

Exam.	Regular		
Level	BE	Full Marks	80
Programme	BCT	Pass Marks	32
Year / Part	IV / I	Time	3 hrs.

Subject: - Distributed System (CT 703)

- ✓ Candidates are required to give their answers in their own words as far as practicable.
- ✓ Attempt All questions.
- ✓ The figures in the margin indicate Full Marks.
- ✓ Assume suitable data if necessary.

1. Define Distributed System (DS). Explain the requirements to successfully implement DS to suit to modern computing. [2+8]
2. Discuss the functionalities provided by RMI software. How is the event and notification system implemented in distributed object based communication? [3+5]
3. What is distributed file system? Explain the principle operations of any one modern distributed file system? [2+7]
4. What is the issue in Lamport's timestamp? How do you avoid the issue? Explain with your alternate algorithm. [2+8]
5. How does a new coordinator elect in executing central coordinator algorithm? How to come to consensus in DS? Explain. [5+5]
6. What is fault? How to implement primary-backup replica system? How is it differ from active replication? [2+4+2]
7. What do you mean by forward and backward recovery? How to implement coordinated check pointing for recovery in DS? [2+6]
8. What are the alternative approaches to avoid possibility of deadlock in distributed system? Explain. [4+4]
9. Write short notes on: (Any Three) [3×3]
 - a. Three Phase Commit.
 - b. CORBA component for RMI
 - c. Physical Clock Synchronization: Cristian's Algorithm
 - d. Two Phase commit protocol
 - e. MACH

Exam.	Regular / Back		
Level	BE	Full Marks	80
Programme	BCT	Pass Marks	32
Year / Part	IV / I	Time	3 hrs.

Subject: - Distributed System (CT 703)

- ✓ Candidates are required to give their answers in their own words as far as practicable.
- ✓ Attempt **All** questions.
- ✓ The figures in the margin indicate **Full Marks**.
- ✓ Assume suitable data if necessary.

1. Why distributed system is preferred over centralized system? Explain the layers of transparency. [4+4]
2. What do you mean by RMI software? Comparatively discuss RPC with RMI. [3+5]
3. Compare Stateful and stateless service. Describe the architecture and operation of SUNNFS with its services. [2+6]
4. Compare heterogeneous and homogeneous distributed system. Explain the CORBA architecture and its services. [3+5]
5. List the problems of Lamports clock with example. How vector clock is beneficial than Lamports clock? Explain with implementation rules of vector clock. [4+4]
6. How token system works for mutual exclusion in Distributed System. Explain with token based Algorithm. [2+6]
7. How replication is used as a basic scaling technique in distributed system? Explain the active replication model with its advantages and disadvantages. [2+6]
8. Compare nested transactions and distributed transactions. Explain the two-phase commit protocol of handling distributed transactions. [2+6]
9. What do you learn from Byzantine generals problem? Explain the basic principle of K-fault tolerant. [3+5]
10. Write short notes on: (Any two) [4+4]
 - a) Reliable Group Communication
 - b) Distributed deadlock
 - c) Forward and Backward recovery in distributed system

TRIBHUVAN UNIVERSITY

2076 Ashwin

Exam.	Back		
Level	BE	Full Marks	80
Programme	BCT	Pass Marks	32
Year / Part	IV / I	Time	3 hrs.

Subject: - Distributed System (CT 703)

- ✓ Candidates are required to give their answers in their own words as far as practicable.
 - ✓ Attempt All questions.
 - ✓ All questions carry equal marks.
 - ✓ Assume suitable data if necessary.
1. What are the major goals of distributed system and what are the challenges during the design of distributed system.
 2. Define distributed objects and explain communication between distributed system.
 3. Define Distributed file system. Point out the differences between stateless and stateful services.
 4. Explain components in CORBA architecture with a diagram.
 5. Explain Lamport's logical clock with its pros and cons.
 6. Explain reliable multicast with its properties and an algorithm.
 7. Specify Data Centric consistency models and explain any one of them in detail.
 8. Why is it necessary to maintain transaction? What is a deadlock and what are phantom deadlocks.
 9. What is fault tolerance? Explain different type of faults that may occur in a distributed system.
 10. Write short notes on any two:
 - a) RPC
 - b) Monolithic and micro kernel
 - c) Mach

Exam.	Regular		
Level	BE	Full Marks	80
Programme	BCT	Pass Marks	32
Year / Part	IV / I	Time	3 hrs.

