at point (1,2,4). [6]

3. Differentiate between divergence and gradient. Let $V = \dfrac{\cos 2\phi}{\rho}$ in free space.(i) Find the volume charge density at point A (0.5,60°,1). (ii) Find the surface charge density on a conductor surface passing through the point B(2,30°,1). [2+3+3]

4. Define curvilinear square method for calculating capacitance. A square grid shown in figure below within a given potential. Find the potential at point a, b, c, d, e, f, g, h and i using iteration method. Complete it using single iteration only. [4+4]

V = 100V

infinitesimal gap

a   b   c

V = 0V   d   e   f   V = 0V

g   h   i

V = 0V

infinitesimal gap
5. Justify the maxwell's equation: $\oint_s \vec{B}.d\vec{S} = 0$ with necessary remarks. Derive an expression of magnetic field intensity for an infinite filament carrying a direct current using vector magnetic potential. [2+6]

6. Define Biot savart's law. Let the permittivity be $5\mu H/m$ in region A where $x<0$, and $20\mu H/m$ in region B where $x>0$. If there is a surface current density ,

$$\vec{K} = 150\hat{a}_y - 200\hat{a}_z \, A/m \text{ at } x=0 \text{ and if } \vec{H} = 300\hat{a}_x - 400\hat{a}_y + 500\hat{a}_z \, A/m, \text{find}$$

$\left|\vec{H}_{tA}\right|, \left|\vec{H}_{NA}\right|, \left|\vec{H}_{tB}\right| \text{ and } \left|\vec{H}_{NB}\right|$

[2+6]

7. Define poynting vector. Using this deduce the time average power density for a dissipative medium.

[2+6]

8. A conductor with cross-sectional area of $10cm^2$ carries conduction current $\vec{J} = 0.2\sin 10^9 t\hat{a}_z \, mA$. Given that $\sigma = 2.5 \times 10^6 S/m$, and $\in_r = 6$. Calculate the magnitude of the displacement current density.

[5]

9. A uniform plane wave in free space is given by Magnetic field intensity $\vec{H}$ in phasor form as: $\vec{H}_s = 400 \angle 30° \, e^{-j250z}\hat{a}_y \, A/m$ Find:

a) Angular frequency (ω).

b) Wavelength (λ) and intrinsic impedance (η).

c) Electric field intensity $\vec{E}(x,y,z,t)$ at z=50mm and t= 4pS.

[2+2+4]

10. The parameters of a certain transmission line operating at 6×10^8 rad/s are $L = 0.4\mu H/m$, $C = 40pF/m$, $G = 80mS/m$, and $R = 20\Omega/m$. Find γ, λ and Z_0 (characteristic impedance). [3+3+2]

11. A standard air-filled rectangular waveguide with dimensions 8.636cm×4.318cm is fed by a 4GHz carrier from a coaxial cable. Determine if a TE_{10} mode will be propagating or not. [6]

12. What are the parameters of antenna? List out the types of Antenna.

Exam.		Back	
Level	BE	Full Marks	80
Programme	BEL,BEX,BEI,BCT	Pass Marks	32
Year / Part	II / I	Time	3 hrs.

Subject: - Electro-Magnetics (EX 503)

✓ Candidates are required to give their answers in their own words as far as practicable.
✓ Attempt **All** questions.
✓ The figures in the margin indicate **Full Marks**.
✓ **Necessary formula sheet are attached herewith.**
✓ Assume suitable data if necessary.

1. Transform the vector $\vec{A} = y\vec{a}_x - (x+y)\vec{a}_y + z\vec{a}_z$ at point P (-3,4,5) in cylindrical coordinate system. [5]

2. Define electric flux density. Given the field $\vec{D} = \frac{20}{\rho^2}(-\sin^2\phi\hat{a}_p + \sin 2\phi\hat{a}_\phi)$, evaluate both sides of the divergence theorem for the region bounded by $1 < \rho < 2, 0 < \phi < 90°, 0 < z < 1$. [1+7]

3. State Divergence's Theorem. A current density in certain region is given as

   $$\vec{j} = \frac{400\sin\theta.\vec{ar}}{r^2}A/m^2 .$$

   Find the total current flowing through that portion of the spherical surface r = 0.8 bounded by $0.1\pi < \theta < 0.3\pi, 0 < \phi < 2\pi$. [2+6]

4. Find the equation for Energy Density in the electrostatic field. [7]

5. Define curl. Evaluate both side of Stoke's Theorem for $\vec{H} = 8z\vec{a}_x - 4x^3\vec{a}_z A/m$ and rectangular path P(2,3,4) to Q(4,3,4) to R (2,3,1) to S(2,3,1) to P. [1+7]

6. State Biot-Savart's law. A filamentary current of 10A is directed in from infinity to the orgin on the positive x-axis and then block out to infinity along the positive z-axis. Use the Biot-Savart's law to determine $\vec{H}$ at P(0,1,0). [2+6]

7. State Faraday's law of electromagnetic induction. Explain motional induction and transformer induction with necessary expressions. [1+3+3]

8. Derive an expression for electric field and magnetic field for a uniform plane wave propagating in a free space. [7]

9. Determine skin depth, propagation constant and velocity of wave at 1 MHz in good conductor with conductivity of 1.9×10^7 mho per meter. [2+2+2]

10. A 200Ω transmission line is lossless, 0.25 λ long and is terminated in $Z_L = 400Ω$. The line has the generator with 80 <0° V in series with 100Ω connected to the input. (a) Find the load voltage (b) Find the voltage at the midpoint of the line. [4+4]

11. Explain the different modes of propagation supported by waveguides. A rectangular waveguide has a cross-section of 2.5 cm × 1.2 cm. Determine if the signal of 5 GHz propagates in the dominant mode. [2+4]

12. What are the parameters of antenna? List out the types of Antenna. [2]

Exam.	Regular		
Level	BE	Full Marks	80
Programme	BEL, BEX, BEI, BCT	Pass Marks	32
Year / Part	II / I	Time	3 hrs.

Subject: - Electro-magnetics (EX 503)

✓ Candidates are required to give their answers in their own words as far as practicable.
✓ Attempt All questions.
✓ The figures in the margin indicate Full Marks.
✓ Necessary formula sheet are attached herewith.
✓ $\vec{A}$ represent a vector and $\vec{a}_{subscript}$ denotes a unit vector along the direction given by the subscript.
✓ Assume suitable data if necessary.

1. Transform the vector $\vec{F}$ into the cylindrical co-ordinate system.
   $\vec{F} = 10\vec{a_x} - 8\vec{a_y} + 6\vec{a_z}$ at point P(x = 10, y = -8, z = 6)   [5]

2. Define electric dipole moment. Two uniform line charges, 8 nC/m each, are located at x = 1, z = 2 and at x = -1, y = 2 in free space. If the potential at the origin is 100 V, find V at P(4, 1, 3).   [2+6]

3. State Gauss's Law. The region y < 0 contains a dielectric material for which ε_{r1} = 2.5, while the region y > 0 is characterized by ε_{r2} = 4. Let $\vec{E_1} = -30\hat{a}_x + 50\hat{a}_y + 70\hat{a}_z$ V/m, find the electric field intensities, flux densities in region 2 and the angle θ_1, which is the angle made by normal component of $\vec{E}$ or $\vec{D}$ with total $\vec{E}$ or $\vec{D}$.   [2+3+2+1]

4. Derive Poisson's equation. Assuming that the potential V in the cylindrical coordinate system is the function of ρ only, solve the Laplacian equation by integration method and derive the expression for the capacitance of co-axial capacitor using the same solution of V.   [2+5]

5. State Stoke's theorem. Evaluate both sides of Stroke's theorem for the field $\vec{H} = 8xy\hat{a}_x - 5y^2\hat{a}_y$ A/m and the rectangular path around the region $2 \le x \le 5$, $-1 \le y \le 1$, z = 0. Let the positive direction of $\vec{dS}$ be $\hat{a}_z$.   [1+7]

6. Define Ampere's Circuital law. Determine H at P_2(0.4, 0.3, 0) in the field of an 8 A filamentary current directed inward from infinity to the origin on the positive x axis, and then outward to infinity along the y axis.   [2+6]

7. Explain motional induction with necessary derivations. Correct the equation $\nabla \times \vec{H} = \vec{J}$ with necessary arguments and derivation for time varying fields.   [3+4]

8. Derive the expression for electric and magnetic fields for a uniform plane wave propagating in a dissipative medium.   [4+3]

9. A uniform plane wave in free space is given by $\vec{H}_S = (250 \angle 30°)e^{-j350Z} \hat{a}_x$ V/m. Determine phase constant, frequency of the wave, intrinsic impedance, $\vec{E}_S$ at z = 25 mm and t = 4ps.   [1+2+1+2]

10. Define the secondary parameters of a transmission line. A lossless transmission line with Zo = 50 ohm has a length of 0.4λ. The operating frequency is 300 MHz and it is terminated with a load Z_L = 40 + j30. Find: [2+1+2+3]
    a) Reflection Coefficient
    b) Standing wave ratio on the line (SWR) .
    c) Input impedance (Zin)

11. Differentiate between TE and TM modes. Consider a rectangular waveguide with ε_r = 4, $\mu = \mu_0$ with dimensions a = 2.08 cm, b = 0.54 cm. Find the cutoff frequency for TM_{11} mode and the dominant mode.   [3+3]

12. Write short note on antenna and its types.   [2]

***

Divergence

Cartesian : $\nabla \cdot \vec{D} = \dfrac{\partial D_x}{\partial x} + \dfrac{\partial D_y}{\partial y} + \dfrac{\partial D_z}{\partial z}$

Cylindrical : $\nabla \cdot \vec{D} = \dfrac{1}{\rho} \dfrac{\partial (\rho D_\rho)}{\partial \rho} + \dfrac{1}{\rho} \dfrac{\partial D_\phi}{\partial \phi} + \dfrac{\partial D_z}{\partial z}$

Sphecrical : $\nabla \cdot \vec{D} = \dfrac{1}{r^2} \dfrac{\partial (r^2 D_r)}{\partial r} + \dfrac{1}{r \sin \theta} \dfrac{\partial (D_\theta \sin \theta)}{\partial \theta} + \dfrac{1}{r \sin \theta} \dfrac{\partial D_\phi}{\partial \phi}$

Gradient

Cartesian : $\nabla V = \dfrac{\partial V}{\partial x} \hat{a}_x + \dfrac{\partial V}{\partial y} \hat{a}_y + \dfrac{\partial V}{\partial z} \hat{a}_z$

Cylindrical : $\nabla V = \dfrac{\partial V}{\partial \rho} \hat{a}_\rho + \dfrac{1}{\rho} \dfrac{\partial V}{\partial \phi} \hat{a}_\phi + \dfrac{\partial V}{\partial z} \hat{a}_z$

Spherical : $\nabla V = \dfrac{\partial V}{\partial r} \hat{a}_r + \dfrac{1}{r} \dfrac{\partial V}{\partial \theta} \hat{a}_\theta + \dfrac{1}{r \sin \theta} \dfrac{\partial V}{\partial \phi} \hat{a}_\phi$

Curl

Cartesian : $\nabla \times \vec{H} = \left(\dfrac{\partial H_z}{\partial y} - \dfrac{\partial H_y}{\partial z} \right) \hat{a}_x + \left(\dfrac{\partial H_x}{\partial z} - \dfrac{\partial H_z}{\partial x} \right) \hat{a}_y + \left(\dfrac{\partial H_y}{\partial x} - \dfrac{\partial H_x}{\partial y} \right) \hat{a}_z$

Cylindrical : $\nabla \times \vec{H} = \left(\dfrac{1}{\rho} \dfrac{\partial H_z}{\partial \phi} - \dfrac{\partial H_\phi}{\partial z} \right) \hat{a}_\rho + \left(\dfrac{\partial H_\rho}{\partial z} - \dfrac{\partial H_z}{\partial \rho} \right) \hat{a}_\phi + \dfrac{1}{\rho} \left(\dfrac{\partial (\rho H_\phi)}{\partial \rho} - \dfrac{\partial H_\rho}{\partial \phi} \right) \hat{a}_z$

Spherical : $\nabla \times \vec{H} = \dfrac{1}{r \sin \theta} \left(\dfrac{\partial (H_\phi \sin \theta)}{\partial \theta} - \dfrac{\partial H_\theta}{\partial \phi} \right) \hat{a}_r + \dfrac{1}{r} \left(\dfrac{1}{r \sin \theta} \dfrac{\partial H_r}{\partial \phi} - \dfrac{\partial (r H_\phi)}{\partial r} \right) \hat{a}_\theta + \dfrac{1}{r} \left(\dfrac{\partial (r H_\theta)}{\partial r} - \dfrac{\partial H_r}{\partial \theta} \right) \hat{a}_\phi$

Laplacian:

Cartesian: $\nabla^2 V = \dfrac{\partial^2 V}{\partial x^2} + \dfrac{\partial^2 V}{\partial y^2} + \dfrac{\partial^2 V}{\partial z^2}$

Cylindrical: $\nabla^2 V = \dfrac{1}{\rho} \dfrac{\partial}{\partial \rho} \left(\rho \dfrac{\partial V}{\partial \rho} \right) + \dfrac{1}{\rho^2} \dfrac{\partial^2 V}{\partial \phi^2} + \dfrac{\partial^2 V}{\partial z^2}$

Spherical: $\nabla^2 V = \dfrac{1}{r^2} \dfrac{\partial}{\partial r} \left(r^2 \dfrac{\partial V}{\partial r} \right) + \dfrac{1}{r^2 \sin \theta} \dfrac{\partial}{\partial \theta} \left(\sin \theta \dfrac{\partial V}{\partial \theta} \right) + \dfrac{1}{r^2 \sin^2 \theta} \dfrac{\partial^2 V}{\partial \phi^2}$

Subject: - Electromagnetics (*EX 503*)

✓ Candidates are required to give their answers in their own words as far as practicable.
✓ Attempt *All* questions.
✓ The figures in the margin indicate *Full Marks*.
✓ Assume suitable data if necessary.

1. Express the vector field $A = (x-y) \, a_y$ in cylindrical and spherical coordinate systems. [5]

2. Find the total charge inside the volume indicated: [4]

$$\rho_v = 4xyz^2, \, 0 \le \rho \le 2, \, 0 \le \phi \le \frac{\pi}{2}, \, 0 \le z \le 3.$$

3. Obtain the equation of the streamline that passes through the point P (-2,7,10) in the field: [4]

$$\vec{E} = 2(y-1)\hat{a}_x + 2x \, \hat{a}_y.$$

4. Given the potential field in cylindrical coordinates, $V = [100/(z^2 + 1)] \rho \cos\phi \, V$, and point P at $\rho = 3$ m, $\phi = 60°$, z = 2 m, find values at P for (a) V; (b) E; (c) E; (d) dV/dN; (e) a_N; (f) ρ_v in free space. [6]

5. Define gradient and laplacian function. A point charge of 16nC is located at Q (2,3,5) in free space and a uniform line charge of 5nC/m is at the intersection of the plane x=2 and y=4. If the potential at the origin is 100V, Find V at P (4,1,3). [2+6]

6. Define curl and its significance in Electromagnetics. Evaluate both sides of stokes theorem for the field $H=6xy \, a_x - 3y^2 \, a_y$ A/m and the rectangular path around the region $2 \le x \le 5, -1 \le y \le 1, z = 0$, let the positive direction of ds be a_z. [2+6]

7. Justify the Maxwell's equation: $\oint_S \vec{B} . \vec{dS} = 0$ with necessary remarks. Derive an expression of magnetic field intensity for an infinite filament carrying a direct current using vector magnetic potential. [2+6]

8. Write down the Maxwell equation in phasor form. Derive the equation for electric field for a uniform plane wave travelling in air. [2+6]

9. A uniform plane wave in free space in given by Electric field intensity $\vec{E}$ in phasor form as:

$$\vec{E}_s = 200 \angle 30° e^{-j250z} \hat{a}_x \text{ V/m Find}:$$

a) Angular frequency (ω)

b) Wavelength (λ) and intrinsic impedance (η)

c) Magnetic field intensity $\vec{H}(x,y,z,t)$ at z = 8 mm and t = 6pS. [2+2+4]

10. Define Faraday's law. A conductor with cross-sectional area of 10 cm^2 carries conduction current $\vec{J} = 0.2 \sin 10^9 t\, \hat{a}_z$ mA. Given that $\sigma = 2.5 \times 10^6$ S/m, and $\varepsilon_r = 6$. Calculate the value of the displacement current.

[2+4]

11. A lossless transmission line is 80 cm long and operates at a frequency of 600 MHz. The line parameters are L= 0.25 μH/m and C = 100pF/m. Find the characteristic impedance, the phase constant, the phase velocity on the line, and the input impedance for $Z_L=100\Omega$. [8]

12. Define dominant mode. A standard air-filled rectangular waveguide with dimensions 8.636 cm × 4.318 cm is fed by a 8 GHz carrier from a coaxial cable. Determine if a TE$_{10}$ mode will be propagating or not.

[1+4]

13. Write short notes on antenna and its parameters.

Year / Part	II / I	Time	3 hrs.

Subject: - Electro-magnetics (EX 503)

✓ Candidates are required to give their answers in their own words as far as practicable.
✓ Attempt **All** questions.
✓ The figures in the margin indicate **Full Marks**.
✓ *Necessary data are attached herewith.*
✓ $\vec{A}$ represent a vector and $\vec{a}_{subscript}$ denotes a unit vector along the direction given by the subscript.
✓ Assume suitable data if necessary.

1. Given a point P (-2, 6, 3) and vector field $\vec{A} = y\vec{a}_x + (xy + z)\vec{a}_y$, express P and $\vec{A}$ in spherical co-ordinate system. [5]

2. A point charge of 6µc located at origin, uniform line charge density of 180nc/m lies along x-axis and uniform sheet charge of 25 c/m² lies on z = 0 plane. Find $\vec{D}$ at point (1, 2, 4). [7]

3. Derive the expression for an electric field intensity due to an infinitely long line charge with charge density ρ_L by using Gauss's law. Find the volume charge density that is associated with the field $\vec{D} = xy^2\vec{a}_x + x^2y\vec{a}_y + z\vec{a}_z \, C/m^2$. [4+3]

4. State continuity equation. Given the vector current density $\vec{J} = 10\rho^2 z\vec{a}_\rho - 4\rho\sin^2\phi\vec{a}_\phi$ mA/m². Determine the current following outward the circular band $\rho = 5$, $0 < \phi < 2\pi$, $2 < z < 2.8$. [2+4]

5. Differentiate between scalar magnetic potential and vector magnetic potential. If a vector magnetic potential is $\vec{A} = -(\rho^2/4)\vec{a}_z$ wb/m, calculate total magnetic flux crossing the surface $\phi = \pi/2$, $1 \leq \rho \leq 2$ m and $0 \leq z \leq 5$ m. [4+4]

6. The region y < 0 (region 1) is air and y > 0 (region 2) has $\mu_r = 10$. If there is a uniform magnetic field $\vec{H} = 5\hat{a}_x + 6\hat{a}_y + 7\hat{a}_z$ A/m in region 1, find $\vec{B}$ and $\vec{H}$ in region 2. [8]

7. Correct the equation $\nabla \times \vec{E} = 0$ for time varying field with necessary derivation. Also modify the equation $\nabla \times \vec{H} = \sigma\vec{E}$ with necessary arguments and derivation for time varying field. [3+4]

8. A uniform plane wave in free space is given by $\vec{H}_s = (250\angle 30°)e^{-j350z}\vec{a}_x \, V/m$. Determine phase constant, frequency of the wave, intrinsic impedance, $\vec{E}_s$ and the magnitude $\vec{H}$ of at z = 25 mm and t = 4ps. [1+1+2+2+2]

9. Derive the expression for electric and magnetic fields for a uniform plane wave propagating in a free space. [8]

10. A lossless transmission line is 80 cm long and operates at a frequency 1 GHz. The line parameters are L = 0.5 µH/m and C = 200 pF/m. Find the characteristics impedance, the phase constant, the velocity on the line, and the input impedance for $Z_L = 100\Omega$. [2+2+2+2]

11. Write short notes on TE and TM modes of rectangular waveguide. An air filled rectangular waveguide has cross-section of 2.3 cm × 1.02 cm. Calculate the cutoff frequency of the dominant mode (TE₁₀). [3+3]

12. Write short notes about antenna and its parameters. [2]

Level	BE	Full Marks	80
Programme	BEL, BEX, BEI, BCT	Pass Marks	32
Year / Part	II / I	Time	3 hrs.

Subject: - Electromagnetics *(EX 503)*

✓ Candidates are required to give their answers in their own words as far as practicable.
✓ *Attempt __All__ questions.*
✓ *The figures in the margin indicate __Full Marks__.*
✓ *__Necessary data are attached herewith.__*
✓ $\vec{A}$ represent a vector and $\vec{a}_{subscript}$ denotes a unit vector along the direction given by the subscript.
✓ *Assume suitable data if necessary.*

1. Transform a vector field $\vec{A} = 4\vec{a_x} - 2\vec{a_y} - 4\vec{a_z}$ into cylindrical coordinate system at a point P (2, 3, 5). [5]

2. A plane x = 2 carry a surface charge density 10 nC/m², a line x = 0 and z = 3 carry a line charge density 10 nC/m and a point charge of 10nC is at origin. Calculate $\vec{E}$ at (1, 1, -1) due to these charge configurations. [7]

3. Evaluate the both sides of divergence theorem for the field $\vec{D} = 2xy\vec{a}_x + x^2\vec{a}_y\, C/m^2$ and the rectangular parallelopiped formed by the planes x = 0 and 1, y = 0 and 2, and z = 0 and 3. [7]

4. If potential field in free space is $V = \frac{10}{r^2}\sin\theta\cos\phi$ V and point P is located at (2, 90°, 0°). Find: (a) $\vec{E}$ (b) direction of $\vec{E}$ at P (c) energy density at P. [2+2+2]

5. Find the vector magnetic field intensity $\vec{H}$ in Cartesian coordinates at P (2, 1, 3) caused filament of 12 Ampere(A) in a $\vec{a_z}$ direction on the z-axis and extending from z = 0 to z = 4. [8]

6. Consider a boundary at z = 0 which carries current $\vec{K} = \left(\frac{1}{\mu_0}\right)\vec{a_y}$ mAm. Medium 1 (z < 0) is filled with material whose $\mu_r = 6$ and medium 2 (z > 0) is filled with material whose $\mu_r = 4$. If $\vec{B_2} = 5\vec{a_x} + 8\vec{a_z}$ mT, find $\vec{B_1}$. [8]

7. Define Poynting vector. Using this deduce the time average power density for a dissipative medium. [2+5]

8. A uniform plane wave has a magnetic field component $\vec{H} = 15\cos(2 \times 10^8 t + \beta x)\vec{a_y}$ A/m in a medium characterized by $\sigma = 0$, $\varepsilon = 4\varepsilon_0$, $\mu = \mu_0$. Find [5+1+2]
   a) direction of propagation, phase constant β, wavelength λ, velocity v_p, intrinsic impedance η
   b) Magnitude of $\vec{H}$
   c) $\vec{E}$

9. A uniform plane wave in air partially reflects from the surface of a material whose properties are unknown. Measurements of the electric field in the region in front of the interface yield a 1.5 m spacing between maxima, with the first maximum occurring 0.75 m from the interface. A standing wave ratio (SWR) of 5 is measured. Determine the intrinsic impedance of the unknown material. [8]

10. A 50 Ω lossless transmission line is 0.4 λ long. The line is terminated with a load $Z_L = 40 + j30$ Ω. If the operating frequency is 300 MHz, find   [2+2+4]
    a) reflection coefficient (Γ)
    b) standing wave ratio (s) and
    c) input impedance (Z_m)

11. Explain why TEM wave doesn't exist in a rectangular waveguide? A rectangular waveguide has dimensions a = 1 cm, b = 2 cm. The medium within the waveguides has $\varepsilon_r = 1$, $\mu_r = 1$, $\sigma = 1$. Find whether or not the signal with the frequency of 500 MHz will be transmitted in the $TE_{1,0}$ mode.   [2+4]

12. What are the parameters of antenna? List out the different types of antenna you have studied.   [1+1]

***

Divergence

Cartesian : $\nabla \cdot \bar{D} = \dfrac{\partial D_x}{\partial x} + \dfrac{\partial D_y}{\partial y} + \dfrac{\partial D_z}{\partial z}$

Cylindrical : $\nabla \cdot \bar{D} = \dfrac{1}{\rho} \dfrac{\partial (\rho D_\rho)}{\partial \rho} + \dfrac{1}{\rho} \dfrac{\partial D_\phi}{\partial \phi} + \dfrac{\partial D_z}{\partial z}$

Sphercical : $\nabla \cdot \bar{D} = \dfrac{1}{r^2} \dfrac{\partial (r^2 D_r)}{\partial r} + \dfrac{1}{r \sin \theta} \dfrac{\partial (D_\theta \sin \theta)}{\partial \theta} + \dfrac{1}{r \sin \theta} \dfrac{\partial D_\phi}{\partial \phi}$

Gradient

Cartesian : $\nabla V = \dfrac{\partial V}{\partial x} \hat{a}_x + \dfrac{\partial V}{\partial y} \hat{a}_y + \dfrac{\partial V}{\partial z} \hat{a}_z$

Cylindrical : $\nabla V = \dfrac{\partial V}{\partial \rho} \hat{a}_\rho + \dfrac{1}{\rho} \dfrac{\partial V}{\partial \phi} \hat{a}_\phi + \dfrac{\partial V}{\partial z} \hat{a}_z$

Spherical : $\nabla V = \dfrac{\partial V}{\partial r} \hat{a}_r + \dfrac{1}{r} \dfrac{\partial V}{\partial \theta} \hat{a}_\theta + \dfrac{1}{r \sin \theta} \dfrac{\partial V}{\partial \phi} \hat{a}_\phi$

Curl

Cartesian : $\nabla \times \bar{H} = \left(\dfrac{\partial H_z}{\partial y} - \dfrac{\partial H_y}{\partial z} \right) \hat{a}_x + \left(\dfrac{\partial H_x}{\partial z} - \dfrac{\partial H_z}{\partial x} \right) \hat{a}_y + \left(\dfrac{\partial H_y}{\partial x} - \dfrac{\partial H_x}{\partial y} \right) \hat{a}_z$