Subject: - Distributed System (CT703)

- ✓ Candidates are required to give their answers in their own words as far as practicable.
- ✓ Attempt **All** questions.
- ✓ The figures in the margin indicate **Full Marks**.
- ✓ Assume suitable data if necessary.

1. What is True Distributed System (TDS)? How distributed system can be organized as middleware? Explain. [2+6]
2. Define Remote Procedure Call (RPC)? Describe various RPC communications semantics of client server communication in distributed system. [2+6]
3. Mention the role of stub and skeleton in distributed system. Explain the architectural details of the Network File System (NFS). [2+6]
4. What do you mean by Context Switching in distributed system? How distributed OS is different from network OS. [2+4]
5. Explain CORBA Invocation methods with its services. [6]
6. Define clock synchronization. What is the need of clock synchronization? Explain Cristian's algorithm for physical clock synchronization along with necessary diagram. [1+2+5]
7. Why Consensus is needed in DS? Explain Bully algorithm with suitable example. [2+6]
8. What do you mean by object replication? Explain process resilience approach. [2+6]
9. What are the benefits and drawbacks of using lock in Transaction Processing? Explain the lost-update problems with suitable example. [4+4]
10. What are independent checkpointing and co-ordinated checkpointing? Explain snapshot algorithm used for backward recovery in distributed system.- [4+4]
11. Write short notes on: (any two) [2+2]
 - i) JINI Distributed Event Specification
 - ii) IDL
 - iii) Distributed cut

Exam.	Back		
Level	BE	Full Marks	80
Programme	BCT	Pass Marks	32
Year / Part	IV / I	Time	3 hrs.

Subject: - Distributed System (CT703)

- ✓ Candidates are required to give their answers in their own words as far as practicable.
- ✓ Attempt **All** questions.
- ✓ The figures in the margin indicate **Full Marks**.
- ✓ Assume suitable data if necessary.

1. Define distributed system? Explain Transparency Properties of Distributed System. [2+6]
2. Why naming is necessary in distributed system? Explain Sun Network File System architecture with its features. [2+6]
3. What is DNS? Explain the DNS working mechanisms with suitable example. [2+6]
4. What do you mean by DOS (Distributed Operating System)? Briefly explain the Monolithic and microkernel architectures of operation system. [2+4]
5. Define Object Adapter. Explain the invocation methods in CORBA. [2+4]
6. What is Network Time Protocol (NTP)? How Berkeley minimizes the problems of single time server failures of Chistian's algorithm. [2+4]
7. What is the need of an election algorithm? Explain non token based Ricart-Agrawala mutual exclusion algorithm along with an example. [2+6]
8. Differentiate between passive and active replication approach. Discuss with a technique that make the distributed system highly available. [3+5]
9. Write down the rule of two-version locking. Explain how Optimistic concurrency control mechanism works? [2+6]
10. How does triple modular redundancy works? Explain how reliable client server communication can be achieved in distributed system. [4+4]
11. Write short notes on: (any two) [3+3]
 - i) Lamport's clock
 - ii) TIB/Rendezvous
 - iii) Feedback suppression mechanism in M-cast communication

Exam.	Back		
Level	BE	Full Marks	80
Programme	BCT	Pass Marks	32
Year / Part	IV / I	Time	3 hrs.

Subject: - Distributed System (CT703)

- ✓ Candidates are required to give their answers in their own words as far as practicable.
- ✓ Attempt All questions.
- ✓ The figures in the margin indicate Full Marks.
- ✓ Assume suitable data if necessary.

1. Why there are challenges in achieving some requirements of a distributed system? Explain the challenges associated with different requirements of distributed system. [2+6]
2. Define distributed object and IDL. Compare RPC and RMI architecture. [3+5]
3. What is stateful and stateless service in file system? Explain the DNS working mechanism with suitable practical example. [3+5]
4. What are the characteristics of distributed operating system? Explain ORB and its interfaces. [4+4]
5. Why clock synchronization is necessary? Explain the clock synchronization algorithm using vector clock along with an example. [2+6]
6. Describe non-token based centralized and Ricart Agrawala algorithm with example and compare them. [8]
7. Differentiate between active and passive replication. Explain working mechanism of active replication. [3+5]
8. How cascading aborts occurs and solved? Explain three phase commit protocol with state diagram. [8]
9. What is K-fault tolerant system? Explain fault recovery techniques. [2+6]
10. Write short notes on: (Any two) [2×4]
 - a) Distributed deadlock and recovery
 - b) MACH
 - c) Process Resilience

Exam.	Regular		
Level	BE	Full Marks	80
Programme	BCT	Pass Marks	32
Year / Part	IV / I	Time	3 hrs.

Subject: - Distributed System (CT703)

- ✓ Candidates are required to give their answers in their own words as far as practicable.
- ✓ Attempt **All** questions.
- ✓ The figures in the margin indicate **Full Marks**.
- ✓ Assume suitable data if necessary.

1. Differentiate between centralized and distributed system? Explain the design issues related to distributed system. [2+6]
2. Discuss the importance of Distributed File System (DFS). Describe the operations of SUNNFS with its properties. [2+6]
3. Explain RMI with suitable diagram. How RMI is superior to RPC? [8+2]
4. What is the role of middleware in DS? Explain about CORBA and its services. [2+8]
5. Differentiate between physical clock and logical clock. Why it is difficult to synchronize physical clock? Describe a method for physical clock synchronization. [2+2+6]
6. What are the basic requirements for mutual exclusion in distributed system? Explain the non-token based distributed mutual exclusion algorithm and compare it with token based algorithm. [2+8]
7. What are the reasons for Replication? Explain active replication model with its advantages and disadvantages. [3+5]
8. What do you mean by nested transactions? Explain optimistic concurrency control method with its advantages over other concurrency control methods. [2+4+2]
9. Write short notes on: [4+4]
 - i) Distributed OS
 - ii) JINI

Exam.	New Back (2066 & Later Batch)		
Level	BE	Full Marks	80
Programme	BCT	Pass Marks	32
Year / Part	IV / I	Time	3 hrs.

Subject: - Distributed System (CT703)

- ✓ Candidates are required to give their answers in their own words as far as practicable.
- ✓ Attempt **All** questions.
- ✓ The figures in the margin indicate **Full Marks**.
- ✓ Assume suitable data if necessary.

1. What are the principle applications of Distributed System (DS)? Discuss the advantages and disadvantages of DS. [3+5]
2. What are the requirements of Distributed File System? Describe file service architecture for Distributed File System. [4+4]
3. a) Why naming is necessary in distributed system? Explain Domain Naming Service (DNS) with its features. [1+4]
 b) What are the advantages of micro-kernel over monolithic-kernel? In your view, which kernel is preferable for distributed Operating system and why? [2+3]
4. a) What are the components of CORBA environment? [4]
 b) What do you mean by logical clock? Explain Lamport's Logical clock. [2+6]
5. What are the principle applications of state recording and distributed debugging? Determine the types of distributed CUT in the following figure. [4+6]

6. Define distributed coordination in DS? Explain how token ring algorithm works for mutual exclusion in DS. [2+6]
7. Define replication and fault tolerance in DS and explain why are they necessary? Explain how replication enhanced scalability for DS. [6+2]
8. What is LOCK and DEADLOCK in DS? Discuss the methods of distributed deadlock avoidance. [4+6]
9. Write short notes on: [2×3]
 - i) Process Resilience
 - ii) Mach

Exam.	Regular		
Level	BE	Full Marks	80
Programme	BCT	Pass Marks	32
Year / Part	IV / I	Time	3 hrs.

Subject: - Distributed System (CT703)

- ✓ Candidates are required to give their answers in their own words as far as practicable.
- ✓ Attempt **All** questions.
- ✓ The figures in the margin indicate **Full Marks**.
- ✓ Assume suitable data if necessary.