Cylindrical : $\nabla \times \bar{H} = \left(\dfrac{1}{\rho} \dfrac{\partial H_z}{\partial \phi} - \dfrac{\partial H_\phi}{\partial z} \right) \hat{a}_\rho + \left(\dfrac{\partial H_\rho}{\partial z} - \dfrac{\partial H_z}{\partial \rho} \right) \hat{a}_\phi + \dfrac{1}{\rho} \left(\dfrac{\partial (\rho H_\phi)}{\partial \rho} - \dfrac{\partial H_\rho}{\partial \phi} \right) \hat{a}_z$

Spherical : $\nabla \times \bar{H} = \dfrac{1}{r \sin \theta} \left(\dfrac{\partial (H_\phi \sin \theta)}{\partial \theta} - \dfrac{\partial H_\theta}{\partial \phi} \right) \hat{a}_r + \dfrac{1}{r} \left(\dfrac{1}{\sin \theta} \dfrac{\partial H_r}{\partial \phi} - \dfrac{\partial (r H_\phi)}{\partial r} \right) \hat{a}_\theta + \dfrac{1}{r} \left(\dfrac{\partial (r H_\theta)}{\partial r} - \dfrac{\partial H_r}{\partial \theta} \right) \hat{a}_\phi$

Laplacian:

Cartesian: $\nabla^2 V = \dfrac{\partial^2 V}{\partial x^2} + \dfrac{\partial^2 V}{\partial y^2} + \dfrac{\partial^2 V}{\partial z^2}$

Cylindrical: $\nabla^2 V = \dfrac{1}{\rho} \dfrac{\partial}{\partial \rho} \left(\rho \dfrac{\partial V}{\partial \rho} \right) + \dfrac{1}{\rho^2} \dfrac{\partial^2 V}{\partial \phi^2} + \dfrac{\partial^2 V}{\partial z^2}$

Spherical: $\nabla^2 V = \dfrac{1}{r^2} \dfrac{\partial}{\partial r} \left(r^2 \dfrac{\partial V}{\partial r} \right) + \dfrac{1}{r^2 \sin \theta} \dfrac{\partial}{\partial \theta} \left(\sin \theta \dfrac{\partial V}{\partial \theta} \right) + \dfrac{1}{r^2 \sin^2 \theta} \dfrac{\partial^2 V}{\partial \phi^2}$

Subject: - Electromagnetics *(EX 503)*

✓ Candidates are required to give their answers in their own words as far as practicable.
✓ *Attempt All questions.*
✓ *The figures in the margin indicate Full Marks.*
✓ *Necessary formulas are attached herewith.*
✓ *Assume suitable data if necessary.*

1. Transform the vector $\vec{A} = 4\hat{a}_x - 2\hat{a}_y - 4\hat{a}_z$ into spherical co-ordinates at a point P(x = -2, y = -3, z = 4). [5]

2. An infinite uniform line charge $\rho L = 2nC/m$ lies along the x-axis in free space, while point charges of 8nC each are located at (0, 0, 1) and (0, 0, -1). (a) Find $\vec{D}$ at (2, 3, -4). [6]

3. Define uniqueness theorem. Find the energy stored in free space for the region 2mm< r< 3mm, 0<θ<90°, 0<φ<90°, given the potential field V = : [2+6]

   a) $\dfrac{200}{r}V$ and   b) $\dfrac{300}{r^2}\cos\theta V$

4. Using the continuity equation elaborate the concept of Relaxation Time Constant (RTC) with necessary derivations. Let $\vec{J} = \dfrac{e^{-10^4 t}}{\rho^2}\hat{a}_\rho$ A/m² be the current density in a given region. At t = 10ms, calculate the amount of current passing through surface ρ = 2m, $0 \le z \le 3m, 0 \le \phi \le 2\pi$. [4+4]

5. State and prove the Stoke's Theorem. Calculate the value of the vector current density: In cylindrical coordinates at $P_B(1.5,90°,0.5)$ if $\vec{H} = \dfrac{2}{\rho}(\cos 0.2\,\phi)\,\hat{a}\rho$. [5+3]

6. Define scalar magnetic potential. The region y<0 (region 1) is air and y>0 (region 2) has $\mu_r = 10$. If there is a uniform magnetic field $\vec{H} = 5\hat{a}_x + 6\hat{a}_y + 7\hat{a}_z$ A/m in region 2, find $\vec{B}$ and $\vec{H}$ in region 2. [2+6]

7. List out the Maxwell equations phasor form for time varying case in free space. A conducting bar can slide freely over two conducting rails placed at x = 0 and x = 10cm. Calculate the induced voltage in the bar if the bar slides at a velocity $\vec{V} = 10a\hat{y}$ m/s and $\vec{B} = 3\hat{a}_z$ mWb/m². [2+3]

8. A uniform plane wave in free space is given by $\vec{H_S} = (250\angle 30°)e^{-j350Z}\hat{a}_x \, V/m$. Determine phase constant, frequency of the wave, intrinsic impedance, $\vec{E_S}$ and the magnitude $\vec{H}$ of at z = 25mm and t = 4ps.   [1+2+1+2+2]

9. Within a certain region, $\epsilon = 10^{-11} F/m$ and $\mu = 10^{-5} H/m$. If $B_x = 2 \times 10^{-4} \cos 10^5 t \sin 10^{-3} y$ T find: [3+3+2]

   a) Find $\vec{E}$
   b) Find the total magnetic flux passing through the surface x = 0, 0 < y < 40m, 0 < z < 2m at t = 1 µs

   c) Find the value of the closed line integral of $\vec{E}$ around the perimeter of the given surface.

10. A transmission line operating at 120MHz has R = 20Ω/m, L = 0.3µH/m, C = 63pF/m and G = 4.2ms/m. Find   [3+3+2]

    a) Propagation coefficient (γ)
    b) Velocity of wave propagation on the line (v)
    c) Characteristic impedance (Z₀)

11. A rectangular waveguide has dimension a = 4cm and b = 2 cm. Determine the cut-off frequency and range of frequencies over with the guide will operate single mode.   [6]

12. Write short notes on antenna and its types.   [2]

Exam.		Back	
Level	BE	Full Marks	80
Programme	BEL, BEX, BCT	Pass Marks	32
Year / Part	II / I	Time	3 hrs.

Subject: - Electromagnetics (EX 503)

✓ Candidates are required to give their answers in their own words as far as practicable.
✓ Attempt All questions.
✓ The figures in the margin indicate Full Marks.
✓ Necessary charts and codes are attached herewith.
✓ Assume suitable data if necessary.

1. Given points A ($\rho = 5$, $\varphi = 70"$, $z = -3$) and B ($\rho = 2$, $\varphi = -30"$, $z = 1$),find: (a) a unit vector in cartesian coordinates at A directed toward B; (b) a unit vector in cylindrical coordinates at A directed toward B. [5]

2. Two uniform line charges, each 20 nC/m, are located at $y = 1$, $z = \pm1$ m. Find the total electric flux leaving the surface of a sphere having a radius of 2 m, if it is centered at A (3, 1, 0). [6]

3. Derive Energy Density in electrostatic field. [7]

4. The conducting planes $2x + 3y = 12$ and $2x + 3y = 18$ are at potentials of 100 V and 0, respectively. Let $\varepsilon = \varepsilon_0$ and find: a) V at P (5, 2, 6); b) E at P(5,2,6). [7]

5. Let a filamentary current of 5 mA be directed from infinity to the origin on the positive z axis and then back out to infinity on the positive x axis. Find H at P (0, 1, 0). [8]

6. State Ampere's circuital law. Let the permittivity be 5 µH/m in region A where $x < 0$, and 20 µH/m in region B where $x > 0$. If there is a surface current density $K = 150a_y - 200a_z$ A/m at $x = 0$,and if $H_A = 300a_x - 400a_y + 500a_z$ A/m, find: (a) $|H_{LA}|$; (b) $|H_{NA}|$; (c) $|H_{LB}|$; (d) $|H_{NB}|$. [10]

7. State and explain the Maxwell's equation in differential and integral form. Also define the displacement current and depth of penetration. [10]

8. Establish the relation for Helmholtz's equation for electromagnetic wave propagation. [5]

9. State and prove Poynting's theorem. [6]

10. A load $Z_l = 80 + j100\Omega$ is located at $z = 0$ on a lossless 50-Ω line. The operating frequency is 200 MHz and the wavelength on the line is 2 m. (a) If the line is 0.8 m in length, use the Smith chart to find the input impedance. (b) What is s? (c) What is the distance from the load to the nearest voltage maximum? [7]

11. An air-filled rectangular waveguide has dimensions a = 2 cm and b = 1 cm. Determine the range of frequencies over which the guide will operate single mode (TE₁₀). [3]

12. Write short notes on:. [3x2]
    a) TE mode and TM mode
    b) Antenna Properties

Subject: - Electromagnetics (EX 503)

✓ Candidates are required to give their answers in their own words as far as practicable.
✓ Attempt All questions.
✓ The figures in the margin indicate Full Marks.
✓ Necessary figures are attached herewith.
✓ Assume suitable data if necessary.
′ Assume that the Bold Faced letter represents a vector and $a_{subscript}$ represents a unit vector.

1. Find the vector that extends from A(-3,-4,6) to B(-5,2,-8) and express it in cylindrical coordinate system. [1+4]

2. A point charge of 12nC is located at the origin. Four uniform line charges are located in the x=0 plane as follow: 80nc/m at y=-1 and -5m, -50 nC/m at y=-2 and -4 m. Find the electric flux density D at P(0,-3,2). [7]

3. Let the region z<0 be composed of a uniform dielectric material for which $\varepsilon_{R1}=3.2$, while the region z>0 is characterized by $\varepsilon_{R2}=2$. Let $D_1=-30a_x+50a_y+70a_z$ nC/m^2 and find:- [7]

   a) D_{t1} (Tangential component of D in Region 1);
   b) Polarization (P_1);
   c) E_{n2} (Normal component of E in Region 2)
   d) E_{t2} (Tangential component of E in Region 2)

4. Derive the Possion's and Laplace's equations. Assuming that the potential V in the cylindrical coordinate system is the function of 'r' only, solve the Laplace's equation by Integration Method an derive the expression for the capacitance of the Spherical Capacitor using the same solution of V. [2+5]

5. Derive the equation for magnetic field intensity in different regions due to a co-axial cable carrying a uniformly distributed dc current I in the inner conductor and –I in the outer conductor. [6]

6. Find the vector magnetic field intensity H in Cartesian coordinate at P(-1.5, -4, 3) caused by a current filament of 12A in the a_z direction on the z-axis and extending from z=-3 to z=3. [6]

7. Define Curl and give the physical interpretation of the Curl with a suitable example. [1+3]

8. A uniform plane wave in free space is propagating in the $-a_y$ direction at a frequency of 5 MHz. If E=200 cos ($\omega t+\beta y$) a_z V/m, write the expressions for electric and magnetic fields, i.e., E_s (x,y,z) and H_s (x, y, z) respectively in phasor forms. [3+5]

9. Derive an expression for Standing Wave Ratio (SWR) indicating where on the z-axis you'll get the maximum and minimum value of electric field intensity E. Assume that the boundary is at z=0, the region z<0 is a perfect dielectric and the region z>0 may be of any material. [8]

10. Find the amplitude of the displacement current density in an air space within a large power transformer where $H = 10^6 \cos(377t + 1.2566 \times 10^{-6}z) \, a_y$ A/m. [6]

11. A lossless 50-Ω line is 1.5λ long and is terminated with a pure resistance of 100Ω. The load voltage is $40\underline{/60^\circ}$V. Find: (a) the average power delivered to the load; (b) the magnitude of the minimum voltage on the line. [4+4]

12. What are the advantages and disadvantages of waveguides when you compare it with transmission lines? Explain the transverse electric (TE) and transverse magnetic (TM) modes used in rectangular waveguides. [3+3]

13. Give the definition of an antenna and explain the properties of any one type of antenna that you have studied during your electromagnetics course. [1+1]

1. Expres in cartesian components: (a) the vector at A($\rho = 4$, $\Phi = 40°$, $z = -2$) that extends to B($\rho = 5$, $\Phi = -110°$, $z = 2$); (b) a unit vector at B directed toward A.   [3+2]

2. Derive an Electric Field Intensity $\vec{E}$ in between the two co-axial cylindrical conductors, the inner of radius 'a' and outer of radius 'b', each infinite in extent and assuming a surface charge density ρ_s on the outer surface of the inner conductor. An infinite uniform line charge $\rho_L = 2$ nC/m lies along the x-axis in free space, while the point charge of 8nC each are located at (0, 0, 1). Find $\vec{E}$ at (2, 3, -4)   [4+4]

3. Derive the integral and point forms of continuity equation. In a certain region, $\vec{j} = 3r^2 \cos\theta \vec{a_r} - r^2 \sin\theta \vec{a_\theta} A/m^2$. Find the current crossing the surface defined by $\theta = 30°$, $0 < \phi < 2\pi$, $0 < r < 2$.   [5+3]

4. Given the field, $\vec{D} = \dfrac{5\sin(\theta)\cos(\phi)}{r} a_r C/m^2$, find: (a) the volume charge density; (b) the total charge contained in the region r < 2 m; (c) the value of D at the surface r = 2.   [2+2+2]

5. Differentiate between scalar and vector magnetic potential. Derive the expression for magnetic boundary conditions.   [3+5]

6. State Stroke's theorem. Evaluate both sides of Stroke's theorem for the field $\vec{G} = 10\sin\theta \hat{a_\phi}$ and the surface r = 3, $0 \le \theta \le 2\pi$, $0 \le \phi \le 90°$. Let the surface have the $\hat{a_r}$ direction.   [1+7]

7. Find the capacitance of a spherical capacitor using Laplace's equation.   [6]

8. Write point form of all the Maxwell's Equations in phasor domain, for perfect dielectric material. Use these equations to derive the magnetic field component of a uniform plan wave travelling in the perfect dielectric medium.   [2+6]

9. Let $\vec{E}(z,t) = 1800 \cos(10^7 \pi t - \beta z) \vec{a_x}$ V/m and $\vec{H}(z,t) = 3.8\cos(10^7 \pi t - \beta z) \vec{a_y}$ A/m represents a uniform plane wave propagating at a velocity of 1.4×10^8 m/s in perfect dielectic. Find a) β b) λ c) η d) μ_r e) ε_r.   [2+1+2+2+1]

10. The velocity of propagation in a lossless transmission line 2.5×10^8 m/s. If the capacitance of the line is 30 pf/m, find:

[2+2+2+2]

a) Inductance of the line
b) Characteristic impedance
c) Phase constant at 100 MHZ
d) Reflection coefficient if the line is terminated with a resistive load of 50Ω

11. What are the advantages of waveguides over transmission lines? A rectangular waveguide has a cross-section of 2.5 cm × 1.2 cm. Find the cut-off frequencies at dominant mode and TE (1,1)

[1+4]

12. Write short notes on: Antenna properties

Subject: - Electromagnetics (EX503)

✓ Candidates are required to give their answers in their own words as far as practicable.
✓ Attempt All questions.
✓ The figures in the margin indicate Full Marks.
✓ The $\xrightarrow{a_{subscript}}$ denotes a unit vector along the direction of subscript.
✓ Necessary formulas are attached herewith.
✓ Assume suitable data if necessary.