1. "Distributed system acts as a single coherent system to its end user." Justify the statement with its features and challenges. What is fundamental model? [6+2]
2. Define DFS. How RMI perform communication between distributed objects? Explain. [2+6]
3. Verify with proper explanations that DNS is a distributed hierarchical database system. [10]
4. Write the importance of election algorithm. Explain BULLY algorithm with suitable example. Compare it with Ring based algorithm. [8]
5. List the goals of JINI. What are CORBA services? How does operating system support for distributed system? [4+2+2]
6. Explain with algorithmic steps, how token ring algorithm works for mutual exclusion in distributed system. [10]
7. Explain Byzantine general problem to handle faulty process with example. Describe any one failure recovery technique. [8]
8. Define lock in concurrency control. How can concurrency be controlled in distributed transactions? What situation does lead to distributed deadlock? [1+4+3]
9. Write short notes on: [3×4]
 - a) Heterogeneity in distributed system
 - b) Rendezvous concept and implementation
 - c) Flat versus nested locks
 - d) Process Resilience

Exam.	New Back (2066 & Later Batch)		
Level	BE	Full Marks	80
Programme	BCT	Pass Marks	32
Year / Part	IV / I	Time	3 hrs.

Subject: - Distributed System (CT703)

- ✓ Candidates are required to give their answers in their own words as far as practicable.
- ✓ Attempt All questions.
- ✓ The figures in the margin indicate Full Marks.
- ✓ Assume suitable data if necessary.

1. What is Distributed System? Discuss the challenges of Distribution System with example. [2+6]
2. Mention the role of IDL and middleware in Distributed System. Explain RMI approach in the distributed object based system. [4+6]
3. Define DFS. How does DFS encourage sharing a storage device? Explain with the help of suitable architecture. [8]
4. How threads differ from process? How does checkpoint help in recovery? What does distributed commit refer to? [4+2+2]
5. Define flat and nested transaction. Discuss the approach of optimistic concurrency control in distributed transactions. [4+6]
6. Why it is difficult to synchronize physical clock? Explain how clock synchronization can be solved using logical clock. [2+6]
7. What are the reasons for replicating the service provide? Discuss about fault tolerant services. [4+4]
8. How cascading aborts occurs and can be solved? Explain the needs and roles of atomic commit protocol in distributed system. [8]
9. Write short notes on: [4×3]
 - a) Christian's Algorithm
 - b) Recovery approach in Distributed System
 - c) CORBA services
 - d) Monolithic and Microkernel

Exam.	New Back (2066 & Later Batch)		
Level	BE	Full Marks	80
Programme	BCT	Pass Marks	32
Year / Part	IV / I	Time	3 hrs.

Subject: - Distributed System (CT703)

- ✓ Candidates are required to give their answers in their own words as far as practicable.
- ✓ Attempt All questions.
- ✓ The figures in the margin indicate Full Marks
- ✓ Assume suitable data if necessary.

- [1] Discuss the properties of Distributed System (DS). How interaction model addresses the relevant issues in DS? [6+2]
- [2] What is the importance of IDL in RMI? Write the operation of static RMI. [3+5]
- [3] What are the characteristics of SUN-NFS? Discuss with its architecture. [3+5]
- [4] What are the common problems of physical clock synchronization algorithms? Write Chandy-Lamport's algorithm for recording global states in Distributed System. [3+5]
- [5] Measure the performance issue of non-token based Ricart-Agrawal Algorithm. Write alternate algorithm to address those performance issues. [2+6]
- [6] How to come to consensus in DS? Discuss with an approach, how do you make the distributed system service highly available? [3+5]
- [7] What are the relationships between parent and child transactions in DS? Write the problems of locking with the solutions to avoid it. [4+8]
- [8] How do you avoid faults in DS? Compare independent checkpointing with coordinated checkpointing approach. [4+4]
- [9] Write short notes on (Any Three) [4+4+4]
 - [a] Monolithic and Micro-Kernel
 - [b] Services provided by CORBA with the functions of Object Adapter
 - [c] Two Phase Distributed Commit
 - [d] Distributed Debugging.
 - [e] RPC communication semantics

Exam.	Regular		
Level	BE	Full Marks	80
Programme	BCT	Pass Marks	32
Year / Part	IV / I	Time	3 hrs.

Subject: - Distributed System (CT703)

- ✓ Candidates are required to give their answers in their own words as far as practicable.
- ✓ Attempt All questions.
- ✓ The figures in the margin indicate Full Marks.
- ✓ Assume suitable data if necessary.