1. An uniform Electric Field Intensity in certain region is given by $\vec{E} = y\vec{a}_x - xy\vec{a}_y + z\vec{a}_z$. Transform this field vector into cylindrical co-ordinate at a point P(2, 45°, 3). [5]

2. A uniform line charge density of 150 μC/m lies at x = 2, z = −4 and a uniform sheet of charge equal to 25 nC/m² is placed at z = 5 plane. Find $\vec{D}$ at point (1, 2, 4) and convert it to the spherical coordinate system. [5+3]

3. Given the potential function $V = \dfrac{20\cos\theta}{r^2} V$ in free space and point P is located at r = 3m, θ = 60°, φ = 30° find: a) $\vec{E}_P$ b) $\dfrac{dV}{dN}$ at P c) unit normal vector at P d) ρ_v at P. [2+1+1+2]

4. Define Relaxation time Constant (RTC). Derive an expression for RTC. Given the vector current density $\vec{J} = 10\rho^2 z\vec{a}_\rho - 4\rho\cos^2\phi\vec{a}_\phi \, mA/m^2$. Find the current flowing outward through the circular band ρ = 3, 0 < φ < 2π, 2 < z < 2.8. [1+3+4]

5. Show that the vector magnetic potential can be defined in both the regions where $\vec{J}$ is equal or non-equal to zero. Use the concept of vector magnetic potential to derive the Magnetic Field Intensity due to an infinite current carrying filament carrying DC current I. [3+5]

6. State Stoke's theorem. Given the field $\vec{H} = \dfrac{1}{2}\cos\left(\dfrac{\phi}{2}\right)\vec{a}_\rho - \sin\left(\dfrac{\phi}{2}\right)\vec{a}_\Phi \, A/m$, evaluate both sides of Stroke's theorem for the path formed by the intersection of the cylinder ρ = 3 and the plane z = 2, and for the surface defined by ρ = 3, 0 ≤ z ≤ 2, and z = 0, 0 ≤ ρ ≤ 3. [1+7]

7. State Faradays Law. Correct the equation $\nabla \times \vec{H} = \vec{J}$ with necessary arguments and derivation for time varying field. [2+4]

8. Derive the expressions for reflection coefficient and transmission coefficient for the reflection of uniform waves at normal incidence. [8]

9. At 50 MHz, a lossy dielectric material is characterized by $\epsilon = 3.6\epsilon_0$, $\mu = 2.1\mu_0$ and $\sigma = 0.08$ S/m. If $\vec{E}_s = 6e^{-\gamma x}\,\vec{a}_z$ V/m, Compute: [2+2+4]

a) Propagation Constant
b) Wavelength
c) $\vec{H}_s$

10. State the condition for lossless transmission line. A lossless transmission line is 80 cm long and operates at a frequency of 600 MHZ. The line parameters are L = 0.25μH/m and C = 100 pF/m. Find a) characteristics impedance b) phase constant c) phase velocity. [1+2+3+2]

11. Differentiate between Transmission line and waveguide. Consider a rectangular waveguide with $\epsilon_r = 2$, $\mu_r = 1$ with dimensions a = 1.07 cm, b = 0.43 cm find the cut off frequency for TM_{11} mode and the dominant mode. [1+4]

12. Write short notes on antenna and its parameters. [2]

Programme	BEL, BEX, BCT	Pass Marks	32
Year / Part	II / I	Time	3 hrs.

Subject: - Electromagnetics (EX503)

✓ Candidates are required to give their answers in their own words as far as practicable.
✓ Attemp   t *All* questions.
✓ The figures in the margin indicate **Full Marks**.
✓ *Necessary formula is attached herewith.*

$\vec{A}$ represents a vector and $\vec{a}_{subscript}$ denotes a unit vector along the direction given by the subscript.
✓
✓ Assume suitable data if necessary.

1. Convert the vector $\vec{F} = F_x \vec{a}_x + F_y \vec{a}_y + F_z \vec{a}_z$ to both spherical coordinate system. [5]

2. Find the electric field intensity in all three regions due to an infinite sheet parallel plate capacitor having surface charge density ρ_s c/m^2 and $-\rho_s$ c/m^2 and placed at $y = 0$ and $y = b$ respectively. Let a uniform line charge density, 3 nC/m, at $y = 3$; uniform surface charge density, 0.2 nC/m^2 at $x = 2$. Find $\vec{E}$ at the origin. [4+4]

3. What is dipole? Derive the equation for potential and electric field due to dipole at a distant point P. [1+6]

4. Derive Poisson's equation. By solving Laplace's equation, find the capacitance of a parallel plate capacitor with potential difference between the plates equals V_0. [1+5]

5. Verify stoke's theorem for the field $\vec{H} = \left(\dfrac{3r^2}{\sin\theta}\right)\vec{a}_\theta + 54r\cos\theta\,\vec{a}_\phi$ A/m in free space for the conical surface defined by $\theta = 20°$, $0 \le \phi \le 2\pi$, $0 \le r \le 5$. Let the positive direction of $\vec{ds}$ be $\vec{a}_\theta$. [8]

6. Consider a boundary at $z = 0$ for which $\vec{B}_1 = 2\vec{a}_x - 3\vec{a}_y + \vec{a}_z$ mT, $\mu_1 = 4$ μH/m $(z > 0)$, $\mu_2 = 7$ μH/m $(z < 0)$ and $\vec{K} = 80\vec{a}_x$ A/m at $z = 0$. Find $\vec{B}_2$ [8]

7. Explain how Ampere's law conflict with continuity equation and how it is corrected? Derive conduction and displacement current in a capacitor. [4+3]

8. Derive the expression for electric and magnetic fields for a uniform plane wave propagating in a perfect dielectric medium. [5+3]

9. A 9.4 GHz uniform plane wave is propagating in a medium with $\epsilon_r = 2.25$ an $\mu_r = 1$. If the magnetic field intensity is 7 mA/m and the material is loss less, find [1+1+1+2+2]
   i) Velocity of propagation
   ii) The wave length
   iii) Phase constant
   iv) Intrinsic impedance
   v) Magnitude of electric field intensity

10. A lossless line having an air dielectric has a characteristics impedance of 400 Ω. The line is operating at 200 MHz and $z_{in} = 200 - j200\,\Omega$. Find (a) SWR (b) Z_L, if the line is 1 m long; (c) the distance from the load to the nearest voltage maximum.   [2+4+2]

11. Differentiate between transmission line and waveguide. A rectangular waveguide having cross-section of 2 cm × 1 cm is filled with a lossless medium characterized by $\varepsilon = 4\varepsilon_0$ and $\mu_r = 1$. Calculate the cut-off frequency of the dominant mode.   [4+2]

12. Write short notes on antenna and its properties.   [2]

Subject: - Electromagnetics (EX503)

✓ Candidates are required to give their answers in their own words as far as practicable.
✓ Attempt __All__ questions.
✓ The figures in the margin indicate __Full Marks__.
✓ __Necessary formula is attached herewith.__

   $\vec{A}$ represents a vector and $\vec{a}_{subscript}$ denotes a unit vector along the direction given by the subscript.

✓ Assume suitable data if necessary.

1. Express a scalar potential field $V = x^2 + 2y^2 + 3z^2$ in spherical coordinates. Find the value of V at a point P(2,60°,90°). [3+2]

2. Derive the expression of Electric field intensity due to a line charge using Gauss Law. Find Electric flux density at point P(5,4,3) due to a uniform line charge of 2 nC/m at x = 5, y =3, point charge 12 nC at Q(2,0,6) and uniform surface charge density of 0.2 nC/m^2 at x = 2. [4+4]

3. State the physical significance of divergence. Derive the Divergence theorem. Given the potential $V = \frac{10}{r^2}\sin\theta\cos\phi$; find the electric flux density $\vec{D}$ at $\left(2, \frac{\pi}{2}, 0\right)$. [2+2+3]

4. Derive Laplace's equation. Find the capacitance of a co-axial cable using Laplace's equation. [1+5]

5. State Ampere's circuital law. By using Biot Savart's law, derive an expression for magnetic field intensity $\left(\vec{H}\right)$ due to an infinite length filament carrying a direct current I. [2+6]

6. Flux density at medium with $\mu_1 = 15$ is $\vec{B}_1 = 1.2a_x + 8a_y + 4a_z$ T. Find $\vec{B}, \vec{H}$ and the angles between the field vectors and tangent to the interface at second medium, if second medium has $\mu_2 = 1$, and interface plane is z = 0. [3+2+3]

7. State and derive the expression of motional emf (electromotive force). Consider two parallel conductors placed at x =0 and x = 5 cm in a magnetic field $\vec{B} = 6a_z$ mWb/m^2. A high resistance voltmeter is connected at one end and a conducting bar is sliding at other end with velocity $\vec{v} = 18 a_y$ m/s. Calculate the induced voltage and show the polarity of induced voltage across the voltmeter. [1+3+3]

8. What is standing wave? Derive the equation of Electric field and Magnetic field and SWR of standing wave? [1+7]

9. An EM wave travels in free space with the electric field component $\vec{E} = \left(15\vec{a}_y - 5\vec{a}_z\right)$ $\cos(\omega t - 3y + 5z)V/m$. Find (a) ω and λ (b) the magnetic field component. [2+2+3]

10. A 50Ω lossless transmission line is 30 m long and is terminated with a load $Z_L = 60 + j40\Omega$. The operating frequency is 20 MHz and velocity on the line is 2.5×10^8 m/s. Find [2+2+4]

    i) Reflection coefficient
    ii) Standing wave ratio
    iii) Input impedance

11. Explain TE and TM modes? Consider a rectangular waveguide with $\epsilon r = 2.25$ and $\mu_r = 1$ with dimensions a = 1.07, b = 0.43. Find the cut-off frequency for TM_{11} mode and dominant mode. [2+4]

12. Write short notes on antenna and its type. [2]

Exam.	New Back (2066 & Later Batch)		
Level	BE	Full Marks	80
Programme	BEL, BEX, BCT	Pass Marks	32
Year / Part	II / I	Time	3 hrs.

Subject: - Electromagnetics (EX503)

✓ Candidates are required to give their answers in their own words as far as practicable.
✓ Attempt **All** questions.
✓ The figures in the margin indicate **Full Marks**.
✓ **Necessary tables are attached herewith.**
✓ $\vec{A}$ represent a vector and $\hat{a}$ subscript and $\vec{a}$ subscript denotes a unit vector along the direction given by the subscript.
✓ Assume suitable data if necessary.

1. Define a vector field. A field vector is given by an expression
   $$\vec{A} = \frac{1}{\sqrt{x^2+y^2+z^2}}\left(X\vec{a}_x + y\vec{a}_y + z\vec{a}_z\right),$$ transform this vector in cylindrical coordinate system at point $(2, 30°, 6)$ [2+3]

2. Given the flux density $\vec{D} = (2\cos\theta/r^3)\vec{a}_r + (\sin\theta/r^3)\vec{a}_\theta$ C/m², evaluate both sides of the divergence theorem for the region defined by $1 < r < 2, 0 < \theta < \frac{\pi}{2}, 0 < \phi < \frac{\pi}{2}$. [8]

3. Define electric dipole and polarization. The region $z < 0$ contains a dielectric material for which $\varepsilon_{r1} = 2.5$ while the region $z > 0$ is characterized by $\varepsilon_{r2} = 4$. Let $\vec{E}_1 = -30\hat{a}_x + 50\hat{a}_y + 70\hat{a}_z$ V/m. Find: (a) $\vec{E}_2$ (b) $\vec{D}_2$ (c) polarization in region 2 $\left(\vec{P}_2\right)$. [2+2+2+1+1]

4. State the uniqueness theorem and prove this theorem for Laplace's equation. [1+5]

5. A current density in certain region is given as: $\vec{J} = 20\sin\theta\cos\phi\,\vec{a}_r + \frac{1}{r}\vec{a}_\phi$ A/m², Find: [5+3]

   i) The average value of J_r over the surface $r = 1, 0 < \theta < \pi/2, 0 < \phi < \pi/2$

   ii) $\frac{\delta\rho_v}{\partial t}$

6. Show that $\nabla \times \vec{E} = 0$ for static electric field. The region $y<0$ (Region 1) is air and $y>0$ (Region 2) has $\mu_r = 10$. If there is a uniform magnetic field $\vec{H} = 5\vec{a}_x + 6\vec{a}_y + 7\vec{a}_z$ A/m in region 1, find $\vec{B}$ and $\vec{H}$ in region 2. [2+3+3]

7. Find the amplitude of the displacement current density in a metallic conductor at 60 Hz, if $\varepsilon = \varepsilon_0, \mu = \mu_0, \sigma = 5.8 \times 10^7$ S/m, and $\vec{J} = \sin(377t - 117.1z)\vec{a}_x$ MA/m². [5]

8. Explain the phenomena when a plane wave is incident normally on the interface between two different Medias. Derive the expression for reflection and transmission coefficient. [8]

9. A uniform plane wave in non-magnetic medium has $\vec{E} = 50\cos(10^8 t + 2z)\hat{a}_y$ V/m. Find:
   i) The direction of propagation
   ii) Phase constant β, wavelength λ, velocity v_p, relative permittivity ε_r, intrinsic impedance η
   iii) $\vec{H}$

   [1+5+2]

10. Determine the primary constants (R, L, C and G) on the transmission line when the measurement on the line at 1 KHz gave the following results: $z_0 = 710\angle-16°$, $\alpha = 0.01$ neper/m and $\beta = 0.035$ rad/m. [8]

11. Explain the modes supported by a rectangular waveguide. Calculate the cut off frequencies of the first four propagating modes for an air filled copper waveguide with dimension $a = 2.5$ cm, $b = 1.2$ cm. [2+4]

12. Write short notes on antenna and its types. [2]

✓ *__Necessary tables are attached herewith.__*
✓ $\vec{A}$ *represent a vector and* $\hat{a}_{subscript}$ *and* $\vec{a}_{subscript}$ *denotes a unit vector along the direction given by the subscript.*
✓ *Assume suitable data if necessary.*

1. Express the uniform vector field $\vec{F} = 5\vec{a}_x$ in (a) cylindrical components (b) spherical components. [2+3]

2. Derive the expression for the electric field intensity due to an infinitely long line charge with uniform charge density ρ_L by using Gauss's law. A uniform line charge density of 20 nC/m is located at $y = 3$ and $z = 5$. Find $\vec{E}$ at $P(5,6,1)$ [4+4]

3. Derive an expression to calculate the potential due to a dipole in terms of the dipole moment $\left(\vec{p}\right)$. A dipole for which $\vec{p} = 3\vec{a}_x - 5\vec{a}_y + 10\vec{a}_z$ nC.m is located at the point $(1,2,-4)$. Find $\vec{E}$ at P. [4+4]

4. Assuming that the potential V in the cylindrical coordinate system is function of ρ only, solve the Lapplace's equation and derive the expression for the capacitance of coaxial capacitor of length L using the same solution of V. Assume the inner conductor of radius a is at potential V_0 with respect to the conductor of radius b. [6]

5. State and derive expression for Stoke's theorem. Evaluate the closed line integral of $\vec{H}$ from $P_1(5,4,1)$ to $P_2(5,6,1)$ to $P_3(0,6,1)$ to $P_4(0,4,1)$ to P_1 using straight line segments, if $\vec{H} = 0.1y^3 \vec{a}_x + 0.4x \vec{a}_z$ A/m. [1+3+4]

6. Define scalar magnetic potential and show that it satisfies the Laplace's equation. Given the vector magnetic potential $\vec{A} = -\left(\rho^2/4\right)\hat{a}_z$ Wb/m, calculate the total magnetic flux crossing the surface $\phi = \pi/2$, $1 \le \rho \le 2$ m and $0 \le z \le 5$ m. [1+2+5]

7. How does $\nabla \times \vec{H} = \vec{J}$ conflict with continuity equation in time varying fields. How is this conflict rectified in such fields? [2+3]

8. Derive the expression for electric and magnetic fields for a uniform plane wave propagating in a perfect dielectric space. [5+3]

9. A lossless dielectric material has $\sigma = 0, \mu_r = 1, \varepsilon_r = 4$. An electromagnetic wave has magnetic field expressed as $\vec{H} = -0.1\cos(\omega t - z)\vec{a}_x + 0.5 \sin\cos(\omega t - z)\vec{a}_y$ A/m. Find: [2+2+4]

   a) Angular frequency (ω)
   b) Wave impedance (η)
   c) $\vec{E}$

10. Consider a two-wire 40 Ω line ($Z_0 = 40\Omega$) connecting the source of 80 V, 400 kHz with series resistance 10 Ω to the load of $Z_L = 60\Omega$. The line is 75 m long and the velocity on the line is 2.5×10^8 m/s. Find the voltage $V_{in,s}$ at input end and $V_{L,s}$ at output end of the transmission line. [8]

11. Why does a hollow rectangular waveguide not support TEM mode? A rectangular air-filled waveguide has a cross-section of 45×90 mm. Find the cut-off frequencies of the first four propagating modes. [2+4]

12. Write short notes on antenna and its types. [2]

Subject: - Electromagnetics (EX503)

✓ Candidates are required to give their answers in their own words as far as practicable.
✓ Attempt **All** questions.
✓ The figures in the margin indicate **Full Marks**.
✓ **Necessary formula sheet is attached herewith.**
✓ $\vec{a}_{subscript}$ denote a unit vector along the direction given by the subscript.
✓ Assume suitable data if necessary.

1. Transform $\vec{A} = 10\vec{a}_x - 8\vec{a}_y + 6\vec{a}_z$; at point p(10,-8,6) to cylindrical coordinate system. [5]

2. A line charge of 8nC/m is located at x = -1, y = 2, a point charge of 6mC at y = -4 and a surface charge of 30 pC/m^2 at z = 0. If the potential at origin is 100V, find the potential at P (4,1,3). [7]

3. Explain the Continuity equation. The current density in certain region is approximated by $\vec{J} = \left(\dfrac{0.1}{r}\right)e^{-10^6 t}\vec{a}_r A/m^2$ in spherical coordinates. (a) How much current is crossing the surface r = 50cm at t = 1μS? (b) Find ρ_v (r,t) assuming that $\rho_v \to 0$ as t → ∞. [2+6]

4. Find the equation for Energy Density in the electrostatic field. [6]

5. Differentiate between scalar and vector magnetic potential. Derive an expression for the magnetic field intensity $\left(\vec{H}\right)$ at a point due to an infinite filament carrying a direct current I, placed on z-axis using ampere's circuital law. [2+6]

6. State and prove Stoke's theorem. Given $\vec{H} = 10\sin\theta\vec{a}_r$ in free space. Find the current in $\vec{a}_r$ direction having r = 3, 0 ≤ θ ≤ 90°, 0 ≤ φ ≤ 90°. [3+5]

7. Within a certain region, $\varepsilon = 10^{-11}$ F/m and $\mu = 10^{-5}$ H/m.

   If $\vec{B}_x = 2\times10^{-4}\cos 10^5 t\sin 10^{-3} y\,\vec{a}_x$ T: (a) Use $\nabla\times\vec{H} = \varepsilon\dfrac{\partial\vec{E}}{\partial t}$ to find $\vec{E}$; (b) Find the total magnetic flux passing through the surface x = 0, 0 ≤ y ≤ 40m, 0 ≤ z ≤ 2m, at t = 1μS. [4+4]

8. Derive an expression for standing wave ratio of uniform plane wave in terms of reflection coefficient. Find the reflection coefficient for the interface between air and fresh water ($\varepsilon = 81\varepsilon_0$, $\sigma \cong 0$), in case of normal incidence. [5+3]

9. The magnetic field intensity $\left(\vec{H}\right)$ in free space is given as,

$$\vec{H}(x,t) = 10\cos(10^8 t + \beta x)\vec{a}_y \, A/m \quad \text{find:} \qquad [2+1+3]$$

   a) Phase constant (β)
   b) Wavelength
   c) $\left|\vec{E}(x,t)\right|$ at P $(0.1,0.2,0.3)$ at $t = 1nS$

10. A 300 Ω transmission line is lossless, 0.25λ long, and is terminated in $Z_L = 500\ \Omega$. The line has a generator with 90 $\angle 0°V$ in series with 100 Ω connected to the input. Find (a) the load voltage (b) voltage at the midpoint of the line. $\qquad [4+4]$

11. Determine the cut-off frequency for an air filled rectangular waveguide with a = 2.5 cm and b = 1.25 cm for TE_{11} mode. $\qquad [4]$

12. Write short notes on: $\qquad [2+2]$

   a) Loss tangent

   b) Antenna types and properties

Year / Part	II / I	Time	3 hrs.

Subject: - Electromagnetic (EX503)

✓ Candidates are required to give their answers in their own words as far as practicable.
✓ Attempt All questions.
✓ The figures in the margin indicate Full Marks.
✓ Necessary formula sheet is attached herewith.
✓ $\overrightarrow{a_{subscript}}$ denote a unit vector along the direction given by the subscript.
✓ Assume suitable data if necessary.

1. Transform the vector $4\overrightarrow{a_x} - 2\overrightarrow{a_y} - 4\overrightarrow{a_z}$ into spherical coordinates at point P(-2,-3,4)   [5]

2. State and write the mathematical equation of Gauss Law. Using the same law, derive an expression for electric field intensity ($\overrightarrow{E}$) in between the two co-axial cylindrical conductors having inner radius 'a' and outer radius 'b', each infinite in extent and assuming a surface charge density ρ_s on the outer surface of the inner conductor.   [1+6]

3. State the physical significance of potential gradient. Assuming that the potential V in the spherical coordinate system is a function of r only, solve the Laplacian equation and derive the expression for the capacitance of a spherical capacitor using the same solution of V.   [2+6]

4. Within the cylinder $\rho = 2$, $0 < z < 1$ the potential given by: $V = 100 + 50\rho + 150\rho \sin\phi$ V find:[2+1+2+1]

   a) Electric Field Intensity ($\overrightarrow{E}$) at P (1, 60°, 0.5) in free space

   b) Potential Gradient $\left(\dfrac{dV}{dN}\right)$

   c) Volume Charge Density (ρ_v) at P(1,60°,0.5) in free space

   d) How much charge lies within the cylinder?

5. State the physical significance of Curl. Evaluate both sides of stokes theorem for the field $\overrightarrow{A} = 6xy \overrightarrow{a_x} - 3y^2 \overrightarrow{a_y}$ A/m and the rectangular path around the region; $2 \le x \le 5, -1 \le y \le 1$, $z = 0$. Let the positive direction of $\overrightarrow{ds}$ be $\overrightarrow{a_z}$.   [2+6]

6. Explain the physical significance of the equation $\oint_s \overrightarrow{B}.\overrightarrow{ds} = 0$. Given the vector magnetic potential $\overrightarrow{A} = \rho^2/8 \overrightarrow{a_z}$ Wb/m. Calculate the total magnetic flux crossing the surface $\phi = \pi/4$, $1 \le \rho \le 3m, 0 \le z \le 5m$.   [2+6]

7. Explain motional emf and transformer emf with necessary mathematical derivations. A straight conductor of 0.2m lies along x-axis with one end at the origin. If this conductor is subjected to the magnetic flux density $\vec{B} = 0.08\vec{a}_y$ T and velocity $v = 2.5 \sin 10^3 t \vec{a}_z$ m/s. Calculate the emf induced in the conductor. [6+2]

8. Define Transverse Electromagnetic (TEM) wave. Derive an expression electric field for a uniform plane wave propagating in a perfect dielectric media. [7+1]

9. A uniform plane wave in free space at a frequency of 12 MHz is given by $\vec{E} = 200\cos(\omega t + 120x + 30°)\vec{a}_y$ V/m, find (a) $|E_{max}|$ (b) $\vec{H}$ at $x = 40$mm and $t = 340$ps. [3+3]

10. A lossless transmission line with $Z_0 = 50\Omega$ has a length of 0.4λ. The operating frequency is 300MHz and it is terminated with a load $Z_L = 40+j30\Omega$. Find: [2+2+4]

   a) Reflection coefficient (Γ)
   b) Standing wave ratio on the line (SWR)
   c) Input impedance (Z_{in})

11. Explain Transverse Electric Mode and Transverse Magnetic Mode of a waveguide. [2+2]

12. Write short notes on: [2×2]

   a) Skin depth
   b) Antenna and its types

Level	BE	Full Marks	80
Programme	BEL, BEX, BCT	Pass Marks	32
Year / Part	II / I	Time	3 hrs.

Subject: - Electromagnetics (EX503)

✓ Candidates are required to give their answers in their own words as far as practicable.
✓ Attempt *All* questions.
✓ The figures in the margin indicate *Full Marks*.
✓ *Necessary formulas are attached herewith.*
✓ Assume suitable data if necessary.
√ Assume that the Bold Faced letter represents a vector and $a_{subscipt}$ represents a unit vector.