1. Define Distributed System, What are advantages and disadvantages of distributed system? [2+6]
2. Draw and explain distributed file service architecture. How does that architecture encourage the sharing of storage resources in distributed system? Explain. [6+2]
3. Differentiate between RPC and RMI. How does modern RPC maintain the transparency in distributed system? [2+6]
4. Compare process and threads. Why threads are important in distributed System. [2+2]
5. Give an example of heterogeneous model of distributed application. How is distributed operating system realized in practical distributed systems? Explain. [2+4]
6. What do you mean physical and logical clocks? Explain Network Time Protocol and Berkeley Algorithm for physical clock synchronization. [2+4+2]
7. How does mutual exclusion help in co-ordination in distributed system? Explain the way how Lamport algorithm ensures mutual exclusion? [2+6]
8. What are the major objectives for replication in distributed system? Explain primary backup model for fault tolerance. [3+5]
9. Differentiate between nested transaction and distributed transaction with examples. How is commitment ensured in distributed transactions? [2+6]
10. What do you mean by fault tolerant system? What do you mean by Byzantine Failure? Explain Byzantine Generals problem to illustrate how agreement can be reached in faulty system. [1+2+5]
11. Write short notes on: [3+3]
 - a) Comparison of CORBA and Mach
 - b) Timestamp ordering in concurrency control

Exam.	New Back (2066 & Later Batch)		
Level	BE	Full Marks	80
Programme	BCT	Pass Marks	32
Year / Part	IV / I	Time	3 hrs.

Subject: - Distributed System (CT703)

- ✓ Candidates are required to give their answers in their own words as far as practicable.
- ✓ Attempt All questions.
- ✓ The figures in the margin indicate Full Marks.
- ✓ Assume suitable data if necessary.

1. How do you define Distributed System? Explain with the model, how hardware, data and controls are distributed in the distributed system environment. [2+6]
2. Explain the ways how distributed objects communicate with each other. Differentiate between RPC and RMI. [4+4]
3. Define distributed file system. Draw and explain distributed file service architecture in detail. [2+6]
4. Differentiate between homogeneous and heterogeneous distributed applications with example. [4]
5. Compare physical clocks and logical clocks with its implementation semantics. Describe Lamport's timestamp algorithm with its benefits and drawbacks. [2+6]
6. Explain any one election technique in Distributed System. Discuss with steps how consensus can be achieved in Distributed System. [5+3]
7. How do you say that replication is one of the scaling techniques in Distributed System? How to handle concurrent invocations with object replication in distributed object based system? [2+4]
8. What are the roles of atomic commitment protocol (ACP) in distributed transactions? Explain the different methods of concurrency control in distributed transactions. [2+6]
9. What are the dependability requirements of fault tolerant system? What do you mean by K-fault tolerant? How to come agreement in faulty system? Explain with the approach of byzantine generals problem. [2+2+4]
10. Write different services provided by CORBA. What are dynamic and static invocation approaches of CORBA. [2+4]
11. Write short notes on: [4+4]
 - a) Process and threads in OS
 - b) Distributed commit

Exam.	Regular		
Level	BE	Full Marks	80
Programme	BCT	Pass Marks	32
Year / Part	IV / I	Time	3 hrs.

Subject: - Distributed System (CT703)

- ✓ Candidates are required to give their answers in their own words as far as practicable.
- ✓ Attempt **All** questions.
- ✓ The figures in the margin indicate **Full Marks**.
- ✓ Assume suitable data if necessary.

1. What are the major goals of distributed system? Explain the need of transparency in distributed system along with the challenges in achieving that. [4+4]
2. How do you convince that middleware plays the important role in Distributed System? Explain the operation of RPC in client server communication in Distributed System. [3+5]
3. What do you mean by file and directory service? Explain the operation of SUN NFS with its architecture. [3+5]
4. Why network operating system (NOS) is widely preferred over distributed operating system (DOS) in practical distributed systems? Explain DOS as a middleware. [4+4]
5. Define logical and physical clocks. Explain Lamport timestamp algorithm along with an example. [2+6]
6. Present a practical scenario where you need an election algorithm. Explain an election algorithm with example that is suitable to your scenario. [2+4]
7. Compare passive replication with active replication approach. Also discuss with a technique that make the distributed system service highly available. [2+4]
8. What do you mean by Distributed Deadlock? Explain the two-phase commit protocol of handling distributed transaction. [2+5]
9. What are the flat and nested transactions? Describe the methods for concurrency control in distributed system. [3+4]
10. What do you mean by faults, failures and errors? How do you handle faults in Distributed System? Explain process resilience approach in brief. [2+2+4]
11. What is IDL? Explain CORBA RMI with its services. [2+4]