(1) Express the vector field, $G = (x^2 + y^2)^{-1}(xa_x + ya_y)$ in cylindrical components and cylindrical variables. [5]

(2) Find **D** at the point (-3, 4, 2) if the following charge distributions are present in free space: point charge, 12 nC, at P (2, 0, 6); uniform line charge density, 3 nC/m, at x = -2, y = 3; uniform surface charge density, 0.2 nC/m^2 at x = 2. [7]

(3) Two uniform line charges, 8 nC/m each, are located at x = 1, z = 2, and at x = -1, y = 2 in free space. If the potential at the origin is 100V, find V at P (4, 1, 3). [7]

(4) State the Uniqueness theorem and prove that the solution of Poisson's equation is unique. [1+6]

(5) Write the equation of the Vector Magnetic Potential in differential form. Using the same equation, derive the equation for magnetic field intensity at a point due to an infinite filament carrying a uniformly distributed dc current I. [1+5]

(6) Calculate the value of the vector current density: (a) in cylindrical coordinates at P_1 (ρ=1.5, ϕ=90°, z=0.5) if $H = \dfrac{2}{\rho}(\cos 0.2\phi)\, a_\rho$. [3+3]

(b) in spherical coordinates at P_2 (r=2, θ=30°, ϕ=20°) if $H = \dfrac{1}{\sin\theta}\, a_\theta$.

(7) State and derive the Stoke's theorem. [1+3]

(8) What is an input intrinsic impedance? Derive an expression for the input intrinsic impedance using the concept of reflection of uniform plane waves. [2+6]

(9) The electric field amplitude of a uniform plane wave propagating in the free space in a_z direction is 250 V/m. If $E = E_x a_x$ and $\omega = 1.00$ Mrad/s, find: (a) the frequency; (b) the wavelength; (c) the period; (d) the amplitude of H. [2+2+1+3]

(10) Find the amplitude of the displacement current density inside a typical metallic conductor where $f = 1$ kHz, Conductivity $\sigma = 5 \times 10^7$ mho/m, dielectric constant $\varepsilon_R = 1$; and the conduction current density $J = 10^7 \sin (6283\, t - 444\, z)\, a_x$ A/m^2. [6]

(11) A 50-Ω lossless line has a length of 0.4λ. The operating frequency is 300 MHz. A load $Z_L = 40 + j30\ \Omega$ is connected at $z = 0$, and the Thevenin equivalent source at $z' = -1$ is $12\angle 0°$ in series with $Z_{Th} = 50 + j0\ \Omega$. Find: (a) The Reflection Coefficient Γ (b) The Voltage Standing Wave Ratio (VSWR) and (c) The input Impedance Z_{in}. [2+2+4]

(12) Explain why is it not possible to use waveguides at lower frequencies? Explain the transverse electric (TE) and transverse magnetic (TM) modes used in rectangular waveguides. [2+4]

(13) Give the definition of an antenna. Explain the properties of any one type of antenna that you have studied during your electromagnetics course. [1+1]

Exam.		Regular	
Level	BE	Full Marks	80
Programme	BEL, BEX, BCT	Pass Marks	32
Year / Part	II / I	Time	3 hrs.

## Subject: - Electromagnetics (EX503)

✓ Candidates are required to give their answers in their own words as far as practicable.
✓ Attempt All questions.
✓ The figures in the margin indicate Full Marks.
✓ Necessary formula are attached herewith.
✓ Assume suitable data if necessary.

1. Transform the Vector $\vec{A} = y\vec{a}_x + x\vec{a}_y + z\vec{a}_z$ into cylindrical co-ordinates at a point p(2,45°,5)   [5]

2. Along the z-axis there is a uniform line of charge with $\rho_L = 4\pi$ Cm^{-1} and in the x = 1 plane there is a surface charge with $\rho_s = 20$ Cm^{-2}. Find the Electric Flux Density at (0.5, 0, 0)   [6]

3. Define Uniqueness theorem. Assuming that the potential V in the cylindrical coordinate system is the function of 'ρ' only, solve the Laplacian Equation by integration method and derive the expression for the Capacitance of the co-axial capacitor using the same solution of V.   [2+5]

4. Define Electric Dipole and Polarization. Consider the region y < 0 be composed of a uniform dielectric material for which the relative permittivity (ε_r) is 3.2 while the region y > 0 is characterized by $\varepsilon_r = 2$. Let the flux density in region 1 be   [2+3+3]

$$\vec{D}_1 = -30\vec{a}_x + 50\vec{a}_y + 70\vec{a}_z \, nC/m^2.$$

Find:
a) Magnitude of Flux density and Electric fields intensity at region 2.
b) Polarization $(\vec{P})$ in region 1 and region 2

5. State Ampere's circuital law and stoke's theorem. Derive an expression for magnetic field intensity $(\vec{H})$ due to infinite current carrying filament using Biot Savart's Law.   [1+2+5]

6. Differentiate between scalar and vector magnetic potential. The magnetic field intensity in a certain region of space is given as $\vec{H} = (2\rho + z)\vec{a}_\rho + \frac{2}{z}\vec{a}_z$ A/m. Find the total current passing through the surface ρ = 2, π/4 < φ < π/2, 3 < z < 5, in the $\vec{a}_\rho$ direction.   [3+5]

7. State Faraday's law and correct the equation $\nabla \times \vec{E} = 0$ for time varying field with necessary derivation. Also modify the equation $\nabla \times \vec{H} = \vec{J}$ with necessary derivations for time varying field.   [1+3+4]

8. Derive an expression for input intrinsic impendence using the concept of reflection of uniform plane waves.   [6]

9. Find the amplitude of displacement current density inside a typical metallic conductor where $f = 1 KHz$, $\sigma = 5 \times 10^7$ mho/m, $\varepsilon_r = 1$ and the conduction current density is

$$\vec{J} = 10^7 \sin(6283t - 444z)\hat{a}_y \, A/m^2 \qquad [4]$$

10. Write all the Maxwell equations for the time varying field point form as well as integral form. [4]

11. A lossless transmission line with $Z_0 = 50 \, \Omega$ with length 1.5 m connects a voltage $V_g = 60$ V source to a terminal load of $Z_L = (50+j50) \, \Omega$. If the operating frequency $f = 100$ MHz, generator impedence $Z_g = 50 \, \Omega$ and speed of wave equal to the speed of the light. Find the distance of the first voltage maximum from the load. What is the power delivered to the load? [4+4]

12. What are the techniques that can be taken to match the transmission line with mismatched load? Explain any one. [2]

13. Write short notes on: [2×3]

   a) Modes in rectangular wave guide
   b) Antenna and its types

Subject: - Electromagnetic (EX503)

✓ Candidates are required to give their answers in their own words as far as practicable.
✓ Attempt __All__ questions.
✓ The figures in the margin indicate __Full Marks__.
✓ Assume that the **Bold Faced** letter represents a vector and $a_{subscript}$ represents a unit vector.
✓ __Necessary figures are attached herewith.__
✓ Assume suitable data if necessary.

1. At point P(-3,-4,5), express that vector that extends from P to Q(2,0,-1) in spherical coordinates. [5]

2. A point charge of 6μC (micro coulomb) is located at the origin, a uniform line charge density of 180nC/m lies along the x axis, and a uniform sheet of charge equal to 25nC/m^2 lies in the z = 0 plane. Find **D** at B (1,2,4). [7]

3. Derive the equation for Energy Density in the electrostatic field. [7]

4. Derive the Laplacian Equation. Assuming that the potential V in the cylindrical coordinate system is the function of 'ρ' only, solve the Laplacian Equation by Integration Method and derive the expression for the Capacitance of the Cylindrical Capacitor using the same solution of V. [2+5]

5. A current of 0.3 ampere in the a_z direction in free space is in a filament parallel to the z-axis and passing through the point (1,-2,0). Find the Magnetic Field Intensity **H** at (0,1,0) if the filament lies in the interval –4<z<4. [6]

6. State and derive the Stoke's theorem. [1+4]

7. Calculate the value of the vector current density in cylindrical coordinates at P(ρ=1.5, φ=90°, z=0.5) if $H = \dfrac{2}{\rho}(\cos 0.2\phi)\, a_\rho$. [5]

8. An Electric field **E** in free space is given as
$E = 200 \cos (10^8 t - \beta y)\, a_z$ V/m. Find:
(a) Phase Constant (β);
(b) Wavelength (λ);
(c) Magnetic Field Intensity H at P (-0.1, 1.5, -0.4) at t = 4 nS. [2+2+4]

9. Explain the term skin depth and loss tangent. Using Poynting Vector deduce the time-average power density for a lossless dielectric. [2+2+4]

10. Select the value of K so that each of the following pairs of fields satisfies Maxwell's equations in a region where $\sigma = 0$ and $\rho_v = 0$: [6]
$\mathbf{D} = 5x\ \mathbf{a_x} - 2y\ \mathbf{a_y} + Kz\ \mathbf{a_z}\ \mu C/m^2;$
$\mathbf{B} = 2\ \mathbf{a_y}\ mT,$
if $\mu = 0.25$ H/m and $\varepsilon = 0.01$ F/m.

11. A lossless transmission line with $Z_0 = 50\ \Omega$ is 200 m long. It is terminated with a load, $Z_L = 30 + j60\ \Omega$, and operated at a frequency of 0.5 MHz. Let the velocity $v = 0.6c$ on the line where c = velocity of light $= 3 \times 10^8$ m/s. Find: [2+2+4]
(a) The reflection coefficient (Γ).
(b) The voltage standing wave ratio on the line (VSWR).
(c) The input impedance (Z_{in}).

12. Explain why is it not possible to use waveguides at lower frequency? Write short notes on different types of modes used in rectangular waveguides. [2+4]

13. Give the definition of an antenna and list the different types of antenna that you have studied during your electromagnetics course. [1+1]

1. What is Zener breakdown? Describe the Zener diode as a voltage regulator with circuit diagram and IV characteristic curve. [5]

2. In the given circuit the diode used has its $\eta = 1.74$ and it conducts 1mA at forward bias voltage of 0.7 V. Find the current flow in the circuit. [5]
3. Design CC amplifier using β independent voltage divider biasing circuit using appropriate guideline. Given: $V_{CC} = 20V$, $I_{CQ} = 2mA$ and $\beta = 100$. Use firm biasing. Derive its voltage gain. [8+2]

4. Draw Hybrid π and T model. Derive the relationship between r_π and r_e. [3+3]

5. Describe the construction and working principle of EMOSFET with the help of drain characteristics curve and mathematical expressions. [8]

6. Find the drain current(I_D) and drain to source voltage (V_{DS}) for the following circuit. Given parameters are : $V_t = 1$ V and k = 0.5mA/V^2. [8]
7. Draw the circuit diagram of transformer coupled class B push- pull amplifier. And show that the maximum efficiency is 25π %.

[2+4]

8. What are the applications of tuned amplifiers? Determine its 3 dB Bandwidth, Resonance frequency and Quality factor.

[2+6]

9. Explain the operation of RC Phase shift oscillator and derive the condition for the sustained oscillation.

[3+4]

10. Draw the circuit diagram of colpitts oscillator. Derive its frequency of oscillation.

[2+4]

11. Describe the band gap voltage reference source with the help of a relevant circuit. Compare band gap voltage reference source with Zener diode.

[4+2]

12. Design a voltage regulator to give output voltage from 7 V to 21 V using LM317.

Year / Part	II / I	Time	3 hrs.

Subject: - Electronics Device and Circuit *(EX 501)*

✓ Candidates are required to give their answers in their own words as far as practicable.
✓ Attempt **All** questions.
✓ The figures in the margin indicate **Full Marks**.
✓ Assume suitable data if necessary.

1. Consider the circuit below for which R = 10kΩ. The power supply V^+ has a dc value of 10V on which is superimposed a 60 Hz sinusoid of 1-V peak amplitude. Calculate both the dc voltage of the diode and the amplitude of the sine wave signal appearing across it. Assume the diode to have a 0.7V drop at 1 mA current and n=2. [4]
2. What is Zener breakdown? Describe the Zener diode as a voltage regulator with circuit diagram and IV characteristics curve. [5]

3. What is dc load line in diode? Write its significance. [3]

4. Describe in brief the operation of BJT as a switch with necessary diagrams. [4]

5. Why voltage divider biasing is called β independent? Design a voltage divider type DC biased CE amplifier to obtain β independent biasing. Use appropriate guidelines to support your design. Given parameters are: V_{CC} = 24V, I_C= 1.5mA and β = 150. [2+6]

6. Draw the ac equivalent circuit for a CE amplifier (emitter resistor unbypassed) and derive the expressions for voltage gain, input impedance. [4]

7. Describe the construction and working principal of DMOSFET with the help of drain characteristics curve, transfer characteristics curve and mathematical expression. [8]

8. A JFET amplifier with a voltage divider biasing circuit, has the following parameters: V_p = -2V, IDSS = 4mA, RD = 910Ω, Rs = 3kΩ, R1 = 12 MΩ, R2 = 8.75 MΩ and VDD = 24 V. Calculate ID and VGS, VDS. [8]

9. Draw the circuit diagram of transformer coupled class B push pull amplifier and its corresponding characteristics graph. And, show that the maximum efficiency is 25π%. [2+2+4]

10. Draw the circuit diagram of tuned amplifier and derive the expression for the 3dB bandwidth of the amplifier. Write its applications. [6+2]

11. Explain the working principal of Wien bridge oscillator with necessary expressions and circuit diagram. [4]

12. How can we use astable multivibrator for the generation of square wave? [4]

13. Design a 5V to 20V variable dc voltage regulator using LM317. [4]

14. Draw a standard series DC voltage regulator circuit and find its voltage stability factor (Sv). [2+6]

✓ Assume suitable data if necessary.

1. Explain the reverse break down region in zener diode. "Zener diode acts as a voltage reference element" Justify the statement from IV characteristic curve. [5]

2. A diode conducts 1mA at 20°C. If it is operated at 100°C, what will be its current? Given data are $\eta = 1.6$ and negative temperature coefficient value = -2.2 mV/°C. [5]

3. Show the importance of transistor bias stabilization. Design voltage divider bias (common collector configuration) to get $I_{CQ} = 1.5$ mA. Assume power supply voltage VCC = 15V and beta of transistor is 110. [3+5]

4. Why BJT is called bipolar and FET is called unipolar device? Derive mathematically the transconductance of MOSFET. [2+3]

5. The bipolar junction transistor parameters for the circuit in figure below are $\beta = 200$ and $V_A = \infty$. Determine the input resistance, output resistance and overall voltage gain of the circuit. [8]
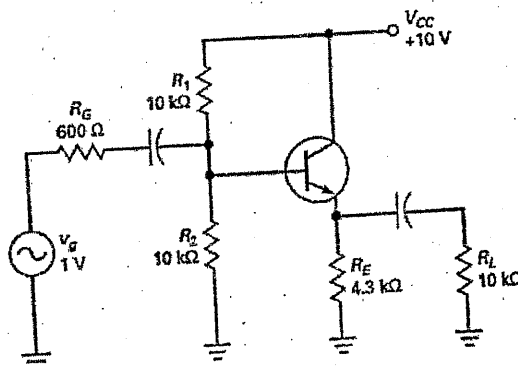

6. Describe the physical structure of N-channel JFET and explain its working principal and characteristics clearly marking the various regions of operation. [2+6]

7. Find the drain current (I_D) and drain to source voltage (V_{DS}) for the following circuit. Given parameters are: $V_t = 1$ V and k = 0.5 mA/V². [8]
8. Draw the circuit diagram of transformer coupled class B push-pull amplifier stage. And find its maximum efficiency. Define cross over distortion in class B amplifier. [2+4+2]

9. Draw the circuit diagram of Quasi complementary-symmetry class AB amplifier using diodes. [3]

10. When are tuned amplifiers used? Draw the circuit diagram of class-A tuned amplifier and its frequency response graph. [2+3]

11. Draw Wien Bridge oscillator circuit and derive the expression for frequency of oscillation and gain of amplifier circuit. [1+3+2]

12. Describe the operation of precision half wave rectifier with circuit diagram. [4]

13. Why transistor series regulator has lower efficiency? Explain the operation of voltage regulator using band gap voltage reference. [2+5]

Exam.		Back	
Level	BE	Full Marks	80
Programme	BEL, BEX, BEI, BCT	Pass Marks	32
Year / Part	II / I	Time	3 hrs.

Subject: - Electronic Devices and Circuits (EX 501)

✓ Candidates are required to give their answers in their own words as far as practicable.
✓ Attempt **All** questions.
✓ The figures in the margin indicate **Full Marks**.
✓ Assume suitable data if necessary.

1. Explain the small signal model of PN junction diode and derive the expression for its dynamic resistance. [5]

2. Determine the Range of load R_L that will maintain the zener diode load voltage V_L at 5V. Given $V_S = 10$ V, $R_S = 100$ Ω, $I_{ZM} = 30$ mA. [5]
3. Design a voltage divider type dc biased CE amplifier to obtain β independent biasing. Use appropriate guidelines to support your design. Given $V_{CC} = 12$ V DC, $I_C = 2$mA and $\beta = 150$. [7]

4. Derive the expression for R_{in}, R_{out}, A_v and A_i in CE capacitor bypassed amplifier. [8]

5. Describe the construction and working principle of EMOSFET with the help of drain characteristics curve and mathematical expressions. [8]

6. Find I_D and V_{DS} for the given circuit. Given data are $V_P = -3.5$V, $I_{DSS} = 10$ mA and assume all the capacitors are ideal and check whether transistor is operating in pinch off region or not? [7]
7. Draw the circuit diagram of transformer coupled class B push-pull amplifier and show that the maximum efficiency is 25π %. [7]

8. When are tuned amplifiers used? Draw class A tuned amplifier circuit and find its 3 dB bandwidth. [7]

9. Explain working of RC phase shift oscillators and derive the frequency of its oscillation. [6]

10. Draw standard series DC voltage regulator circuit and find its voltage stability factor (S_v). [6]

11. Design a voltage regulator to give output voltage from 7V to 21V using LM317. [5]

12. Write short notes on: [3×3]
    a) Ebers Moll model
    b) Transconductance of JFET
    c) Crossover distortion

Subject: - Electronic Devices and Circuits (EX 501)

✓ Candidates are required to give their answers in their own words as far as practicable.
✓ *Attempt All questions.*
✓ *The figures in the margin indicate Full Marks.*
✓ *Assume suitable data if necessary.*

1. Define Q-point in pn junction diode operation. Show it graphically with necessary derivations. Differentiate between avalanche and zener break down. [3+2]

2. The 6.8 V zener diode is specified to have V_z = 6.8 V at I_z = 5 mA, r_z = 20Ω and I_{zk} = 0.2 mA. The supply voltage V^+ is nominally 10V but can vary by ± 1V. Find V_0 with no load and with V^+ at its nominal value. Find the change in V_0 resulting from connecting a load resistance RL that draws a current I_L = 1 mA. What is the minimum value of R_L for which the diode still operates in the breakdown region? [2+1+2]
3. Design β independent type dc biased common collector amplifier, and find its current gain and input resistance. Given parameters: V_{CC} = 20 VDC, I_C = 2mA and β = 100 and use firm biasing method. [8]

4. Draw common emitter transistor amplifier circuit (emitter bias with unbypassed emitter capacitor) and find its output impedance and voltage gain. Write application of common base amplifier. [4+3+1]

5. Describe the working principle of N-channel Depletion type MOSFET with the help of I_D Vs V_{DS} characteristics and transfer characteristics curves. Find the condition and expression for it to operate in active mode of operation and write the expression for drain current. [5+2+1]

6. Write about JFET as a voltage controlled resistor with practical application. [4]

7. Find I_{DQ} and V_{GSQ} from the following circuit. [5]
8. Draw the circuit diagram of class A series fed amplifier and its corresponding characteristic graph. And, find its general efficiency. [3+3]

9. Draw the circuit diagram of Complementary-Symmetry class-AB amplifier using Darlington pair transistors. [3]

10. Describe about tuned amplifier and derive the expression for the 3dB bandwidth of the amplifier. [5]

11. Differentiate between synchronous and stagger turned amplifier. [3]

12. Draw voltage controlled oscillator circuit using IC 555 and derive expression for frequency of oscillation. [6]

13. Among Hartley and Colpitts LC oscillator, which one do you choose to implement in FM stations to generate carrier wave signal? Why? Draw its circuit diagram. [5]

14. Draw the standard series DC voltage regulator circuit and find its voltage stability factor(S_v). [5]

15. Design a 5V to 20V variable dc voltage regulator using IC LM317. [4]

Subject: - Electronic Devices and Circuits *(EX 501)*

✓ Candidates are required to give their answers in their own words as far as practicable.
✓ *Attempt __All__ questions.*
✓ *The figures in the margin indicate __Full Marks__.*
✓ *Assume suitable data if necessary.*

1. Differentiate between avalanche and zener breakdown. Draw V-I characteristic curve of zener diode and briefly explain about it. [3+2]

2. In the given circuit, the power supply V^+ has a dc value of 10V on which is super imposed a 50 Hz sinusoid of 1V peak amplitude. Calculate both the dc voltage of the diode and amplitude of the sine-wave signal appearing across it. Assume the diode to have a 0.7V at 1 mA current and $\eta=2$. [5]
3. Design β independent type of dc biased common collector amplifier, and find its voltage gain and input resistance. Given parameters: $V_{cc}= 20$ VDC, $I_c=2$mA and $\beta=100$ and use firm biasing method. [8]

4. Describe in brief the operation of BJT as a switch in cut off and saturation region. [4]

5. Explain about working principle of N-channel DMOSFET with its construction, characteristics curves and characteristic equation. [7]

6. For the faithful amplification of signal, selection of operating point is utmost importance. Justify the above statement. Derive transconductance of bipolar junction transistor. [3+4]

7. Determine Q point for the following network. [7]
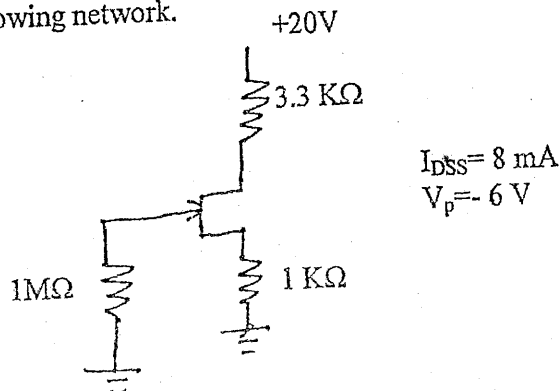

8. Draw the circuit diagram of the Hartley Oscillator and derive its frequency of oscillation. [6]

9. Draw the circuit diagram of class A series fed amplifier and its corresponding characteristics graph. And find its general efficiency. [3+3]

10. Explain about the operation of voltage controlled oscillator (VCO) using 555 timer IC and derive its frequency of oscillation. [8]

11. Draw the circuit diagram of Complementary-Symmetry Class-AB amplifier using Darlington pair transistors. [3]

12. Calculate the output voltage and the zener current in the regular circuit as shown in figure below for $R_L=1$ KΩ and R=220Ω. $V_Z=12V$. [5]
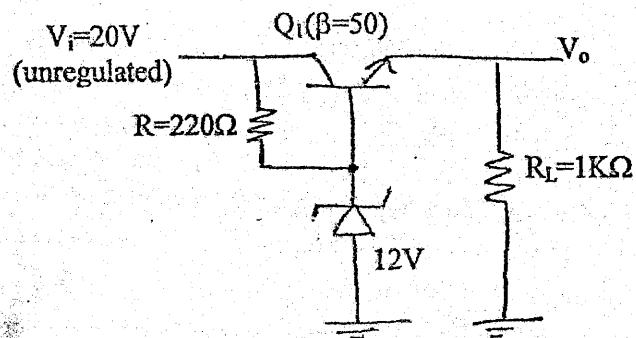

13. Draw series voltage regulator with current limiting circuit and explain how this protection circuit works? [6]

14. Briefly explain about Precision half wave rectifier with circuit diagram. [3]

✓ Candidates are required to give their answers in their own words as far as practicable.
✓ Attempt *All* questions.
✓ The figures in the margin indicate *Full Marks*.
✓ Assume suitable data if necessary.

1. Find the operating point of the diode circuit graphically using load line method. [5]

2. Design DC voltage regulator for 6V output. Given data are V_2=6V at I_z=20mA, I_{zx}=2mA, P_{zmax}=500mW and rz=10Ω. The nominal input voltage is 15V+30% DC. Find the maximum current it can deliver to the load. [5]

3. Design a common base amplifier circuit using β independent method. Given parameters are V_{cc}=15V, I_E=1.5mA, β=100 and input and output impedances are comparatively large. Use appropriate guideline to support your design. [7]

4. Why common collector amplifier is known as emitter follower? Draw its ac equivalent circuit to find its input resistance and voltage gain. [1+6]

5. Draw and describe the Ebers Moll model for BJT. [4]

6. Draw the cirucuit diagram of the Colpitts Oscillator and derive its frequency of Oscillation. [6]

7. Find the drain current (I_D) and drain to source voltage (V_{DS}) for the following circuit. Given parameters are: V_t=1 V and k=0.5 mA/V^2. [7]
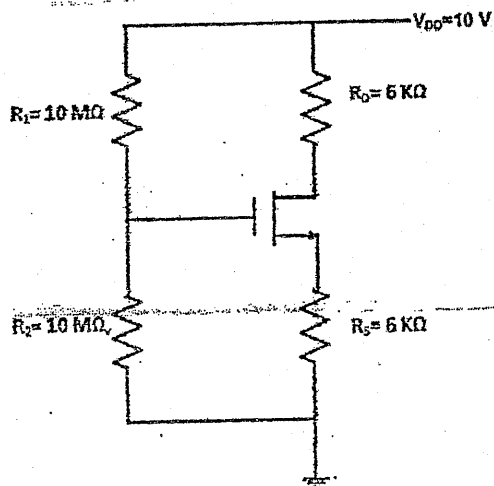

8. Describe the construction and working principal of N-channel JFET with the help of characteristics curve and mathematical expression. [7]

9. Define crossover distortion in class B amplifier. Draw quasi-complementary symmetry class AB amplifier. And explain how crossover distortion is eliminated in class AB amplifier.

[7]

10. Draw the circuit diagram of Class A tuned amplifier and determine the range of frequency in which it gives maximum gain within 3 dB range?

[6]

11. Design a DC voltage regulator for 3V to 12V output using LM317.

[5]

12. Define the term multivibrator. Explain the operation of op-amp based astable multivibrator for square wave with the help of circuit diagram and waveforms and also determine its frequency of oscillation.

[8]

13. Draw the standard series DC voltage regulator circuit and find its voltage stability factor(S_v).

✓ Assume suitable data if necessary.

1. Draw graphs of IV characteristics of ordinary PN junction diode and zener diode. Draw ac equivalent model for PN junction diode and derive its dynamic resistance. [2+4]

2. A diode conducts 1mA at 20°C. If it is operated at 100°C, what will be its current? Given data are $\eta = 1.6$ and negative temperature coefficient value = -2.2 mV/°C. [4]

3. Design voltage divider bias (common emitter configuration) to get $I_{CQ} = 1.5$ mA. Assume power supply voltage $VCC = 15$ V and beta of transistor is 110. [8]

4. Derive Expressions for Ai, Rin and Rout. [6]

5. Describe the operation of JFET in ohmic and active regions of operations with the help of graph and expressions. [8]

6. Find the value of I_D and V_{DS} in the given circuit. [6]
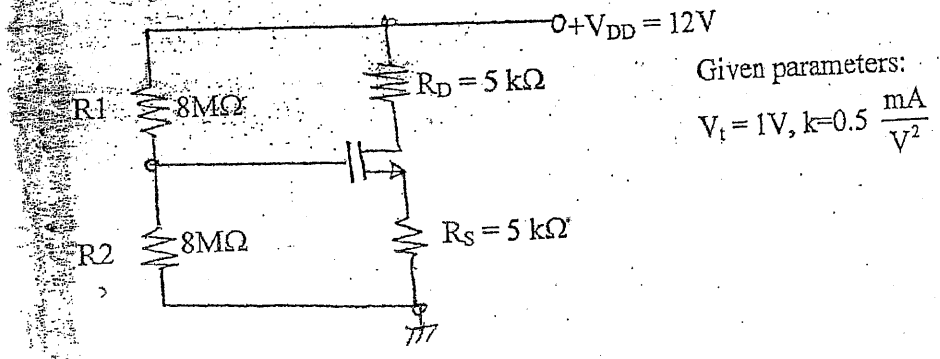

Given parameters:
$V_t = 1V$, $k=0.5 \dfrac{mA}{V^2}$

7. Draw the circuit diagram of class A series fed amplifier and its corresponding characteristic graph. And, find its general efficiency. [3+3]

8. Draw the circuit diagram of transformer coupled class B push-pull amplifier. And show that the maximum efficiency is $25\pi\%$. [2+4]

9. Draw the circuit diagram of Complementary-Symmetry class-AB amplifier. [3]

10. Draw voltage controlled oscillator circuit using IC 555 and derive expression for frequency of oscillation. [6]

11. Explain working principle of Wein bridge oscillator with necessary expressions. [6]

12. Design a dc voltage regulator for $V_o = 6V$ to 18 V. [4]

13. Draw the standard series DC voltage regulator circuit and find its voltage stability factor (S_v). [7]

14. Describe in brief the operation of BJT as a switch in cut off and saturation region. [4]

***

Exam.	New Back (2066 & Later Batch)		
Level	BE	Full Marks	80
Programme	BEL, BEX, BCT	Pass Marks	32
Year / Part	II / I	Time	3 hrs.

Subject: - Electronic Devices and Circuits *(EX501)*

✓ Candidates are required to give their answers in their own words as far as practicable.
✓ Attempt __All__ questions.
✓ The figures in the margin indicate __Full Marks__.
✓ Assume suitable data if necessary.

1. Describe with the help of loadline and IV characteristics of the diode, a simple circuit that uses pn junction diode in forward biased state. [5]

2. Design DC voltage regulator for 6V output. Given data are $V_Z = 6V$ at $I_Z = 20$ mA, $I_{zk} = 2$ mA, $P_{ZMAX} = 500$ mW and $r_z = 20\Omega$. The nominal input voltage is $12v\pm20\%$ DC. Find its voltage regulation factor and maximum current it can deliver to the load. [5]

3. Design Common Base Amplifier using β-independent dc biasing method. Use appropriate guideline to support your design. Given parameters are: $V_{CC} = 24VDC$, $I_C = 1$ mA and $\beta = 200$. Also find its voltage gain by using its ac equvalent circuit. [5+3]

4. Describe in brief the operation of BJT as switch in cut off and saturation region. [4]

5. Draw Ebers Moll model, low frequency Π-model and simple T - model for BJT. [2+1+1]

6. Describe the principle of operation of N-channel JEET with the help of drain and transfer characteristics graphs and mathematical expressions. [8]

7. An n-channel JEET has a pinch-off voltage of -4.5V and $I_{DSS} = 9$ mA. At what value of V_{GS} will I_{DS} be equal to 3 mA? What is its g_m at this I_{DS}. [5]

8. Derive an expression to obtain transconductance of MOSFET. [3]

9. What is crossover distortion and how it can be eliminated? [4]

10. Draw a circuit diagram of tuned amplifier. Determine the range of frequency in which it gives maximum gain within -3dB range. [5]

11. Why the efficiency of class-A amplifier is low? Obtain the expression of the general efficiency of series fed class -A power amplifier circuit. [6]

12. Define Barkhausen Criteria for sinusoidal oscillation. Draw the circuit diagram of RC phase shift oscillator and derive its frequency of oscillation. [5]

13. Define the term multivibrator. Explain the operation of op-amp based astable multivibrator with the help of circuit diagram and waveform. [4]

14. Design a regulator circuit to obtain 16 VDC. Choose approximate values of the parameters. Input voltage is 25 VDC. [5]

15. Draw the series voltage regulator with current limiting element and explain how it works. [6]

16. Draw block diagram for IC voltage regulator. [3]

Exam.		Regular	
Level	BE	Full Marks	80
Programme	BEL,BEX,BCT	Pass Marks	32
Year / Part	II / I	Time	3 hrs.

Subject: - Electronic Devices and Circuits (EX501)

✓ Candidates are required to give their answers in their own words as far as practicable.
✓ Attempt **All** questions.
✓ The figures in the margin indicate **Full Marks**.
✓ Assume suitable data if necessary.

1. What is p-n junction diode? Explain the large signal models of p-n junction diode. [1+4]

2. Find the value of dynamic resistance if voltage in the diode is 650mv and I_{RS} is $10pA = (10\times10^{-12}A)$ (Given n = 2 and $V_1 = 25$ mV) [5]

3. Why common collector amplifier is also called emitter follower? Draw the common collector transistor amplifier circuit and find its input impedance, output impedance and voltage gain. [8]

4. Draw and describe the Ebers Moll model for BJT. [4]

5. Describe in brief the operation of BJT as a switch in cut off and saturation region. [4]

6. Describe the construction and working principle of EMOSFET with help of drain characteristics curve and mathematical expressions. [8]

7. Find I_D and V_{DS} for the given circuit. The given data are $V_p = -4V$ and $I_{DSS} = 10mA$ [5]
8. Derive an expression to obtain the transconductance of JFFT. [3]

9. What is the maximum efficiency of class B amplifier? State the condition when it occurs. [4]

10. When are tuned amplifiers used? Draw class A tuned amplifier circuit and find its 3db bandwidth. [2+5]

11. Draw the circuit diagram of Complementary-Symmetry Class-AB amplifier. Using Darlington pair transistors. [3]

12. Write the applications of tuned LC oscillators. Draw the Colpitt's oscillator circuit and derive the expression for frequency of oscillation. [6]

13. Draw AMV circuit using IC 555 or BJT. [4]

14. State Barkhausen Criteria for sine wave oscillator. [2]

15. Design a (10-25) V variable dc series voltage regulator using LM 317 IC. [5]

16. Draw the circuit of current limiting circuit in dc voltage regulator. [2]

17. Find voltage stability factor of series dc voltage regulator. [5]

## Subject: - Electronic Device and Circuits (EX501)

✓ Candidates are required to give their answers in their own words as far as practicable.
✓ Attempt _All_ questions.
✓ The figures in the margin indicate _Full Marks_.
✓ Assume suitable data if necessary.

1. What is the significance of operating point in diode? Draw the dc load line with the help of diode circuit and its characteristics curve. [1+3]

2. In the given circuit, the diode used has its n = 1.74 and it conducts 1mA at forward bias voltage of 0.7V. Find the current flow in the circuit. [6]
3. Design a voltage divider type dc biased common emitter amplifier to obtain β independent biasing. Use appropriate guidelines to support your design. Given parameters are: $V_{CC} = 12$ VDC, $I_C = 2$ mA and $\beta = 150$. Also determine its voltage gain. [6+2]

4. Draw the small signal model for Common collector Aplifier and find its input resistance and voltage gain. [2+3+3]

5. Find I_D and V_{DC} for the given circuit. Given data are: $V_P = -5.5$V, $I_{DSS} = 12$ mA and assume all capacitors are ideal and check whether transistor is operating in pinch off region or not? [2+2+2+2]

6. Explain why self DC biasing MOSFET circuit is better than fixed DC biasing MOSFET circuit. [4]

7. Derive an expression to find the transconductance for JEET. [4]

8. Draw the circuit of class A series fed amplifier and its corresponding characteristic graph. And, find its general efficiency. [1+2+3]

9. Draw the circuit diagram of transformer coupled class B push-pull amplifier. And show that the maximum efficiency is 25 π %. [2+4+2]

10. Define Barkhausen criteria for sinusoidal. Draw the circuit diagram of RC phase shift oscillator and derive its frequency of oscillation. [2+2+6]

11. Draw the circuit diagram of variable series voltage regulator with transistor as error amplifier. And find its voltage stability factor and explain how change in output voltage can be improved. [2+4+2]

12. Design a voltage regulator circuit using LM317 to obtain 16 VDC with the input 24 VDC. [4]

13. Draw the square wave generator circuit using operational amplifier. [2]

1. Draw graphs of IV characteristics of ordinary PN junction diode and zener diode. Draw ac equivalent model for PN junction diode and derive its ac resistance. [7]

2. Define and explain reverse break down effect. [3]

3. Design β-independent type dc biased common collector amplifier and find its current gain and input resistance. Given parameters are: $V_{CC} = 20V$, $I_C = 2mA$, $β = 100$ and use firm biasing method. [8]

4. Derive an expression to find output resistance for emitter unbypassed common emitter amplifier circuit. [5]

5. Draw Ebers Moll model and ac equivalent T- model for BJT. [4]

6. Describe the principle of operation of EMOSFET with the help of IV characteristic curves and algebraic expressions. Also show its ac equivalent circuit model. [7]

7. Find I_D and V_{DS} for the given circuit. [5]
8. Derive an expression to find the tranconductance for JFET. [2]

9. Draw standard series dc voltage regulator circuit and find its voltage stability factor (S_v). [6]

10. Draw a voltage regulator circuit using IC LM317. [3]

11. Draw a circuit diagram for Bandgap reference voltage source. [3]

12. Define cross over distortion in class B amplifier. Draw quasi-complementary symmetry class AB amplifier. And explain how crossover distortion is eliminated in class AB amplifier. [7]

13. What is the maximum efficiency of class B amplifier? State the condition when it occurs. [4]

14. Why heat sink is necessary in power transistor? Explain with the help of thermal Ohm's law or thermal resistance method. [4]

15. State Barkhausen criteria and explain the principle of oscillation. [4]

16. Draw Wien Bridge Oscillator circuit and write the expression for frequency of Oscillation. [6]

17. Draw crystal oscillator circuit.

Subject: - Electronic Device and Circuits (EX501)

✓ Candidates are required to give their answers in their own words as far as practicable.
✓ Attempt All questions.
✓ The figures in the margin indicate Full Marks.
✓ Assume suitable data if necessary.

1. Draw full wave bridge rectifier circuit with 5 ohm load resistor connected at its output. If input ac voltage is 10V, calculate the power dissipation in the load resistor (Assume diodes operate at forward voltage of 0.7V). [4]

2. Explain the small signal model of PN junction diode and derive the expression for AC or dynamic resistance. [2+4]

3. Draw the ac equivalent circuit for given circuit and find its input and output resistances. Assume $\beta = 100$ for the BJT. [8]
4. Define transconductance (gm). Derive gm for BJT. [2+4]

5. Describe in brief the operation of BJT as a switch. [4]

6. Describe with necessary graphs and expressions the principle of operation of N-channel JFET. [6]

7. The n-channel JEET in the figure below has $I_{DSS} = 18$ mA and $V_P = -5V$. Determine the values of I_D and V_{DS}. [8]
8. State the difference between BJT and FET. [4]

9. Determine the general efficiency of Transformer Coupled Class-A power Amplifier. [6]

10. Draw the circuit diagram of Complementary-Symmetry Class-AB Amplifier. [2]

11. Calculate the efficiency of transformer coupled push pull Power Amplifier for a supply voltage of 20V and output of (i) $V_P = 20V$ (ii) $V_P = 16V$. [3+3]

12. Draw Wien Bridge Oscillator circuit and derive the expression for frequency of Oscillation and gain of the amplifier circuit. [2+3+3]

13. Draw standard series dc voltage regulator and find its voltage stability factor (S_v). [6]

14. Design a 4.2 V to 12 V variable dc voltage regulator using IC LM317. [4]

15. Draw the circuit diagram of square wave generator. [2]
